सत्यमेव जयते

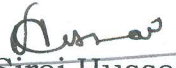

FOREWORD

The Agriculture Census Programme is a collaborative effort that is overseen by this Department having States/UTs as stakeholders. The Department of Agriculture & Cooperation, Ministry of Agriculture has been conducting Agriculture Census quinquennially with participation of States/ Union Territories since 1970-71 as part of the World Agriculture Census programme. Collection and maintenance of database on 'operational holdings' as distinct from 'ownership holding' is necessary, since operational holding is the fundamental unit for taking decision in programmes for agriculture development. The Agriculture Census 2010-11 is the ninth in the series.

The mammoth task of organizing Agriculture Census in a vast country like India involving collection, compilation and tabulation of data in respect of about 138 million operational holdings spread all over the country could be achieved only through concerted efforts and wholehearted support of States and Union Territory functionaries. The cooperation extended by them in completing this voluminous task is acknowledged. It is worth mentioning that unlike earlier Agriculture Censuses this Census has covered all States/Union Territories of India. It has been a remarkable achievement that Phase-I result was finalized well before time and with the publication of this report well ahead of launch of the next Agriculture Census 2015-16, a firm ground has been laid for timely completion of future Censuses.

I would like to record my appreciation for the efforts made by officers and staff of the Agriculture Census Division in this Department for constantly monitoring and providing administrative/technical support to the State Governments in completing Census work. The assistance rendered by National Informatics Centre in computerizing the Agriculture Census data is also acknowledged.

I hope that the information presented in this report would be found useful by policymakers, researchers and students involved in the field of agriculture for its development.

(Siraj Hussain)

PREFACE

There has been an enormous increase in the emphasis on evolving evidence based decision-making in Government at all levels through greater focus on Statistics as an input for estimation, monitoring and evaluation of the progress towards achieving development goals and targets. From this perspective, the data through periodic Agriculture Census provides valuable information on the changes in the various characteristics of agricultural sector in the country.

In India, Agriculture Census is carried out at an interval of five years as part of the World Agriculture Census Programme. Nine consecutive Agriculture Censuses, conducted in India since 1970-71, have evolved into a robust time series data base on changing structural characteristics of operational holdings in India. Following the prevailing international practice, "Operational Holding" (as against "Ownership Holding") is considered as the basic unit of decision making in all Programmes of agriculture development which has therefore been adopted as the basic unit of enumeration of Agricultural Census in India.

Encouraged by the utility of data generated by the First Agriculture Census for use in planning and formulation, National Commission on Agriculture (1976) emphasized that Agriculture Census be carried out once in five years. Accordingly, the Second Agriculture Census was conducted with 1976-77 as the reference year. An Input Survey was also conducted as part of this Census to provide State level estimates of consumption of various inputs by different size classes of holdings.

The Third Agriculture Census, with 1980-81 as the reference year, further amplified the scope of Census by collecting separately details about holdings operated by Scheduled Castes and Scheduled Tribes. Besides, sample size for input survey was increased to cater to the requirement of disaggregated data for macro and micro level planning. Gender based data in Agriculture Census is being collected since 1995-96 on the recommendations of Central Statistics Office, Ministry of Statistics and Programme Implementation, New Delhi. Agriculture Census 2010-11 is the Ninth in the series which has been concluded successfully with participation of all States/UTs.

This gigantic task of the Census could not have been accomplished without cooperation of the officers of States and Union territories who have taken considerable effort to ensure accuracy of field data and its timely completion. I express my thanks to all these officers of the States/Union Territories who participated in the programme.

I would like to place on record my appreciation for the outstanding work rendered by Officers and Staff of the Agriculture Census Division of the Department of Agriculture, Cooperation & Farmers Welfare (DAC&FW), under the guidance of Dr. Mamta Saxena, Deputy Director General, Agricultural Census, (DAC&FW), Government of India, in bringing out the Report at the earliest as well as to National Informatics Centre, New Delhi/NIELIT in computerizing the Agriculture Census 2010-11 data.

I hope the Report would be useful to all those who are concerned with the development of Agriculture Sector.

(Joseph Abraham)

Introduction

The importance of agriculture in the socio-economic fabric of India can be realized from the fact that the livelihood of majority of the country's population depends on agriculture. Towards ensuring sustainability of Indian Agriculture a comprehensive data on different parameters of actual cultivator's land, based on the concept of operational holding, is crucial. The Operational holding, being the basic unit of decision making in agriculture, detailed data on its structure and nature are necessary for formulation of effective and meaningful agriculture policy in the country.

Agricultural Census is carried out by States/Union Territories under overall technical guidance and administrative support from the Ministry of Agriculture. The fieldwork is carried out by Primary Reporting Agencies of Revenue Departments in Land Records States. In States where comprehensive Land records are not maintained the Agriculture Department/Directorate of Economics & Statistics are assigned the job of data collection etc.

Agriculture Census, which started in 1970-71, could not be conducted in two, three States after 1985-86 due to some administrative problems faced in these States. However, due to the concerted efforts of Agriculture Census Division and wholehearted support of States/UTs, it has been possible to conduct Agriculture Census 2010-11 in all 35 States/UTs.

The present All India Report on Agriculture Census 2010-11 is ninth in the series. An effort has been made to present a perspective on historical background, organization of Agriculture Census besides concepts, definitions, sampling design, estimation procedure, limitation of data with purposive analysis of data at All India and State levels.

As per Agriculture Census 2010-11, the Gross Cropped Area (GCA) was estimated at 193.76 million hectare. However, the GCA excluding Bihar, Jharkhand and Maharashtra where Agriculture Census 2005-06 could not conducted worked out to 161.31 million hectare in 2010-11 against comparable 152.61 million hectare in 2005-06, recording an increase of 5.70 percent.

The net irrigated area during Agriculture Census 2010-11 was 64.57 million hectares, out of which 48 % was accounted for by small and marginal holdings, 44 % by Semi-medium & medium holdings and 8 % by large holdings. Out of 5 sources of irrigation for which the data is collected in the Agriculture Census, viz. canals, tanks, wells, tube-wells and other sources, tube-wells emerged as the most popular source of irrigation in 2010-11 (29.16 million hectares of irrigated area) followed by canals (16.91 million hectares), wells (11.92 million hectares) and tanks (2.25 million hectares). Other sources accounted for 4.33 million hectares.

The gross irrigated area in 2010-11 came to 87.77 million hectares, which was 45.30 percent of the gross cropped area while 45.70 percent of the net area sown was irrigated. The percentage of net irrigated area to net sown area emerged as 52.25, 44.61, 44.40, 45.06 and 37.57 for marginal, small, semi-medium, medium and large holdings respectively.

The cropping intensity as per Agriculture Census 2010-11 worked out to 1.37 against 1.32 in Agriculture Census 2005-06. About 92.0 per cent of operational holdings were wholly owned and self-operated during Agriculture Census 1970-71 which rose to about 97.14 per cent in 2005-06 and had been estimated at 97.61 per cent in 2010-11. As per Agriculture Census 2010-11, for 96.95 per cent of operational holdings, entire operated area was located within the village of residence as against 95.64 per cent reported during 2005-06.

An attempt has been made to present the data in objective and compressed form. It is hoped that the policy makers, researchers and other concerned with agricultural development would find this report useful. The data at various administrative levels, like, Tehsil/District/State and all India, is also available on the Department's website <http://agcensus.nic.in> for public use.

I express my sincere thanks to the officers and staff of Agriculture Census Division, Department of Agriculture & Cooperation, Government of India and States/Union Territories for their commendable job in finalizing the Census data in shortest possible period. I also acknowledge with thanks the assistance provided by National Informatics Centre /National Institute of Electronics and Information Technology (NIELIT) in data processing and tabulation of Agriculture Census 2010-11.

(Mamta Saxena)

Deputy Director General-cum-
Agriculture Census Commissioner

136.	6(b)	Size class-wise estimated irrigated and unirrigated area under cotton – <i>Scheduled Tribes</i>	240
137.	6(b)	Size class-wise estimated irrigated and unirrigated area under jute – <i>Scheduled Tribes</i>	241
138.	6(b)	Size class-wise estimated irrigated and unirrigated area under total fibres – <i>Scheduled Tribes</i>	241
139.	6(b)	Size class-wise estimated irrigated and unirrigated area under total dyes & tanning material – <i>Scheduled Tribes</i>	242
140.	6(b)	Size class-wise estimated irrigated and unirrigated area under tobacco – <i>Scheduled Tribes</i>	242
141.	6(b)	Size class-wise estimated irrigated and unirrigated area under total drugs & narcotics – <i>Scheduled Tribes</i>	243
142.	6(b)	Size class-wise estimated irrigated and unirrigated area under fodder & green manures – <i>Scheduled Tribes</i>	243
143.	6(b)	Size class-wise estimated irrigated and unirrigated area under tea – <i>Scheduled Tribes</i>	244
144.	6(b)	Size class-wise estimated irrigated and unirrigated area under coffee – <i>Scheduled Tribes</i>	244
145.	6(b)	Size class-wise estimated irrigated and unirrigated area under rubber – <i>Scheduled Tribes</i>	245
146.	6(b)	Size class-wise estimated irrigated and unirrigated area under total plantation crops – <i>Scheduled Tribes</i>	245
147.	6(b)	Size class-wise estimated irrigated and unirrigated area under total floriculture crops – <i>Scheduled Tribes</i>	246
148.	6(b)	Size class-wise estimated irrigated and unirrigated area under total aromatic & medicinal plant – <i>Scheduled Tribes</i>	246
149.	6(b)	Size class-wise estimated irrigated and unirrigated area under total other non-food crops – <i>Scheduled Tribes</i>	247
150.	6(b)	Size class-wise estimated irrigated and unirrigated area under total non-food crops – <i>Scheduled Tribes</i>	247
151.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>All Social Groups</i>	248
152.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>Scheduled Castes</i>	249
153.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>Scheduled Tribes</i>	250
154.	1	State-wise number and area of operational holdings – All Size Classes - <i>All Social Groups</i>	251
155.	1	State-wise number and area of operational holdings – All Size Classes – <i>Scheduled Castes</i>	255
156.	1	State-wise number and area of operational holdings – All Size Classes – <i>Scheduled Tribes</i>	260

Sl. No.	Table No.	Description	Page
157.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – All Size Classes - All Social Groups	265
158.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – All Size Classes - Scheduled Castes	269
159.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – Scheduled Tribes	273
160.	2(b)	State-wise estimated leased n area by terms of leasing – All Social Groups	277
161.	2(b)	State-wise estimated leased n area by terms of leasing – All Size Classes - Scheduled Castes	279
162.	2(b)	State-wise estimated leased n area by terms of leasing – All Size Classes - Scheduled Tribes	281
163.	3	State-wise estimated area under different land use – All Size Classes - All Social Groups	283
164.	3	State-wise estimated area under different land use – All Size Classes - Scheduled Castes	285
165.	3	State-wise estimated area under different land use – All Size Classes - Scheduled Tribes	287
166.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - All Social Groups	289
167.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - Scheduled Castes	291
168.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - Scheduled Tribes	293
169.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - All Social Groups	295
170.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - Scheduled Castes	297
171.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - Scheduled Tribes	299
172.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - All Social Groups	301
173.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - Scheduled Castes	303
174.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - Scheduled Tribes	305
175.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - All Social Groups	307
176.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - Scheduled Castes	308
177.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - Scheduled Tribes	309

PART – 1

CHAPTER 1

Historical Background and Organisation of Agriculture Census

Growth of Land Records System

1.1.1 From the earliest times, India's self-sufficient villages constituted the hub of rural economy based on agriculture. Land Revenue was one of the main sources of State Income. Collection of land revenue necessitated maintenance of some records relating to cultivation. In the 16th century, Sher Shah Suri initiated land settlement operations for assessment and collection of land revenue. This was later systematized during the reign of Akbar, when Todar Mal reorganized the entire land revenue system.

1.1.2 The British Empire inherited a well laid out land records system from Mughals. They made drastic changes with a view to further improve land revenue system and augment the State revenue, as this constituted the main source of State income. These changes resulted in the development of two major types of land revenue systems. In Bengal and the adjacent areas, permanent settlement was introduced where private landlords were created to whom Government granted some but not all rights of private property in land. The new landlords acted as intermediaries between the Government and the actual cultivators. This land revenue system came to be known as Zamindari system. In large parts of Bombay and Madras, an entirely different land revenue system was developed wherein only temporary settlements were made. In this system, the Government directly dealt with the cultivators or ryots. This system came to be known as Ryotwari system. Many changes were made in these systems during the course of nineteenth century.

1.1.3 After the attainment of Independence, land laws were aimed at bringing the peasant and State into direct contact. In areas where the Zamindari system prevailed, new laws provided for abolition of intermediaries. In areas where Ryotwari system prevailed, the laws aimed at providing protection to the tenants, actual tillers of the land. These tenant laws had two main objectives. The first was to protect tenants against eviction by granting to them permanent occupancy rights on the Agriculture land they had been tilling. The second was to reduce rents by fixing upper limits.

Land Records and Agricultural Statistics

1.1.4 The gradual evolution of the land record system in the country necessitated maintenance of village forms and registers giving details of land held, various conditions

under which these were held. A regular system of revenue administration was established for the purpose. The main objective of these forms and registers has been to furnish basic material for periodic revision of land revenue assessment, settlement of newly occupied lands, suspension and remission of land revenue in the event of calamities affecting crop production, preparation of annual statement of demand of land revenue from holders and other aspects of land revenue administration. These forms and registers of various States agree to a large extent in essential details. Yet, with variations in the systems of land revenue assessment and administration, they show variations from State to State in the form and manner of their preparation and inclusion or exclusion of certain more detailed information. These forms and registers, in vogue for the maintenance of land records in different States, constitute the basis for the land utilisation, crops and irrigation statistics. These land record forms and registers are prepared on complete enumeration basis in all the States except for Kerala, Odisha, West Bengal, Nagaland, Meghalaya, Manipur, Tripura and some of the Union Territories. Detailed procedures for preparing and maintaining them are available in Land Record Manuals of respective States.

1.1.5 Changes in the content and coverage of forms have been made from time to time, to meet increasing requirements of data for planning and implementation of Agriculture development programmes. Agricultural Statistics in India have thus grown with the evolution of land records system in the country.

Improvement in Agricultural Statistics

1.1.6 With the ushering in of the planning era since 1951-52, number of schemes have been undertaken to improve the reporting of Agricultural statistics for use of policies and programmes relating to procurement of foodgrains, imports, exports and pricing of Agricultural commodities etc. Efforts have been made to introduce a complete field to field enumeration system in the three permanently settled states of Kerala, Odisha and West Bengal as per the recommendation made by the National Commission on Agriculture. The National Commission on Agriculture after examining various alternatives for collection of Agricultural statistics, had come to the conclusion that the collection of data based on land records is the best option, provided the basic records are maintained properly. Since the basic land records are maintained by the Patwari, he is the best person to do the crop inspection. He is the most knowledgeable man in the field and, as such, the most suitable person for collecting the reliable information. The basic structure for collection of Agricultural statistics

can be improved by enabling the Patwaris to do their job better and also to ensure that Patwaris and Revenue Inspectors at higher level devote adequate attention to the collection of Agricultural statistics and assign top priority to the work especially during the period of crop inspection. For this purpose, the jurisdiction of Patwari should be reduced to manageable proportion in the States where it is widely spread. Secondly, intensive supervision both by normal revenue agencies and statistical staff should be organized to ensure quality of data at the primary level. The primary and supervisory agencies, therefore, need to be suitably strengthened.

Need for data by operational holdings

1.1.7 In context of the strategy for Agricultural development, knowledge of detailed structure and characteristics of Agricultural holding is imperative for effective and efficient planning and implementation of programmes. For this purpose, it is essential to have information by operational holdings as distinct from ownership holdings which are no doubt useful to have an idea of the distribution of wealth but information by operational holdings is more important for implementation of Agricultural development programmes as such. An operational holding is defined as “all land which is used wholly or partly for Agricultural production and is operated as one Technical Unit by one person alone or with others without regard to title, legal form, size or location”. It is the operational holding which is the fundamental unit of decision making in agriculture and consequently for development programmes aimed at improving the condition of individual cultivators and also the production. Thus, a Census of operational holdings or what is otherwise known as the Agriculture Census for providing basic data on number, size, tenancy, land utilization, cropping pattern and irrigation particulars, etc., assumes importance.

1.1.8 While the system of Agricultural statistics that was in vogue in the country provided for aggregates at various geographical levels, data on structure of holdings had not been tabulated. As early as 1830, the Famine Inquiry Committee stressed the need for adequate statistics of land holdings. Again the Famine Inquiry Commission of 1945 tried to gauge the relationships between the land tenure systems and the efficiency of Agricultural production but the Commission was handicapped in this regard due to non-availability of data in respect of ownership and cultivator’s holdings and the Commission made a number of recommendations for improvement of Agricultural Statistics. Due to various reasons, these recommendations were not given effect to.

International effort for Agriculture Census

1.1.9 The decennial World Census of Agriculture sponsored by Food and Agriculture Organisation (FAO) of the United Nations essentially constitutes a series of National Agriculture Census taken all over the world in or around the same year within the framework of uniform concepts and definitions and a common programme of items coverage and tabulation. The first step towards the World Census of Agriculture was initiated in 1924 by the International Institute of Agriculture, Rome which persuaded member-countries to carry out a general programme of Agriculture Census on a comparable and uniform pattern. The objective was to obtain from these various countries internationally comparable information on the structure of agriculture through holding-wise enumeration of crop areas and livestock in one operation. Sixty-three countries and territories participated in the first Census in 1930 and of these only 46 countries took it by holdings and the rest obtained aggregates on various levels of geographical areas. The next census was planned for 1940 but could not be carried out due to Second World War. Hence the second World Agriculture Census was carried out around the year 1950 under the guidance of FAO which had since replaced the former International Institute of Agriculture. One hundred and six countries and territories participated in the second census.

1.1.10 The Government of India wanted to take the opportunity of the 1950 round of the World Census of Agriculture to overhaul the country's machinery for collection of Agricultural Statistics. A Technical Committee on Coordination of Agricultural Statistics was set up by the Ministry of Agriculture for the purpose. The Committee worked out detailed forms for collecting comprehensive data relating to the Agricultural economy of the country. The Committee's recommendations for carrying out a census with 1950-51 as the reference year could not, however, be implemented due to constraints on resources. The Third World Agriculture Census was carried out in 1960. Here also India could not go in for a comprehensive Agriculture Census in the country.

Initial efforts in India for data on operational holdings by NSSO

1.1.11 As the Government of India were, however, keen to obtain information on operational holdings, hence both for 1950 and 1960 rounds of Agriculture Census, data required by the World Agriculture Census were collected through sample surveys carried out by National Sample Survey Organization (NSSO). In connection with the 1950 round of World Agriculture Census, data were collected in India for the major crop season of the

Agriculture year 1953-54 during the 8th round of NSS (1954-55). For the 1960 round of World Agriculture Census, data were collected during the 16th round (1960-61) and 17th round (1961-62) of NSS. These gave estimates for the country as a whole and for States. These estimates were of limited value for micro level planning, say, for district or lower regional levels. NSSO also carried out a sample survey of land holdings in its 26th and 37th rounds.

First Comprehensive Agriculture Census in India

1.1.12 When the proposal for 1970 World Census of Agriculture was received from the FAO, the Government of India decided to participate in the Census and conveyed their decision to the FAO. According to the proposal of FAO, the 1970 World Census of Agriculture envisaged in principle the collection of data for all individual holdings by direct enumeration. FAO, however, suggested that sampling may be resorted to for areas where complete enumeration may not be possible. As mentioned earlier, in most parts of India the system of land records containing plot-to-plot details in every village exist. Only in a few States and territories of India such a system was not in vogue. Hence the Government of India decided to obtain the necessary information for the Census by a system of retabulation of the data available in the land records for those states and territories where such comprehensive records exist. In other areas where land records did not exist or gave insufficient census information, sample surveys were thought of and the size of the sample was such as to provide reliable estimates at the district level and for major characteristics even at levels lower than district such as Tehsil/block.

1.1.13 Thus, the first comprehensive Agriculture Census in India was carried out with the Agriculture year 1970-71 as the reference period.

Second Agriculture Census- Reference period and coverage

1.1.14 The experience gained in conducting the Agriculture Census 1970-71 had been rewarding. The use of the data from that census was encouraging and hence it was agreed that similar Agriculture Census should be undertaken at more frequent intervals of time, say, quinquennially. The National Commission on Agriculture also emphasized the need for repeating the Agriculture Census every five years coinciding with the plan periods. The question of carrying out the next Agriculture Census was, therefore, examined in consultation with the States and concerned Central Ministries. It was originally decided in August, 1974 that the next census should be carried out on sample survey basis with the Agriculture year

1975-76 as the reference period. However, a number of changes were likely to take place in the existing land records during 1975-76 and since land records constituted the base for the Agriculture Census in most parts of the country, it was decided to postpone the reference year from 1975-76 to 1976-77. In the 1976-77 Agriculture Census, Sikkim and Mizoram were also covered for the first time to make the coverage complete. But the 1976-77 Census could not be carried out in Punjab for some reasons but estimates were generated on the basis of trend observed in neighboring State of Haryana.

Pilot studies and the procedure

1.1.15 It was envisaged that the 1976-77 Agriculture Census would in general cover a sample of about 20 per cent of the villages and the data on principal characteristics would be obtained from the resident cultivators in the selected villages. The experimental pilot studies carried out to find out the problems under this approach indicated large scale under-estimation, both in area and the number of operational holdings. The under-estimation was mainly due to omissions of resident cultivators and the land operated by them. This was then considered by the Technical Committee on Agriculture Census who recommended that the primary data on number and area of operational holdings (Table 1) should be prepared in respect of all the villages in the States where comprehensive land records exist. For the rest of the items, namely, tenancy, land use, irrigation, crops etc. necessary data might be collected from a sample of 20 per cent of the villages and the entire resident cultivators therein. The advantage of this procedure was that all the survey number operated within the village was completely covered and as such the entire cropped area of the village were accounted for. In the case of non-land record States; however, the entire census was carried out on sample survey basis.

Input Survey

1.1.16 The scope of the 1976-77 Agriculture Census was also widened to include a separate Input Survey to obtain information on the use of various inputs such as fertiliser, manures, pesticides, Agriculture implements and machinery, livestock for five broad size groups of operational holdings, viz. marginal, small, semi-medium, medium and large.

1.2 Agriculture Census as part of Agricultural Statistics

1.2.1 Agriculture Census in India forms part of broader system of collection of Agricultural Statistics. It is a large scale, periodic, Government sponsored operation for collection and derivation of quantitative information about the structural aspect of agriculture

in the country. The basic unit of collecting data in Agriculture Census is the 'Agriculture Operational Holding' as distinct from 'Ownership Holding'. This is so as the operational holding is the fundamental unit of decision making in agricultural planning. Agriculture Census is conducted in most parts of the country, where detailed village land records exist, on complete enumeration basis by retabulating the data available in these records into the prescribed schedules for Agriculture Census by consolidating the information of all parcels of each of the operational holding, in the village of residence of the operational holder. In the States where detailed land records do not exist, the Agriculture Census is carried out through sample surveys by household inquiry approach.

1.2.2 Agriculture Census in India coordinated by the Agriculture Census Division of the Ministry of Agriculture requires a high degree of coordination, technical expertise, statistical control and supervision over the States. The data collected through Agriculture Census is in the nature of supplement to the current Agricultural Statistics. Under the current Agricultural Statistics, coordinated by the Directorate of Economics & Statistics of the Ministry of Agriculture, data on area, yield and production estimates are generated every year, for different seasons and details are also available for a variety of crops. The current statistics, however, provide for broad aggregates for various administrative units but not by size classes, social groups, types of holdings and gender. In planning for Agricultural development in the country, the data pertaining to various categories of farmers such as marginal, small, semi-medium, medium and large are important and it is this specific aspect that is attempted through Agriculture Census to provide data by various size classes, social groups, types of holding and gender and thus, compliments the current Agricultural Statistics in the country.

1.2.3 The Agriculture Census is, however, restricted to information on number of operational holdings and the area operated thereof with attendant details on tenure, land use, irrigation, cropping pattern and scatterdness of holdings. The census does not go into yield and production aspects which are of immediate interest for Agriculture policies and are thus covered under current Agriculture Statistics. On the other hand, the Agriculture Census is designed mainly to get an idea of the structure of the Agriculture economy as such which can be had from a study of the changing pattern of the operational holdings. As the changes in the pattern are not so rapid, the Agriculture Census is conducted at longer intervals. In India, agriculture is the most important activity and a periodical assessment of the changing pattern once in five years to review and formulate programmes in each Five Year Plan is considered

adequate and imperative. On the recommendation of the National Commission on Agriculture, the Agriculture Census in India is carried out at an interval of five years during each plan period although World Census of Agriculture (WCA) of FAO are in favour of conducting Agriculture Census once in ten years. Thus, there is complete complementarity between the two collections viz. Current Agriculture Statistics and quinquennial Agriculture Census.

1.2.4 The Agriculture Census is conducted in three phases. In Phase I, all the operational holdings in the country are enumerated and results giving number and area of operational holdings at various administrative levels like Block/Tehsil, District and State are generated according to various social groups, size classes, types of holdings and gender. In Phase II, only 20 percent of the villages in each Tehsil or Block are selected and detailed information on aspects such as tenancy, land use, irrigation, cropping pattern of all the operational holdings of these selected villages is collected. In Phase III of the Agriculture Census which is known as Input Survey, the data is collected on use of different inputs from selected holdings of selected villages (7 per cent).

1.2.5 So far nine Agriculture Censuses, at five yearly intervals, starting from 1970-71 have been completed. In addition to Agriculture Census, an Input Survey is also conducted in the following year of the Agriculture Census at the interval of five years to collect information on use of various inputs like fertilizers, manures, Agriculture credit, implements and machinery, seeds, livestock etc. So far eight Input Surveys since 1976-77 have been completed.

CHAPTER 2

Concepts, Definitions, Methodology and Scope of Census Data

2.1 Operational Holding

2.1.1 All land which is used wholly or partly for Agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

2.2 Technical Unit

2.2.1 A technical unit has been defined as the unit which is under the same management and has the same means of production such as labour force, machinery, animals, credit etc.

2.3 Agricultural Production

2.3.1 Agricultural production includes growing of field crops including jute, oilseeds, fodder grass, seeds, tree nurseries (except those of forest trees), fruits, vegetables and flowers, plantation crops (coffee, tea, cocoa, rubber), etc.

2.3.2 Grass would be treated as a crop if special efforts are made to raise it.

2.4 DE FACTO Versus DE JURE Position

2.4.1 In most of the States, land records comprising records of the rights, tenancy and crop inspection of each survey number are maintained in various registers/forms by the revenue official, namely, Patwaris. In these States, generally Agriculture Census data are compiled on the basis of retabulation approach. The question that arose in adopting this approach was about the reliability of data regarding tenancy particulars, as the de facto position may be different from de jure position. The de facto position related to what was actually the situation on the ground. In order to get reliable data on de facto position, the concerned States undertook updating of records on the eve of the Census to reduce *de jure* error. However, marginal differences may still exist though the primary workers were generally knowledgeable enough to record accurately the actual situation as far as possible.

2.5 Operated area

2.5.1 Operated area includes both cultivated and uncultivated area, provided part of it is put to Agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-

Agricultural uses, the total area of the operational holding is equal to the total geographical area of all the four survey numbers.

2.5.2 It would also cover the land occupied by the farm buildings, including the house of the holder, provided such buildings are located within the operated area. If the farms buildings are located outside the cultivated area and are covered under abadi area, such area of buildings are not included under operated area.

2.5.3 Operated area exclude government forest land, government waste land, village common grazing land, abadi area etc. If Government wasteland is allotted to an individual then it is included in the holding.

2.5.4 If the entire area of the holding (the area of all the survey numbers of an operational holding) is put to non-Agriculture use and/or it is under old fallow, it is not considered as operational holding. If, however, the entire area of operational holding is under current fallow during the reference year but was cultivated in the preceding year, this is still considered as operational holding.

2.5.5 In some cases, land is divided amongst all the members of the family. Where it is divided between the husband, wife and minor children and the cultivation is done by the husband as the head of the family, the land may appropriately be treated as one operational holding.

2.5.6 There might be cases where in the records, a holding is shown jointly in the name of more than one co-sharer while in fact the land may have been privately divided and the co-sharers are independently cultivating. In such cases where there is no dispute, they are treated as many operational holdings as the number of independent cultivators. This is because in Agriculture Census the data is collected on the basis of *de facto* position rather than *de jure* position.

2.5.7 In some States, in the Zamabandi register against a Khata, name of three or four persons are shown. While from the records it appears that there is only one holding, in practice, all the three or four brothers are actually cultivating the land independently of each other although there is no legal partition of land. From the Census point of view, this constituted three or four operational holdings.

2.5.8 Cultivated areas in the State Forests for which no detailed land records are available with the revenue agency, are excluded for Census purposes.

2.5.9 The operated area comprise of:

- i) Land owned and self operated.
- ii) Land leased in
- iii) Land otherwise operated.

2.5.10 **Land owned and self-operated:** Land for which the cultivator has the right to permanent heritable possession is considered as owned. This include:

- i) Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer
- ii) Land operated under perpetual lease.

Self-operated land include:

- i) Self cultivation
- ii) Land cultivated through members of the family
- iii) Land cultivated with the help of hired labour. Land owned and self operated should not include land leased out to others.

2.5.11 **Leased in:** Area leased in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for:

- i) Fixed money
- ii) Fixed produce
- iii) Share of produce
- iv) Usufructuary mortgage: Ownership of the property remains with the mortgager but the possession is with the mortgagee (i.e. the person to whom the mortgage is made or given). Income from the property accrues to the mortgagee and the mortgage is terminated as soon as the full amount is realized.
- v) Other terms: It includes combination of two or more terms of leasing.

2.5.12 **Area otherwise operated:** This include encroachment, land forcibly occupied, unauthorized or land in dispute etc., which cannot be treated as owned or leased in, as per the definitions given above.

2.6 Operational holder

2.6.1 An Operational holder is the person who has the responsibility for the operation of the Agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder may be Individual/Joint/ Institutional.

- i) **Individual:** If the holding is being operated either by one person alone or by group of persons who are the members of the same household it is considered as an individual holding.
- ii) **Joint:** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an Agricultural holding, such holding are considered as joint.
- iii) **Institutional:** Holdings such as government farms, sugarcane factories farms, cooperative farms, lands managed by trust is treated as institutional.

2.7 Resident and Non-resident operational holder

2.7.1 All the cultivators residing in a particular village and cultivating some land within the same tehsil are resident cultivators of that village irrespective of the fact whether they are cultivating land in that village or not. A resident cultivator may, therefore, have: either (i) entire area of the holding located in the village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence.

2.7.2 An operational holder operating area outside the tehsil in which his village of residence falls, will not be treated as a resident cultivator of the village of his residence for Agriculture Census purposes rather he will be treated as a resident cultivator of that village outside the tehsil where the area falls.

2.7.3 If the area in a particular village is operated by a cultivator who resides outside that village but within the same tehsil, he is a non-resident operational holder for that area. However, if this operational holder is resident of a village lying outside the tehsil in which the area is located, he is treated as a resident operational holder (deemed resident) of the village where the area is located.

2.8 Complete/Part-Holding

2.8.1 A holding is said to be complete holding if the entire operated area of that holding is located in one village. If the operated area is spread over more than one village, it is considered as part-holding.

2.8.2 Tehsil/Block is taken as the outer limit for consolidation of part holdings.

2.9 Wholly Irrigated, Partly Irrigated and Wholly Unirrigated Holdings

2.9.1 If the entire net area sown in an operational holding is equal to net area irrigated, such holdings are considered as wholly irrigated holding. In case part of the net sown area is irrigated, it is partly irrigated and if the entire sown area has not received any irrigation during the year of reference, such holding are wholly unirrigated.

2.10 Land Utilization

2.10.1 Operated area is classified into six broad categories:

- i) Net area sown
- ii) Current fallow
- iii) Fallow land other than current fallow
- iv) Other uncultivated land excluding fallow land
- v) Culturable waste; and
- vi) Not available for cultivation.

2.10.2 **Net area sown:** Total area sown with crops and orchards counting area sown more than once in the same year only once.

2.10.3 **Current fallow:** Cropped area, which are kept fallow during the current year but was cultivated in the previous year. For example with any seedling area is not cropped in the same year, it may be treated as current fallow.

2.10.4 **Fallow land other than current fallow:** All lands, which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years i.e. equal or greater than one year but less than or equal to five years.

2.10.5 **Other uncultivated land excluding fallow:** This include:-

- i) *Permanent pastures and other grazing lands:* All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands is, however, excluded.
- ii) *Land under Miscellaneous Tree Crops:* Cultivable land, which is not included in the net area sown but is put to some Agricultural use. Land under casuarina trees,

thatching grasses, bamboo bushes and other groves for fuel which are not included under 'Orchards', are covered under this category.

2.10.6 ***Culturable Waste***: All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other i.e. >5 years in succession. Such lands may be either wholly or partly covered with shrubs and jungles, which are not put to any use. Land once cultivated but not cultivated for five years in succession are also included in this category.

2.10.7 ***Not available for cultivation***: This include Forest area under non-Agriculture use, barren and uncultivable land belonging to the operational holder.

- i) ***Forest***: All lands classed as 'Forests' under any legal enactment dealing with forests or administered as forests whether State owned or private and whether weeded or maintained as potential forest land. The area of crops raised in the forest and grazing land or areas open for grazing within the forests would be included under the forest area. Only private forest is covered for the purpose of Agriculture Census.
- ii) ***Area under Non-Agricultural Uses***: All lands occupied by buildings or ponds or lands put to use other than agriculture is included in this category. Only such lands within the cultivated holding of operational holder should be covered in the Census.
- iii) ***Barren and Uncultivable Land***: All barren and uncultivable land within the cultivated holding of the operational holder should be covered in the Census.

2.11 Methodology adopted for Agriculture Census

2.11.1 The methodology adopted for carrying out the Agriculture Census for Land Record and non-Land Record States is as follows:-

a) ***Land Record States***

- i) In States having comprehensive land records, information was collected on complete enumeration basis for all villages by retabulation method from the land records in respect of data on number and area of operational holdings. For collection of data on other characteristics, namely, tenure and tenancy, leased in area, land use, irrigation, area under different crops, etc., 20 percent of the villages selected randomly from each tehsil constituted the basis. In these 20 percent villages, information

relating to the above characteristics were compiled from the relevant Khatauni and Khasra registers in respect of all the resident cultivators. Resident cultivators of urban areas were also covered. These 20 percent villages were the same as selected under TRS.

ii) In most of the States in India, a fairly comprehensive system of land records consisting of various village forms and registers giving detailed information, on land and its utilisation exists. The current Agricultural statistics, particularly those in respect of cropwise area of individual fields, are collected and cropwise abstracts prepared for the village as a whole for each cropping season. These data are then aggregated at successive levels like Patwari circle to revenue inspector circle, to tehsil, district, State and all-India levels. In Agriculture Census, the data available in the village land records, is required to be retabulated for generating information on the holdings. The procedure adopted for retabulation of data in States where retabulation approach is adopted, differs from State to State depending on the land records system followed. By and large, the Patwari consults the Khasra register and notes down the name of the cultivator against each Khasra number and places together the survey number/sub-survey numbers cultivated by the same cultivator. Some of the other existing land records like Khatauni are also used in preparing the list of cultivators. The names of cultivators not owning but operating the land are added with the help of Khasra register.

b) ***Non-Land Records States***

i) In States where comprehensive land records do not exist and where the system of crop enumeration on a complete field-to-field basis is not in vogue, sample surveys through household enquiries were conducted to provide information on all the items covered by the Census.

ii) In the non-land records States, namely, Arunachal Pradesh, Goa, Kerala, Manipur, Mizoram, Meghalaya, Nagaland, Orissa, Sikkim, Tripura and West Bengal and the Union Territories of Daman and Diu and Lakshadweep, no village revenue agency exists for collection of crop statistics on a regular basis. In these States and Union Territories, a stratified two-stage sampling, design was followed for Agriculture Census. The development block was generally taken as the stratum. The first stage unit within the stratum was the village and the second stage unit was the operational holding in the sample village. From each stratum, at least 20 percent of

the villages were selected by simple random sampling method. A sample of 25 percent of the operational holdings from each of the categories of the holdings on the basis of circular systematic sampling method and all the holdings from the last two size-classes was selected. Detailed information was collected from these sampled operational holdings. However, for Table-1, that is, Number and Area of Operational Holdings, all the holdings in the sample village were taken for estimation of total number of holdings and area operated.

iii) In smaller States and Union Territories, where comprehensive land records were not available, the information was collected from a larger sample of villages than 20 percent.

iv) In each State/Union Territory referred to above, household enquiry method was adopted for collection of data. All the Agriculture households in selected villages were listed for enquiry. The sample size varied from State to State depending upon the prevalent local conditions.

v) Two different set of schedules which were used to compile the data in Agriculture Census 2010-11 are available in separate manuals for land record States/UTs and non-land record States/UTs.

2.12 Size Classes and Broad Size Groups of Holdings

2.12.1 The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings.

S.No.	Size-Groups	Classes (in hectares)	
I.	Marginal	1.	Below 0.50
		2.	0.50 – 1.00 (0.50 < 1.00)
II.	Small	3.	1.00 – 2.00 (1.00 < 2.00)
III.	Semi-Medium	4.	2.00 – 3.00 (2.00 < 3.00)
		5.	3.00 – 4.00 (3.00 < 4.00)
IV.	Medium	6.	4.00 – 5.00 (4.00 < 5.00)
		7.	5.00 – 7.50 (5.00 < 7.50)
		8.	7.50 – 10.00 (7.50 < 10.00)
V.	Large	9.	10.00 – 20.00 (10.00 < 20.00)
		10.	20.00 and above

CHAPTER 3

SAMPLING DESIGN, ESTIMATION PROCEDURE AND LIMITATIONS OF DATA

(A) Sampling Design

3.1 Land Record States

3.1.1 In States where comprehensive land records exist, data on number and area of operational holdings according to different size-classes, social groups, types of holdings and gender of operational holder, is collected and compiled on complete enumeration basis through retabulation of information available in the Village Land Records. This implies covering all survey numbers within each village and preparing a list of 'Operational Holdings' therefrom. An operational holding is the basic unit of enumeration. The holding of the actual cultivator and not the owner is the unit for collection of data. Some holdings may not be located completely within the village and these may be spread over to other villages. For preparation of a list of operational holdings, necessary matching of the part-holdings scattered over more than one village has to be done. A holding may cut across boundary of a village/Patwari circle/Revenue Inspector Circle/Tehsil/District/State. A Tehsil is the outer limit for pooling of all the parcels of an operational holding. If a holding is spread over more than one Tehsil, that part of the holding which is lying outside the Tehsil of residence of operational holder is treated as a separate operational holding.

3.1.2 For the purpose of pooling of part holdings, the criterion adopted is the residence of the operational holder, but this is applicable to only those persons who are residing within the Tehsil. If operator is residing outside the Tehsil then, for the purpose of the Census, he is considered as resident operator of the village where his holding is located, and his holding in the village is treated as a separate operational holding. Necessary pooling of the part holdings has been done before preparation of Table-1 giving number of holdings and area operated for all the villages in the stratum.

3.1.3 For collection of detailed data, viz. (i) distribution of holdings according to the tenancy status; (ii) area under different land uses; (iii) distribution of holdings according to irrigation status; (iv) area irrigated source-wise and (v) area under principal crops, 20 percent of the villages selected randomly constituted the base. These 20 percent villages were those selected for Timely Reporting Scheme (TRS) for the reference year of Agriculture Census. In

these 20 percent villages, information relating to the above characteristics is compiled from the basic village land records, viz., Khatauni and Khasra in respect of all the resident cultivators. Resident cultivators of urban areas are also covered.

3.1.4 On the basis of the data obtained from 20 percent of the villages, tables are generated at the Taluk/District/State levels after adopting suitable estimation procedure as applicable in the case of Land Record States.

3.1.5 All the data is compiled separately for the operational holdings of the four groups, viz., Scheduled Castes, Scheduled Tribes, Others, Institutional and also the Total of all these groups. However, Table-1 is prepared gender-wise also.

3.2 Non-Land Record States

3.2.1 A stratified two stage sampling design is adopted for Agriculture Census in the Non-Land record States. In view of increasing demand of Agriculture Census data at Block Level, it has been decided that the Community Development Block or some other similar homogenous administrative unit should be taken as the stratum. The first stage unit within the stratum is the village and the second stage unit is the operational holding. In the States where geographical dispersion of the village is not much, at least 20% of the villages are selected by simple random sampling method from each stratum. These sample villages include all villages selected under the scheme for Establishment of an Agency for Reporting Agricultural Statistics (EARAS). In States where less than 20 percent villages are selected for EARAS, additional villages are selected using random sampling to bring up the percentage of selected villages in each stratum to recommended 20 percent. For example, if only 15 percent villages have been selected for EARAS, additional 5 percent villages in each stratum are selected and added to the list of EARAS villages, to get the list of villages where Agriculture Census has been conducted.

3.2.2 In case of all holdings other than institutional holdings, the second stage sampling is to be done in the States for canvassing Holding Schedule (H).

3.2.3 All the institutional holdings in the selected village are included in the sample for filling Holding Schedule (H).

3.2.4 For adoption of common software for tabulation, it is necessary that all the Non-Land record States follow the above sampling design. However, variations in the size of the sample at the two stages may be warranted to suit the pattern of distribution of holdings and/or villages

in the States as also to ensure the presence of adequate number of units of each type in the sample.

3.2.5 The sampling of operational holdings is done separately for Scheduled Castes/Scheduled Tribes/Others categories of operational holders as estimates are to be worked out separately for each of these categories.

(B) Estimation Procedure

3.3 For States adopting Stratified Unistage sampling design (Land Record States)

3.3.1 The estimation procedure for population totals and their sampling errors at Taluk as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of States having comprehensive Land Records is given below:

The estimate used is “Ratio Estimate in Simple Random Sampling”.

- | | | | |
|----|----------------|---|---|
| a. | Let M | - | be the number of Taluks in a district. |
| b. | Y_{ij} | - | Value of characteristic in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class) |
| c. | X_{ij} | - | Total number of operational holdings/total operated area in the j^{th} village of i^{th} Taluk in a particular size class (whichever is applicable) |
| d. | $N_i(k)$ | - | total No. of villages in the i^{th} Taluk, each village having at least one holding in k^{th} size class |
| e. | n_{ik} | - | Number of selected villages in i^{th} Taluk, each village having at least one holding in the k^{th} size class. |
| f. | $R_i(k)$ | - | Ratio of sample total of Y_{ij} to that of X_{ij} in the i^{th} Taluk. |
| g. | $X_i(k)$ | - | Total number of operational holdings/Total operated area in the i^{th} Taluk for k^{th} size class (whichever is applicable) based on complete enumeration. |
| h. | $\hat{Y}_i(k)$ | - | The estimate of characteristic under study for i^{th} Taluk for k^{th} size class. |
| i. | $\hat{Y}_D(k)$ | - | The estimate of characteristic under study for the district for k^{th} size class. |

Note:- Taluk and Tehsil are synonymous terms. Where Revenue Inspector Circle are strata, the unit would be Revenue Inspector Circle in place of Taluk.

The estimate of characteristic under study for i^{th} Taluk for k^{th} size class viz. $\hat{Y}_i(k)$ is given by

$$\hat{y}_i(k) = \frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} x_i(k) = R_i(k) \cdot x_i(k)$$

The estimate of characteristic under study for the district for kth size class viz. $Y_D(k)$ is given by

$$\hat{y}_D(k) = \sum_{i=1}^M \left[\frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} \right] \cdot x_i(k) = \sum_{i=1}^M R_i(k) \cdot x_i(k) = \sum_{z=1}^M \hat{y}_z(k)$$

$$\sum_{i=1}^M \hat{y}_i(k) = \sum_{i=1}^M \left[\frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} \right] \cdot x_i(k) = \sum_{i=1}^M R_i(k) \cdot x_i(k)$$

The estimate of variance of $Y_i(k)$ is given by:

$$\hat{v} \left[\hat{y}_i(k) \right] = \frac{N_i(k) [N_i(k) - n_i(k)]}{n_i(k) [n_i(k) - 1]} \sum_{j=1}^{n_i(k)} \left(y_{ij} - R_i(k) \cdot Y_{ij} \right)^2$$

The estimate of variance of $Y_D(k)$ is given by:

$$\hat{v} \left[\hat{y}_D(k) \right] = \sum_{i=1}^M \frac{N_i(k) [N_i(k) - n_i(k)]}{n_i(k) [n_i(k) - 1]} \sum_{j=1}^{n_i(k)} \left(y_{ij} - R_i(k) \cdot Y_{ij} \right)^2$$

The percentage standard error of the estimate is given by:

$$\%S.E. \left(\hat{y}_D(k) \right) = \frac{\sqrt{\hat{v} \left(\hat{y}_D(k) \right)}}{\hat{y}_D(k)} \times 100.$$

3.3.2 For States adopting stratified two stage sampling design with systematic sampling at the second stage.

3.3.3 The estimation procedure for estimating the population totals and their sampling errors with regard to specific characteristics relating to number of operational holding and operated area in respect of the above Non-Land record states is given below:

The estimate used is “Simple Mean”.

1. Let M be the number of Taluks in a district.
2. $Y_{ijp}(k)$ Value of characteristic in p^{th} holding of j^{th} village of the i^{th} Taluk in k^{th} size class.
3. N_i Total number of villages in the i^{th} Taluk.
4. n_i Number of sampled villages in the i^{th} Taluk.
5. $N_i(k)$ Total number of villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
6. $n_i(k)$ Number of selected villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
7. $N_{ij}(k)$ Number of holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
8. $n_{ij}(k)$ Number of sampled holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
9. $\hat{Y}_{ij}(k)$ The estimate of characteristic under study for the i^{th} Taluk in k^{th} size class.
10. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for k^{th} size class.

The estimate of characteristic under study for i^{th} Taluk for k^{th} size class viz. $\hat{Y}_i(k)$ is given by:-

$$\begin{aligned}\hat{y}_i(k) &= \frac{N_i(k)}{n_i(k)} \sum_{u=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k) \\ &= \frac{N_i}{n_i} \sum_{ij=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)\end{aligned}$$

$$\hat{y}_D(k) = \sum_{i=1}^M \frac{N_i}{n_i} \sum_{ij=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\hat{V}\left(\hat{Y}_i(k)\right) = \frac{N_i^2(k)}{n_i(k)} S_{hi}^2(k) = \left(\frac{N_i}{n_i}\right)^2 n_i(k) S_{hi}^2(k) \cdot n_i(k)$$

$$\text{where } S_{hi}^2(k) = \frac{1}{n_i(n) - 1} \sum_{j=1}^{n_i(k)} \left[t_{ij}(k) - \frac{\sum_{j=1}^{n_i(k)} t_{ij}(k)}{n_i(k)} \right]^2$$

$$\text{and } t_{ij}(k) = \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

$$\hat{V}\left(\hat{Y}_D(k)\right) = \sum_{i=1}^M \hat{V}\left(\hat{Y}_i(k)\right) = \sum_{i=1}^M \left(\frac{N_i}{n_i}\right) \cdot n_i(k) S_{hi}^2(k)$$

$$\%S.E.\left(\hat{Y}_D(k)\right) = \left[\sqrt{\frac{\hat{V}\left(\hat{Y}_D(k)\right)}{\left(\hat{Y}_D(k)\right)}}\right] \times 100.$$

3.4 For states adopting stratified unistage sampling design (Non-Land record states)

3.4.1 The estimation procedure for estimating the population totals and their sampling errors at Taluk/Block as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of the non land record States is given below:-

The estimate used is “Simple Mean”.

1. Let M be the number of Administrative Units/Gram Sevak Circle Blocks/Taluks in a district.
2. $Y_{ij}(k)$ Value of characteristic in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class).
3. N_i Total number of villages in i^{th} Taluk.
4. n_i Number of selected villages in i^{th} Taluk.
5. $n_i(k)$ Number of selected villages in i^{th} Taluk, each village having at least one holding in k^{th} size class.
6. $\hat{Y}_i(k)$ The estimate of characteristic under study for i^{th} Taluk for K^{th} size class.
7. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for K^{th} size class.

The estimate of characteristic under study for i^{th} Taluk/Block for K^{th} size class viz., $\hat{Y}_i(k)$ is given by:

$$\hat{Y}_i(k) = \frac{N_i}{n_i} \sum_{j=1}^{n_i(k)} Y_{ij}(k)$$

The estimate of characteristic under study for the district for k^{th} size class viz., $\hat{Y}_D(k)$ is given by:

$$\hat{Y}_D(k) = \sum_{i=1}^M \frac{N_i}{n_i} \left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\hat{V}\left(\hat{Y}_i(k)\right) = \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k)\right)^2}{n_i(k)} \right]$$

$$\hat{V}\left(\hat{Y}_D(k)\right) = \sum_{j=1}^M \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k)\right)^2}{n_i(k)} \right]$$

The percentage standard error of the estimate is given by:

$$\%S.E.\left(\hat{Y}_D(k)\right) = \left[\sqrt{\hat{V}\left(\hat{Y}_D(k)\right)} / \hat{Y}_D(k) \right] \times 100.$$

(C) Limitations of data

3.5.1 Agriculture Census 2005-06 was not conducted in the States of Bihar, Jharkhand and Maharashtra. Hence, an estimate only for important parameter, viz., number and area of operational holdings has been done for Bihar and Maharashtra.

3.5.2 Agriculture Census 2010-11 has been conducted in all 35 States/UTs.

3.5.3 The comparison of data relating to priority Table-1 providing information on number of holdings and area operated in Agriculture Census 2010-11 has been done based on the data available for 34 States/UTs out of 35 and for other items, like, tenancy, terms of leasing, land use, irrigation, dispersal of holdings and cropping pattern, the data for 32 States/UTs i.e. excluding Bihar, Jharkhand and Maharashtra out of 35, have been taken into account

3.5.4 There is no data for Jharkhand in the Report for Agriculture Census 2005-06.

CHAPTER 4

Agriculture Census Results – All India All Social Groups

(A) Operational holdings

4.1 Distribution of operational Holdings

4.1.1 The number of operational holdings has been consistently increasing since the first Agriculture Census in 1970-71. The number of holdings, which was 71.0 million in 1970-71 went upto 81.6 million, 88.9 million, 97.2 million, 106.6 million, 115.6 million, 119.9 million, 129.2 million and 138.35 million in the successive censuses from 1976-77 to 2010-11. Thus the number of holdings, since the first Agriculture Census with reference year 1970-71 has shown a compound annual growth rate of 1.68 percent which showed a declined trend in comparison to the earlier growth rate of 1.73 percent considering the terminal figure of the previous Census 2005-06.

4.1.2 The operated area which was 162.3 million hectares in 1970-71, initially increased to 165.5 million hectares in 1990-91 and thereafter declined to 158.3 million hectares in 2005-06 which rose to 159.59 million hectares in 2010-11, indicating a marginal increase of 0.80 percent. The operated area has primarily increased because of the State of Jharkhand which came into being in the year 2000, participated for the first time in Agriculture Census operation in 2010-11.

4.1.3 The average size of holdings had shown a consistent decline over all the census periods. For instance, in 1970-71 it was 2.28 hectares, which reduced to 2.00 hectares in 1976-77, 1.84 hectares in 1980-81, 1.69 hectares in 1985-86, 1.55 hectares in 1990-91, which again declined to 1.41 hectares during 1995-96, 1.33 hectares in 2000-01, 1.23 hectares in 2005-06 and 1.15 hectares in 2010-11.

4.1.4 The data on number and area of operational holdings and average size of holdings by major size classes for all Social Groups since 1970-71 may be seen in Table 4.1. A graphical presentation of these characteristics of operational holdings may be seen in Figure 4.1, Figure 4.2 and Figure 4.3 respectively.

4.1.5 The number and area of operational holdings and average size of holdings by size-classes and gender in Agriculture Censuses 2005-06 and 2010-11 may be seen in Table 4.2.

Table 4.1: Number of holdings, operated area and average size of holdings – All Social Groups

Note: (1) *includes Institutional Holdings. (2) ^sFigures in brackets relate to Agriculture Census 2005-06 which are excluding Jharkhand. (3) Total may not tally due to rounding off.

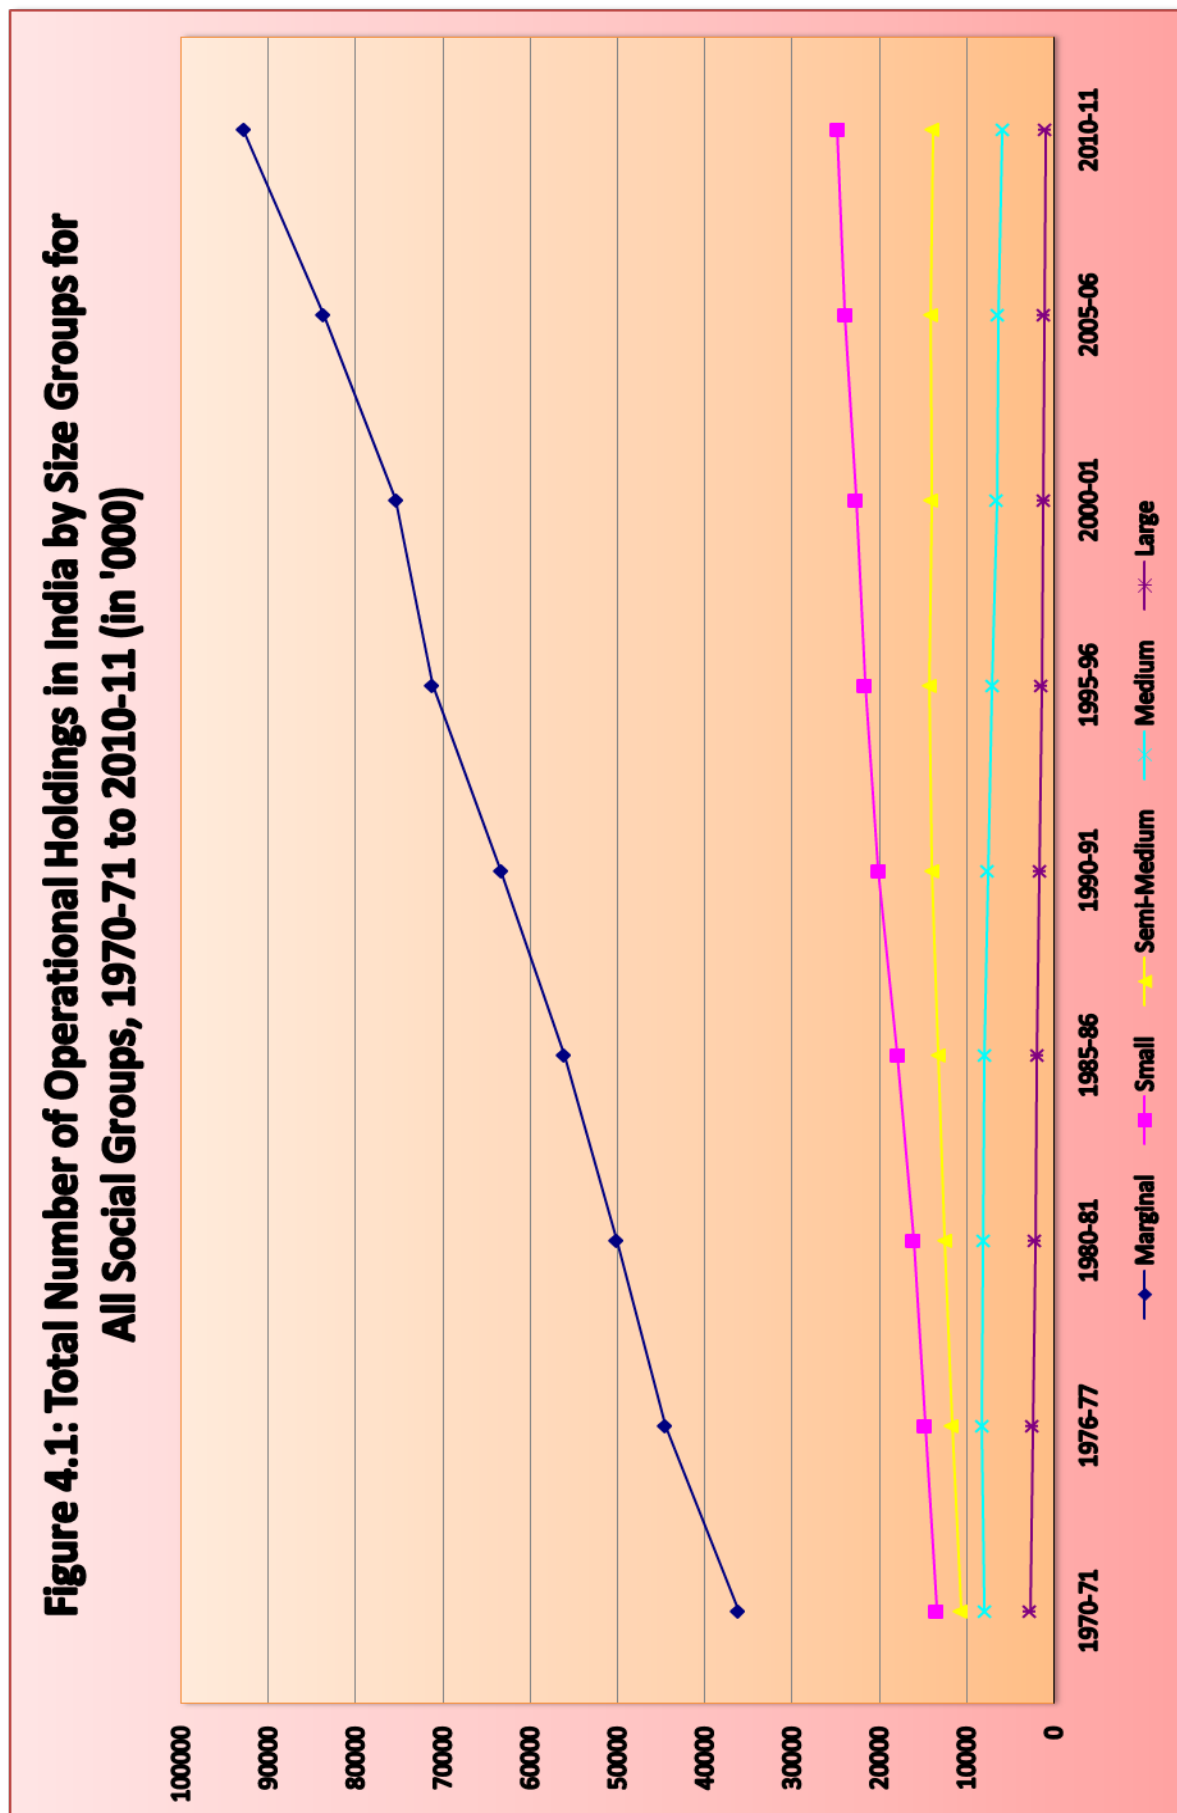

Figure 4.2: Total Area of Operational Holdings in India by Size Groups for All Social Groups, 1970-71 to 2010-11 (area in '000 ha.)

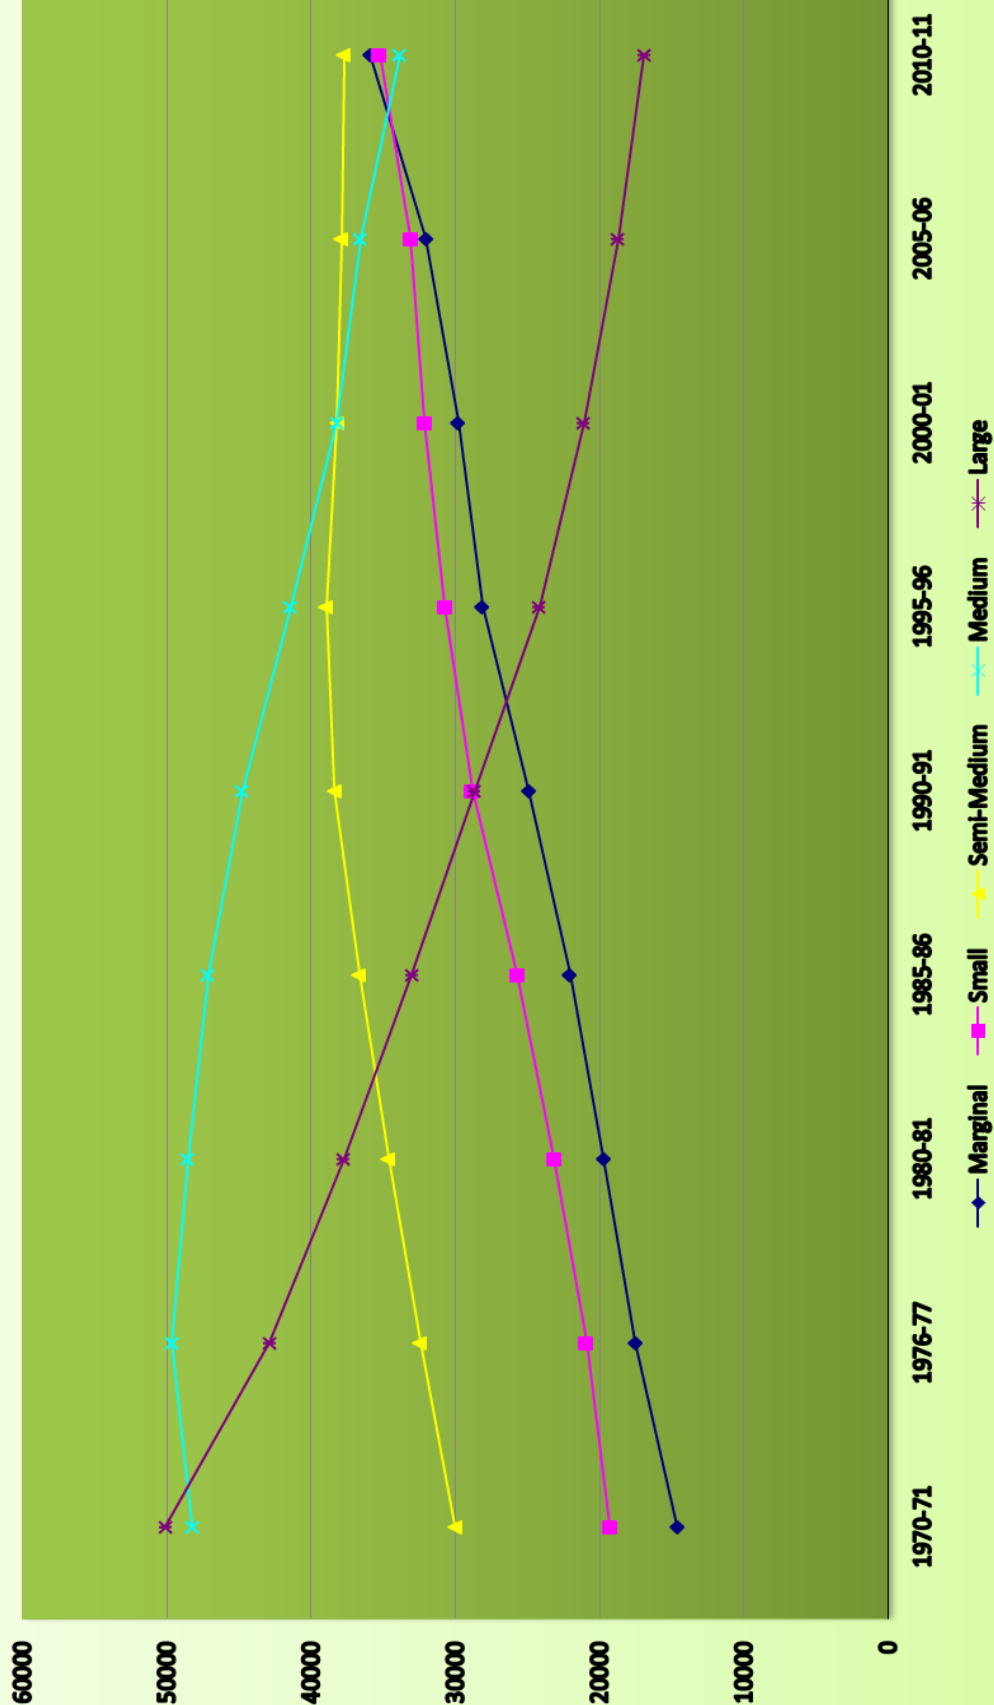

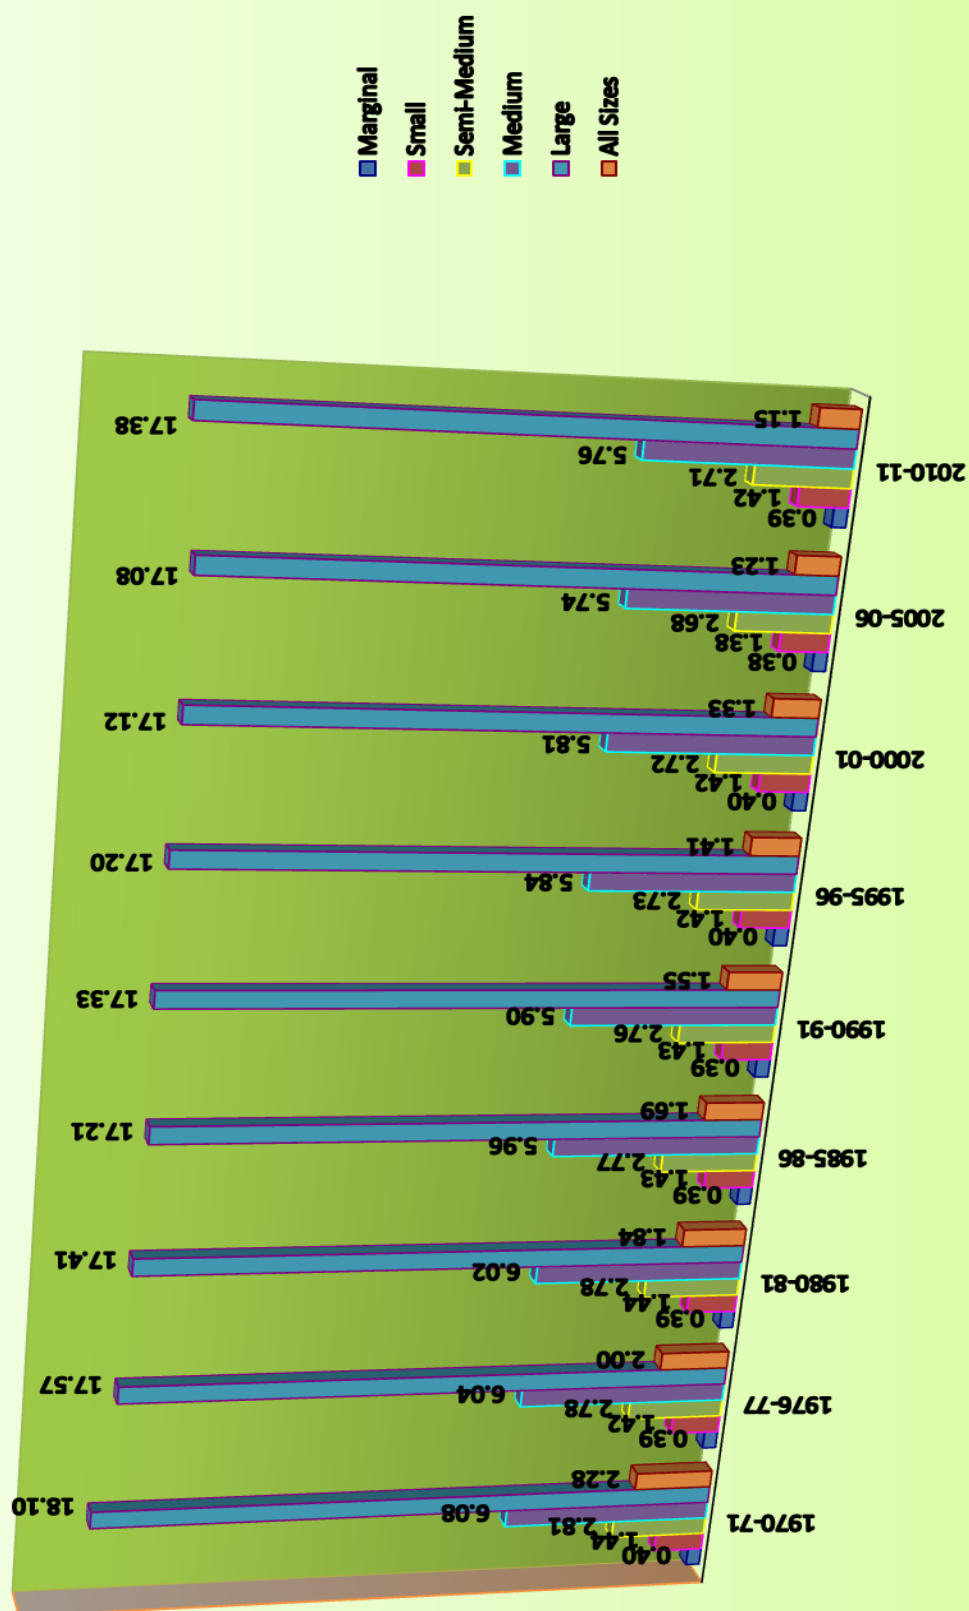

Figure 4.3: Average Size of Land Holdings in India by Size Groups for All Social Groups, 1970-71 to 2010-11 (in ha.)

4.1.6 The total number of operational holdings in the country increased from 129.22 million in 2005-06 excluding Jharkhand to 138.35 million in 2010-11, showing an increase of 7.06 percent. Male operational holdings (excluding Institutional) constituted about 87.2 percent while female holdings were 12.8 percent in 2010-11 against 88.3 percent and 11.7 percent respectively in 2005-06. This indicates rising participation of females in management and/or operation of agricultural holdings.

Table 4.2: Number of operational holdings, area operated by and average size of per holding by size-classes and gender for All Social Groups during Agriculture Census 2005-06^s and 2010-11.

11	All Classes	120427 (113851)	17683 (15115)	138348 (129222)	141540 (141861)	16510 (14768)	159592 (158323)	1.18 (1.25)	0.93 (0.98)	1.15 (1.23)

Note: (1) *includes Institutional Holdings. (2) ^sFigures in brackets relate to Agriculture Census 2005-06 which are excluding Jharkhand. (3) Total may not tally due to rounding off.

4.1.7 In terms of corresponding operated area, it was 158.32 million hectares in 2005-06 which increased to 159.59 million hectares in 2010-11, showing a marginal increase of 0.80 percent. The proportion of operated area managed by female operational holders (excluding Institutional) stood at 10.5 percent in 2010-11 against 9.4 percent in 2005-06.

4.1.8 The average size of operational holding in Agriculture Census 2010-11 was 1.15 hectares against 1.23 hectares in 2005-06. The average size relating to male and female operational holdings in 2010-11 was 1.18 hectares and 0.93 hectare against 1.25 hectares and

0.98 hectares respectively in 2005-06. The average operated area in 'all size-classes' had thus decreased in general in 2010-11 as compared to 2005-06.

4.1.9 The small and marginal holdings (below 2.00 ha.) constituted 85.01 percent in 2010-11 against 83.29 percent in 2005-06 and the operated area at 44.58 percent in the current Census as against the corresponding figure of 41.14 percent in 2005-06. The semi-medium and medium operational holdings (2.00 ha. – 9.99 ha.) were 14.29 percent with the operated area at 44.82 percent. The corresponding figure for 2005-06 census was 15.87 percent and 47.04 percent. The large holdings (10.00 ha. & above) were only 0.70 percent of total number of holdings in 2010-11 with a share of 10.59 percent in the operated area as against 0.85 percent and 11.82 percent respectively in 2005-06.

4.2 Tenancy of operational holdings

4.2.1 In Agriculture Census, operational holdings are categorized according to different tenurial characteristics. These categories are – (1) wholly owned and self-operated, (2) wholly leased-in, (3) wholly otherwise operated, (4) partly owned and partly leased in, (5) partly owned and partly otherwise operated, (6) partly leased in and partly otherwise operated and (7) partly owned, partly leased in and partly otherwise operated. The area 'otherwise operated' relates to area occupied and operated by the operational holder by encroachment or through forcible occupation of Government/private land or land under litigation or land acquired by Government but being operated by the holder.

4.2.2 The distribution of number and area of operational holdings by Tenancy status according to major size groups of holdings for all social groups in 2010-11 may be seen in the Table 4.3 and Table 4.4 respectively. The above-mentioned last four categories of holdings have been clubbed and shown under 'Others' in these tables for analytical purpose.

Table 4.3: Distribution of number of operational holdings in India by Tenancy status in Major Size Classes for All Social Groups, 2010-11

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased-in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	92826 (100.00)	90426 (97.41)	564 (0.61)	157 (0.17)	1679 (1.81)
2	Small	24779 (100.00)	24163 (97.51)	107 (0.43)	27 (0.11)	482 (1.95)
3	Semi-medium	13896 (100.00)	13684 (98.48)	39 (0.28)	14 (0.10)	158 (1.14)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased-in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
4	Medium	5875 (100.00)	5812 (98.93)	12 (0.20)	3 (0.06)	48 (0.81)
5	Large	973 (100.00)	955 (98.21)	2 (0.18)	0 (0.05)	15 (1.57)
	All Size Classes	138348 (100.00)	135040 (97.61)	724 (0.52)	202 (0.15)	2383 (1.72)

(1) Figures in brackets indicate percentages to total number of holdings.

4.2.3 According to Table 4.3, wholly owned and self-operated holdings accounted for 97.61 percent. The wholly leased in holdings were only 0.52 percent while wholly otherwise operated holdings were at the minimum of 0.15 percent. The remaining categories of holdings shown under 'Others' represented 1.72 percent of the total number of operational holdings.

Table 4.4: Distribution of Area Operated by Tenancy status in India in Major size Classes for All Social Groups, 2010-11

(Area in '000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	35908 (100.00)	34477 (96.01)	264 (0.74)	61 (0.17)	1106 (3.08)
2	Small	35244 (100.00)	34248 (97.17)	157 (0.45)	40 (0.11)	799 (2.27)
3	Semi-medium	37705 (100.00)	37108 (98.42)	106 (0.28)	37 (0.10)	453 (1.20)
4	Medium	33828 (100.00)	33456 (98.90)	68 (0.20)	20 (0.06)	284 (0.84)
5	Large	16907 (100.00)	16629 (98.36)	28 (0.16)	9 (0.05)	241 (1.42)
	All Size Classes	159592 (100.00)	155918 (97.70)	624 (0.39)	167 (0.10)	2883 (1.81)

(1) Figures in brackets indicate percentages to total operated area.

4.2.4 From Table 4.4, it may be seen that while wholly owned and self-operated area was at the maximum of 97.70 percent, wholly leased-in area, wholly otherwise operated area and area under 'Others' formed only 0.39 percent, 0.10 percent and 1.81 percent, respectively of the total operated area.

4.3 Terms of leasing

4.3.1 Area leased in is defined as the land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for (i) fixed money, (ii) fixed product, (iii) share of produce, (iv) usufructuary mortgage and (v) other terms. The distribution of leased-in area by terms of leasing for all social groups during Agriculture Census 2005-06 and 2010-11 may be seen in the Table 4.5.

Table 4.5: Distribution of leased-in area in India by Terms of leasing in Major Size Classes for All Social Groups during 2005-06* and 2010-11

Sl. No.	Major size classes	Area leased-in for					Total
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms	
1	2	3	4	5	6	7	8
1	Marginal	160 (27.05)	66 (11.17)	352 (59.51)	7 (1.12)	7 (1.14)	592 (100.00)
2	Small	109 (27.47)	52 (13.15)	228 (57.55)	4 (0.91)	4 (0.92)	396 (100.00)
3	Semi-medium	94 (43.75)	26 (12.11)	90 (41.75)	2 (0.96)	3 (1.43)	215 (100.00)
4	Medium	119 (75.66)	12 (7.91)	19 (11.84)	1 (0.79)	6 (3.80)	157 (100.00)
5	Large	107 (77.00)	9 (6.17)	18 (12.87)	0 (0.31)	5 (3.64)	139 (100.00)
2010-11 (All Size Classes)		589 (39.28)	165 (11.02)	707 (47.13)	14 (0.93)	24 (1.63)	1499 (100.00)
2005-06* (All Size Classes)		416 (30.88)	157 (11.63)	717 (53.23)	17 (1.26)	40 (3.00)	1347 (100.00)

Note: (1) Figures in brackets are percentages to total area within each category. (2) * excluding Bihar, Jharkhand and Maharashtra.

4.3.2 Of the total leased-in area in 2010-11, the largest share was leased-in for share of produce, being 47.13 percent for all size classes followed by 39.28 percent for fixed money and 11.02 percent for fixed produce. The area leased-in under usufructuary mortgage stood at 0.93 percent against 1.26 percent in 2005-06. The percentage of area leased-in under 'other terms' which is a combination of two or more terms, reduced to 1.63 in 2010-11 as compared to 3.00 in 2005-06.

4.3.3 A graphical presentation of area under different terms of leasing in 2010-11; leased-in area under fixed money; and leased-in area under share of produce, are given since 1976-77 separately in Figure 4.4, Figure 4.5 and Figure 4.6 respectively.

(B) Land use

4.4 Land Utilisation

4.4.1 The area under different types of land use during Agriculture Census years may be seen in Table 4.6.

Table 4.6: Area under different forms of Land Use for All Social Groups during various Agriculture Census years

Sl. No.	Forms of land use	Area (in '000 hectare)								
		1970-71	1976-77	1980-81	1985-86	1990-91	1995-96	2000-01*	2005-06#	2010-11
1	2	3	4	5	6	7	8	9	10	11
1	Total operated area	162124 (100.00)	157555 (100.00)	163792 (100.00)	164529 (100.00)	165507 (100.00)	163355 (100.00)	152410 (100.00)	132067 (100.00)	159592 (100.00)
2	Net area sown	135822 (83.80)	128544 (81.60)	136641 (83.40)	137428 (83.50)	140413 (84.80)	141062 (86.35)	132677 (87.05)	115855 (87.72)	141279 (88.52)
3	Current fallows	9257 (5.70)	13316 (8.40)	11446 (7.00)	12594 (7.70)	12246 (7.40)	12070 (7.39)	11338 (7.44)	10271 (7.78)	11514 (7.21)
4	Net cultivated area (2+3)	145079 (89.50)	141860 (90.00)	148087 (90.40)	150022 (91.20)	152659 (92.20)	153132 (93.74)	144015 (94.49)	126126 (95.50)	152793 (95.74)
5	Land unutilized	12380 (7.70)	11786 (7.50)	11245 (6.90)	11166 (6.80)	9916 (6.00)	7734 (4.73)	6533 (4.29)	4574 (3.46)	4742 (2.97)
6	Land not available for cultivation	4603 (2.80)	3907 (2.50)	4460 (2.70)	3341 (2.00)	2932 (1.80)	2487 (1.52)	1862 (1.22)	1367 (1.03)	2056 (1.29)

Note: (1) Figures in brackets are percentages to total operated area. (2) * excluding Bihar, Jharkhand and Meghalaya. (3) # excluding Bihar, Jharkhand and Maharashtra.

Figure 4.4: Distribution of leased-in area in India by Terms of leasing in each Size Groups for All Social Groups, 2010-11 (in percentage)

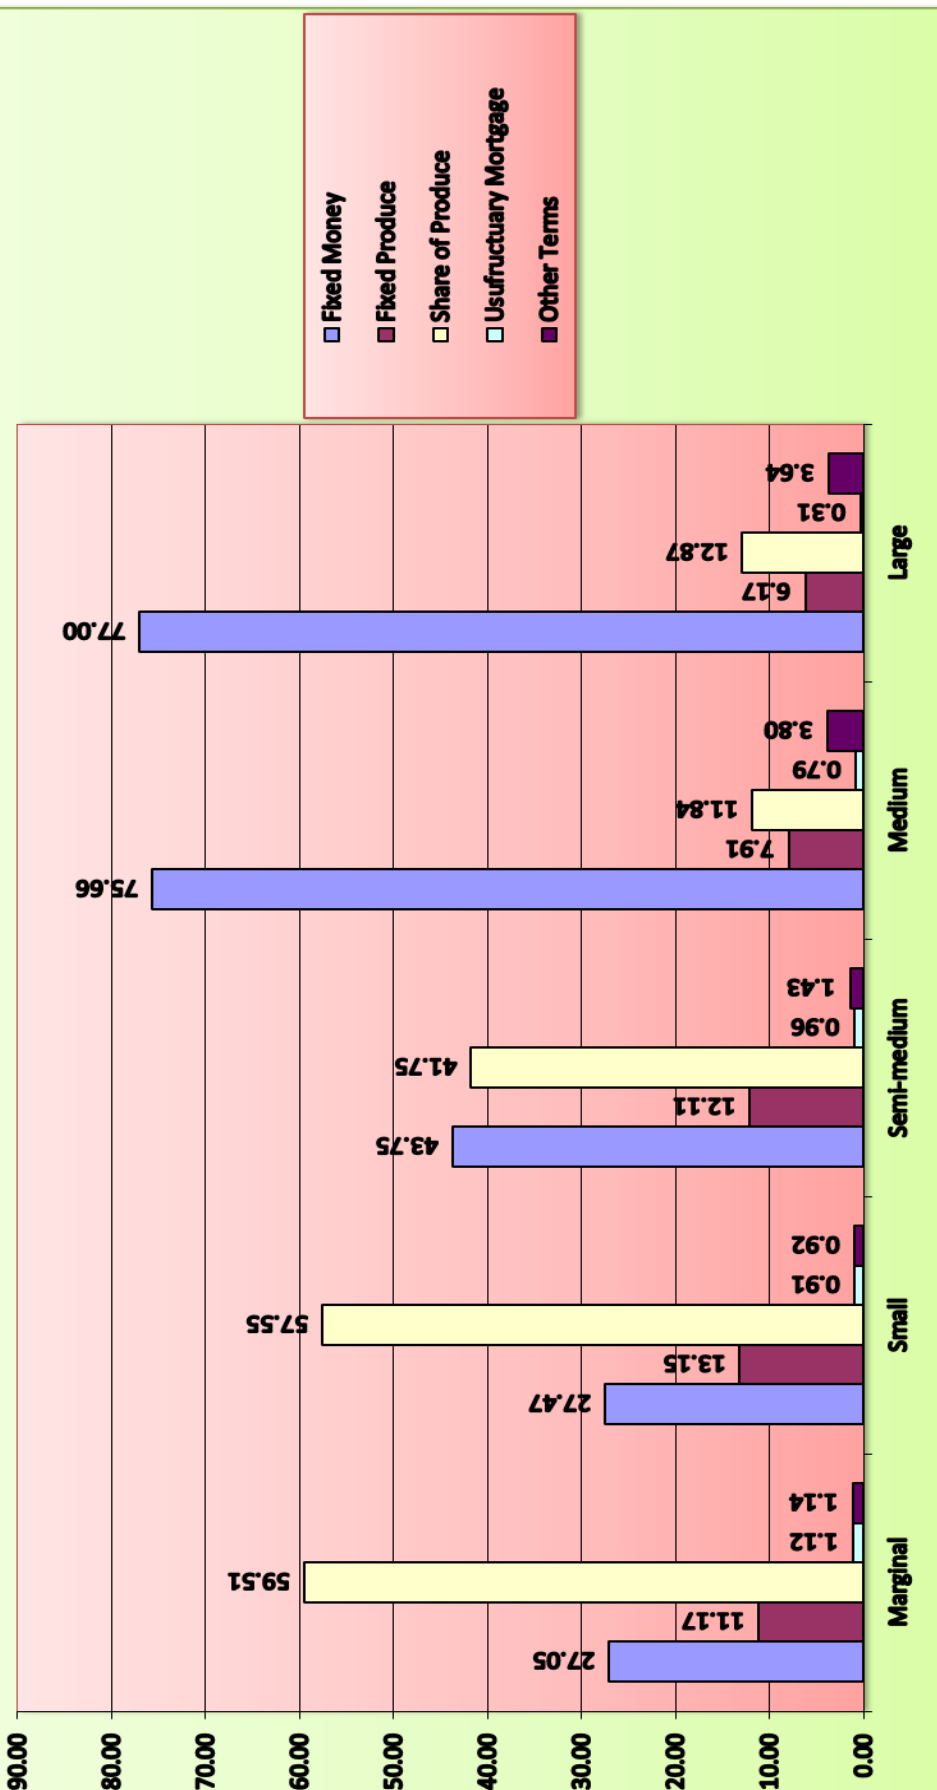

Figure 4.5: Trends of leased-in area in India under Fixed Money by Size Groups for All Social Groups, 1976-77 to 2010-11

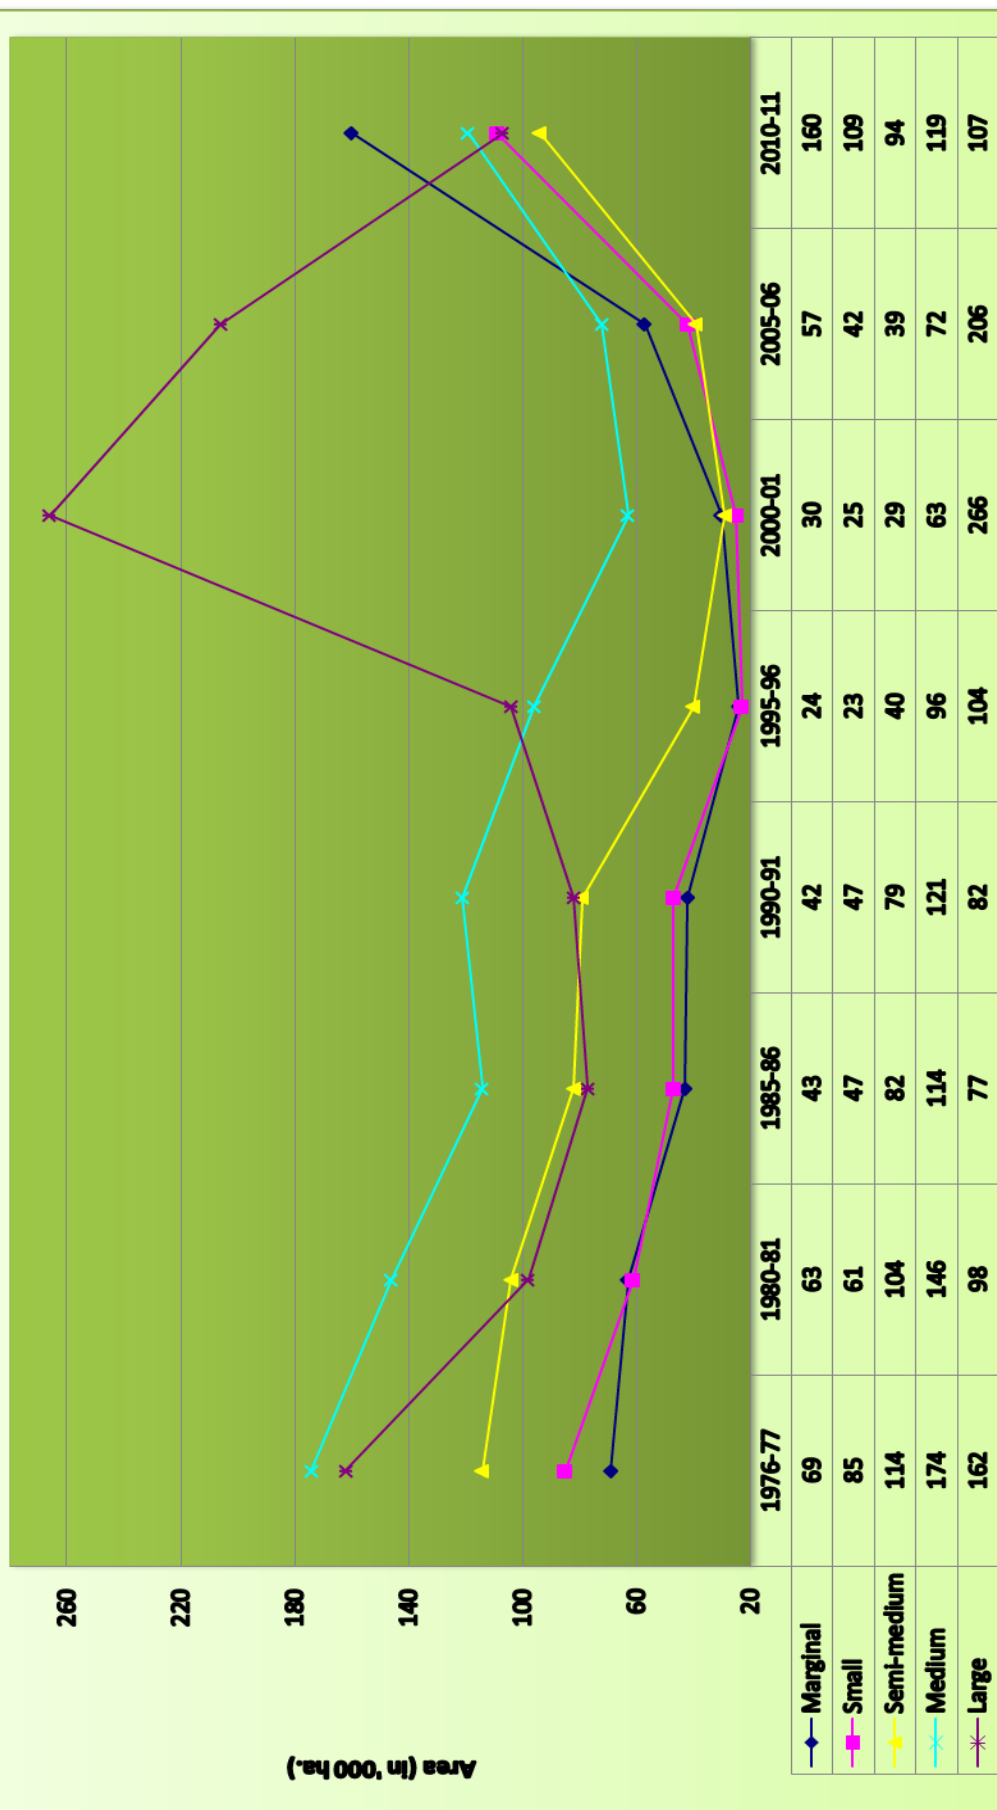

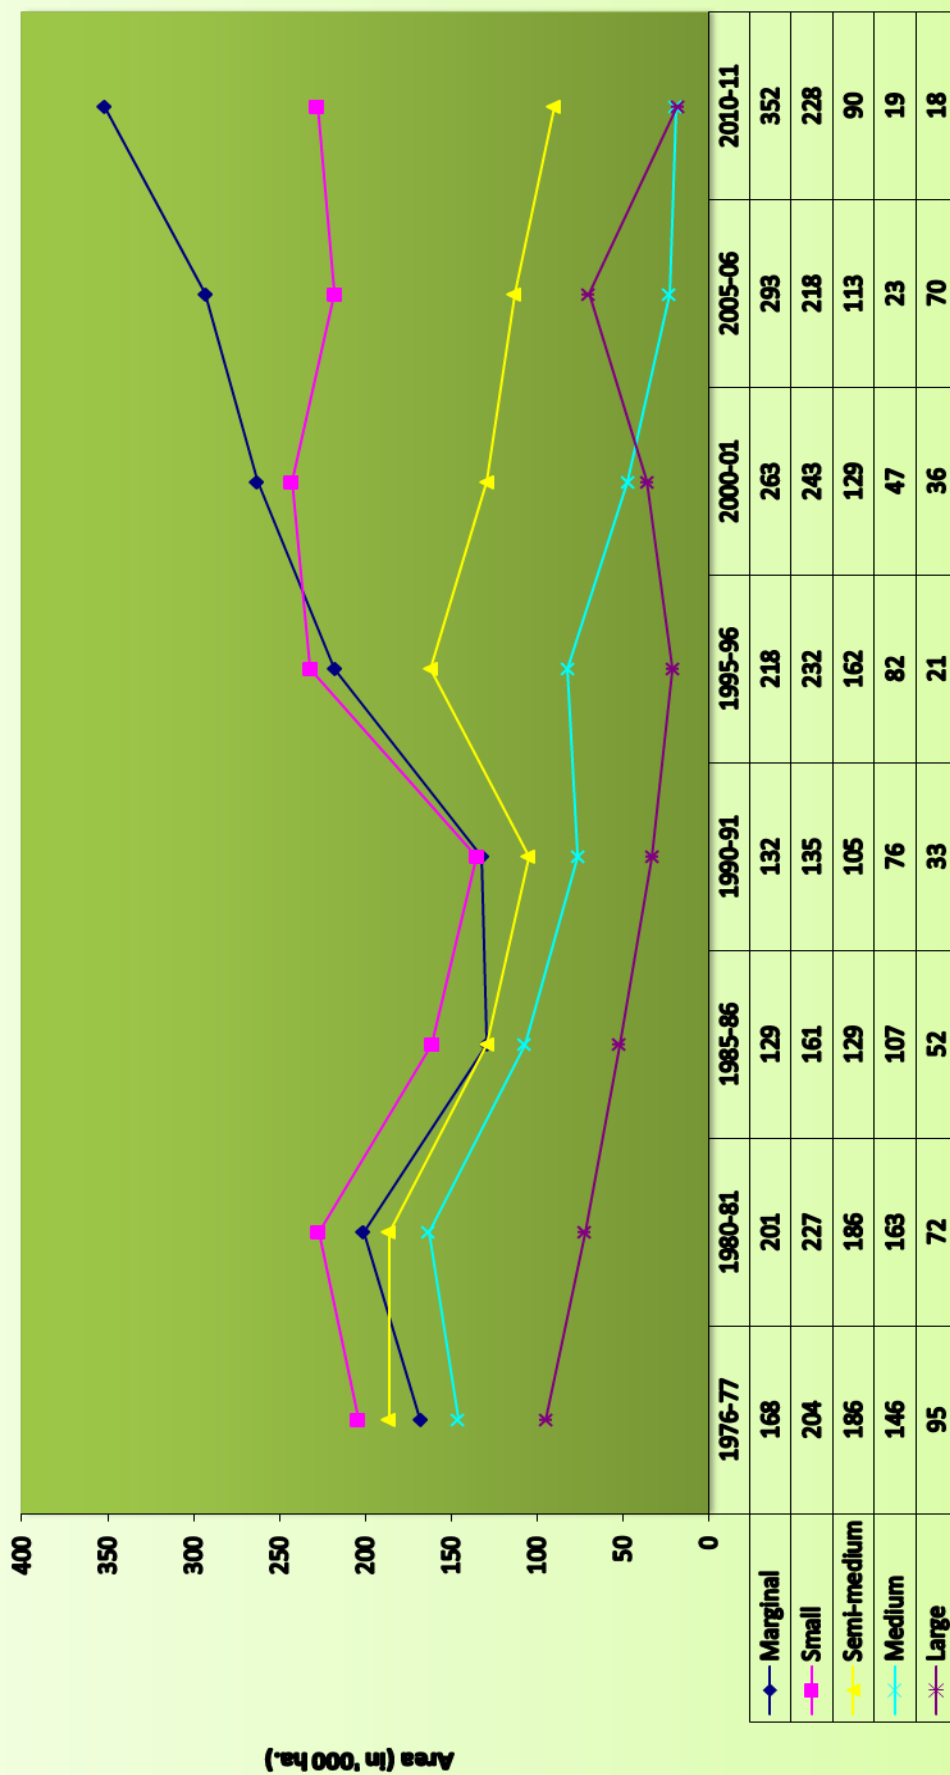

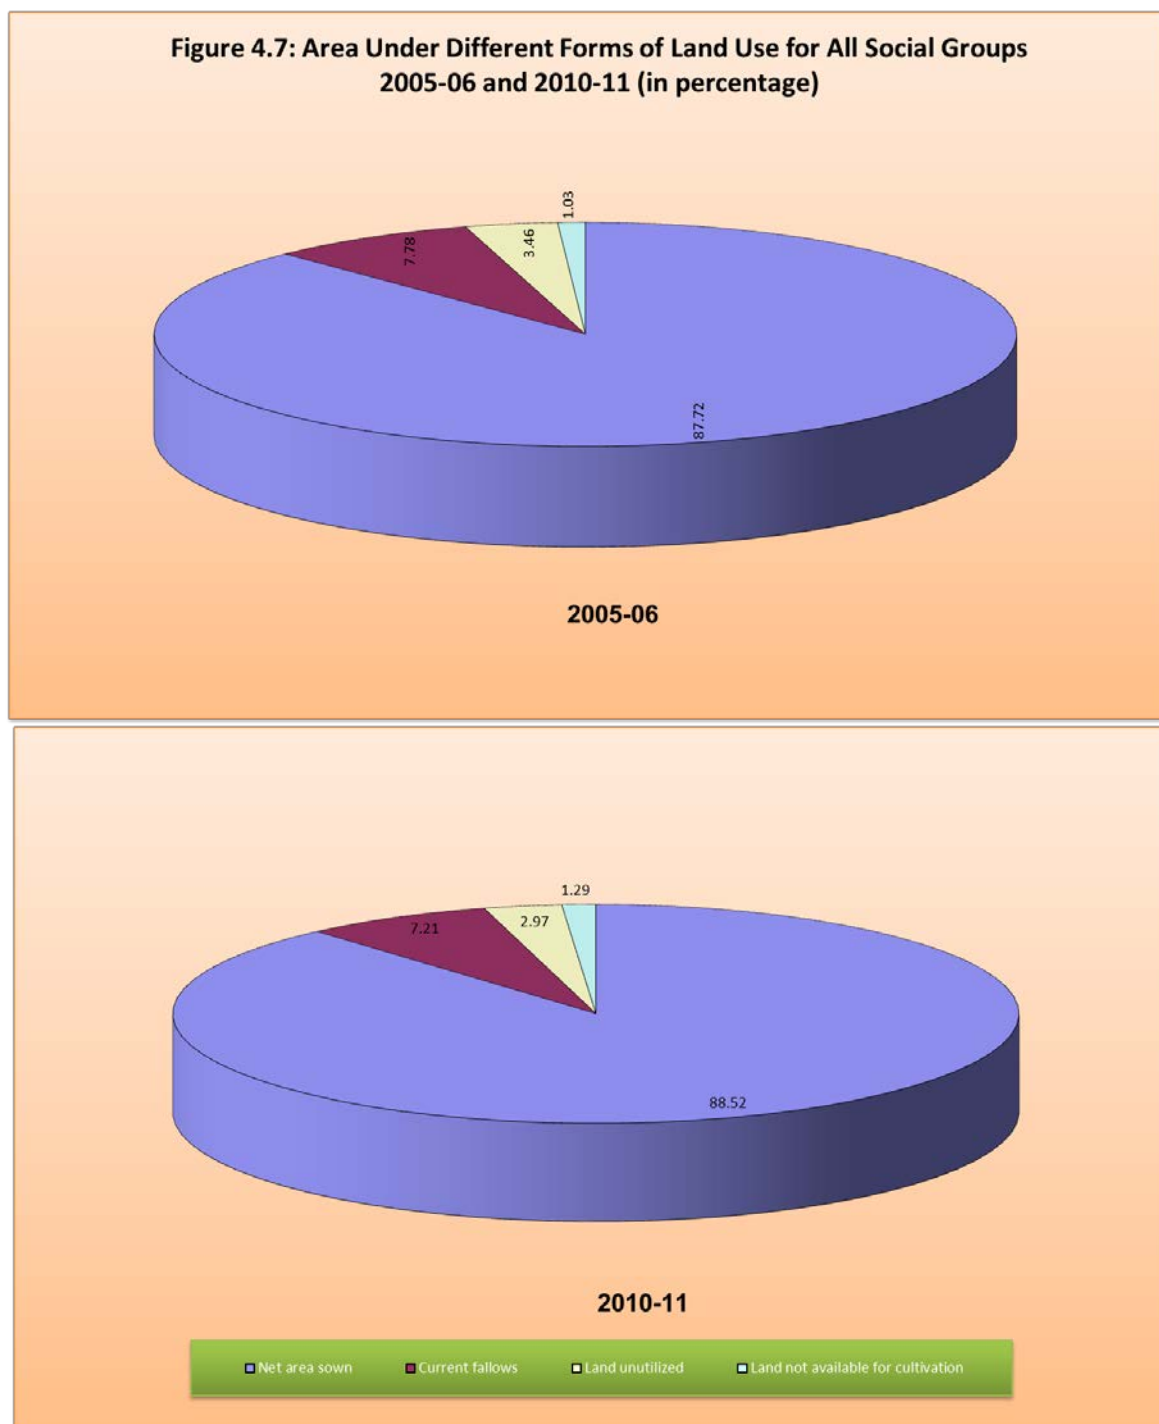

Figure 4.6: Trends of leased-in area in India under Share of Produce by Size Groups for All Social Groups, 1976-77 to 2010-11 (area in '000 ha.)

4.4.2 A graphical comparison of area under different forms of land use between Agriculture Censuses 2010-11 and 2005-06 may be seen in Figure 4.7.

4.4.3 The total operated area has been decreasing gradually after 1990-91 to 2005-06 because of diversion of land for urbanisation; industrialisation or transfer of land to meet the increasing requirement for non-agricultural uses, like, housing projects, infrastructure development etc. However, there is a marginal increase in the operated area from 158.32 million ha. in 2005-06 to 159.59 million ha. in 2010-11 showing an increase of 0.80%. The

operated area has primarily increased in 2010-11 because the State of Jharkhand participated for the first time in Agriculture Census operation in 2010-11 after the State came into being in the year 2000. Further, it is observed that the percentage of net area sown over last three census periods has remained more or less about 88.0 per cent of the operated area. The net cultivated area increased from 89.5 per cent during 1970-71 to 95.7 per cent during 2010-11, whereas land unutilized and land not available for cultivation declined from 7.7 percent to 3.0 percent and 2.8 percent to 1.3 percent respectively during the same period.

(C) Irrigation

4.5 Irrigation Status

4.5.1 The availability of irrigation is reflected by percentage of irrigated area to net area sown, which is given in Table 4.7.

Table 4.7: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for All Social Groups during Agriculture Census 2005-06* and 2010-11.

(Area in '000 ha.)

Sl. No.	Major size classes of holdings	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2005-06	2010-11	2005-06	2010-11	2005-06	2010-11
1	2	3	4	3	4	5	6
1	Marginal	13552	16835	23557	32219	57.53	52.25
2	Small	11403	14263	24314	31976	46.90	44.61
3	Semi-medium	12396	14995	27682	33778	44.78	44.39
4	Medium	11982	13266	26838	29442	44.64	45.06
5	Large	4937	5209	13464	13864	36.67	37.57
	All Size Classes	54270	64567	115855	141279	46.84	45.70

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off.

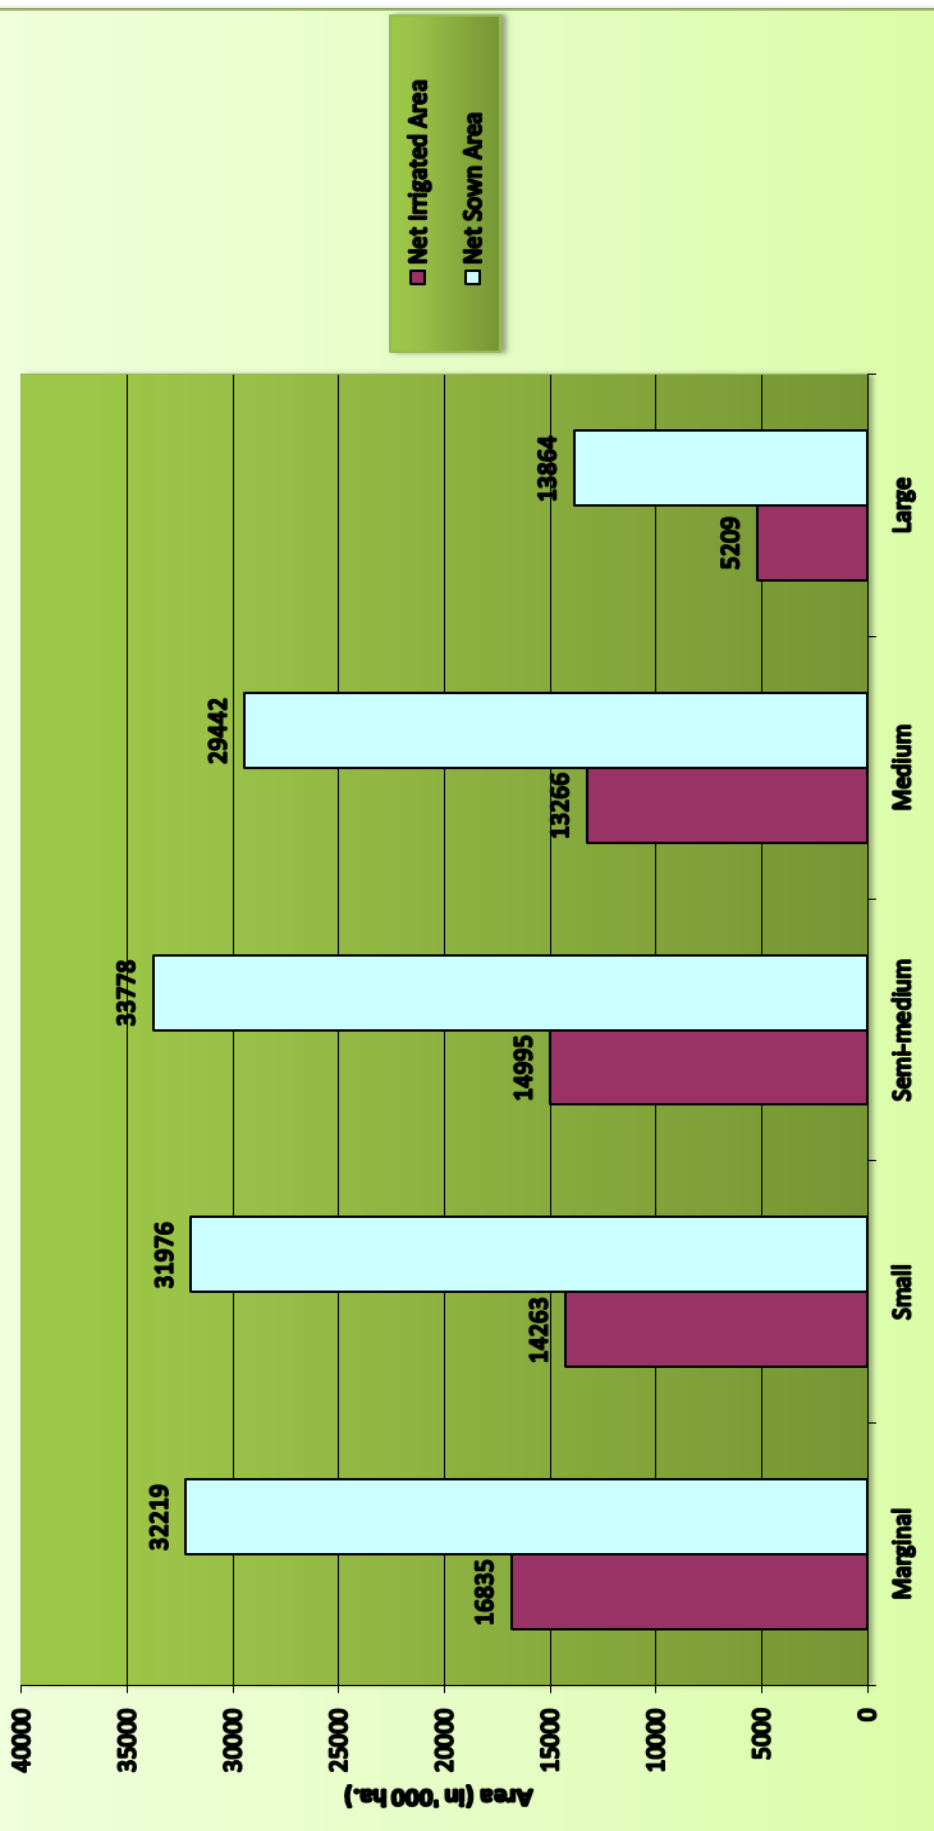

4.5.2 The proportion of irrigated area to net area sown for all categories of holdings was 45.70 percent in 2010-11 as compared to 46.84 percent in 2005-06. The percentage of irrigated area to net area sown has marginally declined in 2010-11 as compared to 2005-06.

4.5.3 The graphical presentations of net irrigated area and net sown area in 2010-11 and percentage of net irrigated area to net sown area since 1970-71 may be seen in Figure 4.8 and Figure 4.9 respectively.

4.6 Source wise Classification of Irrigated Holdings and Net Irrigated Area

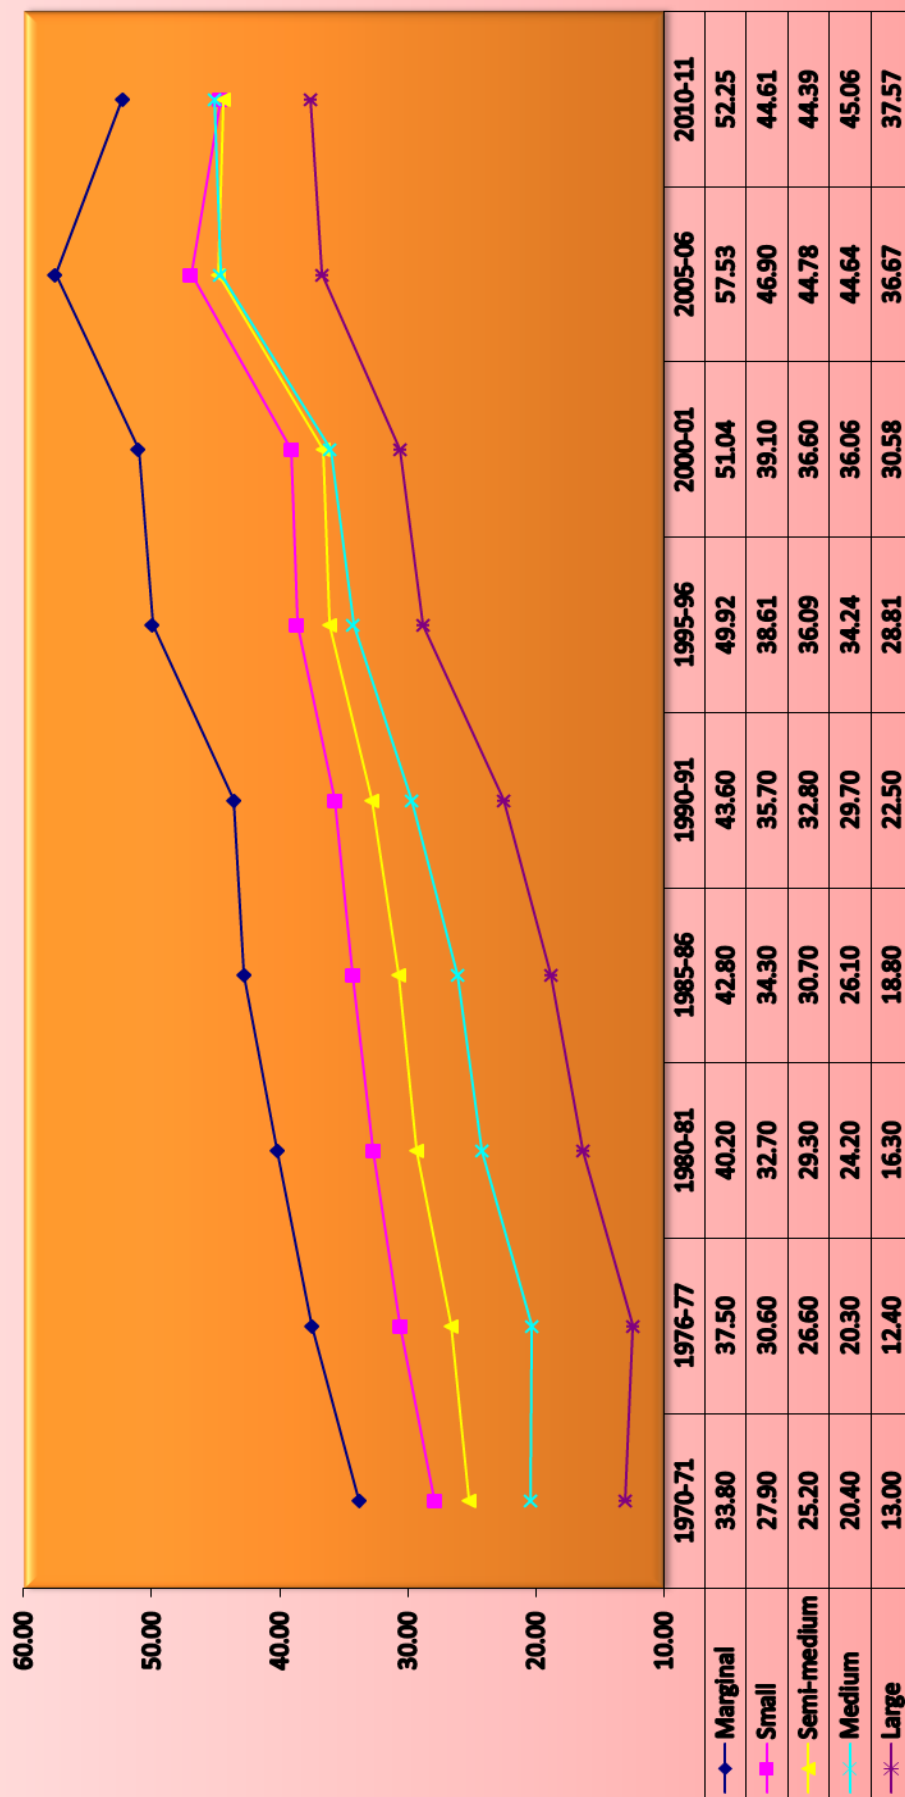

4.6.1 As earlier, this census also has details about net area irrigated by different sources of irrigation like canals, tanks, wells, tube wells and other sources. In case some area is irrigated during the year by more than one source, such area is recorded only against the major source of irrigation. The net area irrigated by different sources of irrigation is added to arrive at net irrigated area. The distribution of source-wise irrigated holdings and net irrigated area for all

Figure 4.8: Net Irrigated and Net Sown Area by Size Groups for All Social Groups, 2010-11

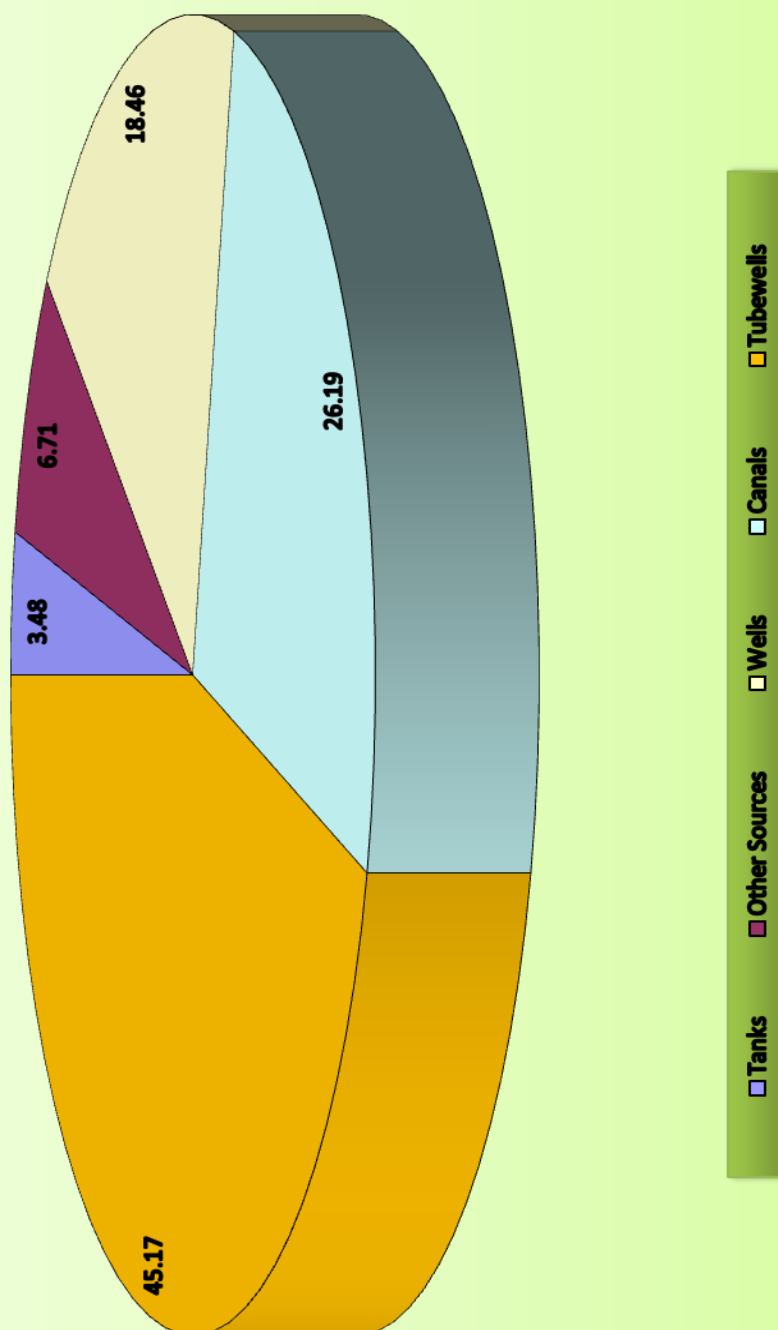

social groups during Agriculture Census 2005-06 and 2010-11 is given in Table 4.8. The

Figure 4.9: Percentage of Net Irrigated Area to Net Sown Area in each Size Groups for All Social Groups, 1970-71 to 2010-11

graphical presentation of proportions of net irrigated area by source of irrigation may be seen

Figure 4.10: Net area irrigated in India by Source of Irrigation for All Social Groups, 2010-11 (in percentage)

in Figure 4.10. During 2010-11, maximum proportion of holdings received irrigation from tube

wells (42.60 percent) followed by canals (24.73 percent), wells (18.94 percent) and tanks (5.61 percent). The remaining sources accounted for 8.12 percent which was more than tanks. Similarly, maximum proportion of area was irrigated by tube wells (45.17 percent) followed by canals (26.19 percent), wells (18.46 percent) and tanks (3.48 percent). The remaining 6.71 percent of area was accounted for by other sources. Thus this pattern of distribution of net irrigated among different sources in 2010-11 was similar to that of reported in the last Agriculture Census 2005-06.

Table 4.8: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for All Social Groups during Agriculture Census, 2005-06* and 2010-11.

(Number in '000)

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2005-06		2010-11	
		Number of holdings**	Net Irrigated Area	Number of holdings**	Net Irrigated Area
1	2	3	4	5	6
1	Canals	15703 (24.68)	14842 (27.35)	18414 (24.73)	16908 (26.19)
2	Tanks	4133 (6.50)	2097 (3.86)	4180 (5.61)	2248 (3.48)
3	Wells	10691 (16.80)	9139 (16.84)	14101 (18.94)	11917 (18.46)
4	Tubewells	24825 (39.02)	23643 (43.57)	31722 (42.60)	29165 (45.17)
5	Other Sources	8268 (13.00)	4548 (8.38)	6046 (8.12)	4329 (6.71)
	All Sources	63619 (100.00)	54270 (100.00)	74464 (100.00)	64567 (100.00)

Note: (1) *excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) ** This includes holdings irrigated by more than one source. However, the respective exclusive number of irrigated holdings was only 55.9 million and 71.7 million during 2005-06 and 2010-11. (4) The figures in brackets are percentages.

4.7 Dispersal of operated Area

4.7.1 A cultivator residing in a village and cultivating some land within the same tehsil/block is called a resident cultivator of that village. A resident cultivator may, therefore, have either (i) entire area of his holdings locating in village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence. The information on such characteristics, i.e. dispersal of number and area of operational holdings for all social groups during 2005-06 and 2010-11 may be seen in the Table 4.9. About 96.95 percent of operational holdings were located within the village of residence against operated area of 96.08 percent during Agriculture Census 2010-11. About 1.53 percent of holdings with operated area of 2.32 percent were located partly within the village and partly outside the village of residence within the same tehsil. About 1.40 percent of holdings and almost equal

proportion of operated area were located entirely outside the village of residence but within Tehsil. Only, 0.13 percent of holdings and 0.18 percent of operated area were accounted for by deemed cultivators i.e. those operational holders who were residing outside Tehsil but operating land in one or more village(s) of the Tehsil.

Table 4.9: Number and area of operational holdings by Dispersal of operated area for All Social Groups, 2005-06* and 2010-11.

(Number in '000)

(Area in '000 ha.)

Sl. No.	Item	Number		Area	
		2005-06	2010-11	2005-06	2010-11
1	2	3	4	5	6
1	Entirely within the village of residence	96448 (95.64)	134125 (96.95)	124769 (94.47)	153329 (96.08)
2	Partly within the village & partly outside the village(s) of residence within the same tehsil	2474 (2.45)	2110 (1.53)	4643 (3.52)	3701 (2.32)
3	Entirely outside the village of residence but within the same tehsil	1808 (1.79)	1930 (1.40)	2421 (1.83)	2275 (1.43)
4	Operational holder residing outside the tehsil	120 (0.12)	183 (0.13)	234 (0.18)	287 (0.18)
5	Total	100849 (100.00)	138348 (100.00)	132067 (100.00)	159592 (100.00)

Note: (1) *excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets indicate percentages.

(D) Cropping Pattern, Cropping Intensity and Irrigation Intensity

4.8 Area under Principal Crops

4.8.1 The details of area under principal crops, both irrigated and un-irrigated for all social groups, in 2010-11 is given in Table 4.10.

Table 4.10: Area under Principal Crops for All Social Groups, 2005-06* and 2010-11.

(Area in '000 ha.)

17	Fibres	3299 (4.50)	3450 (3.93)	4082 (5.15)	8543 (8.06)	7381 (4.84)	11993 (6.19)
18	Fodder Crops	1414 (1.93)	1528 (1.74)	2955 (3.73)	4610 (4.35)	4369 (2.86)	6137 (3.17)
19	Other non-food crops	675 (0.92)	879 (1.00)	1990 (2.51)	1993 (1.88)	2665 (1.75)	2872 (1.48)
20	All non-food crops (16+17+18+19)	12988 (17.70)	13475 (15.35)	23825 (30.07)	32390 (30.56)	36813 (24.12)	45865 (23.67)
21	Gross Cropped Area (15+20)	73377 (100.00)	87768 (100.00)	79232 (100.00)	105992 (100.00)	152609 (100.00)	193759 (100.00)
22	Net Area Sown	54270 (73.96)	64567 (73.57)	61586 (77.73)	76711 (72.37)	115855 (75.92)	141279 (72.91)
23	Intensity of Cropping(21/22)	1.3521	1.3593	-	-	1.3172	1.3715

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets indicate percentages to Gross Cropped Area.

4.8.2 During 2010-11, gross cropped area was estimated at 193.76 million hectares while net sown area was at 141.28 million hectares. Thus the cropping intensity during 2010-11 stood at 1.3715 against 1.3172 in 2005-06. The irrigation intensity which is the ratio of gross irrigated area to net irrigated area worked out to 1.3593 in 2010-11 against 1.3521 in 2005-06.

4.8.3 As per table 4.10, cereals formed 57.0 percent of gross cropped area in 2010-11 while 'all food crops' consisting of cereals, pulses, sugarcane, spices, fruits & vegetables, accounted for 76.33 percent. The remaining gross cropped area was accounted for by non-food crops, like, oilseeds, fibres, fodder crops and other non-food crops. Among non-food crops, oilseeds had the highest contribution of 12.8 percent followed by fibres (6.2 percent).

CHAPTER 5

AGRICULTURE CENSUS RESULTS- ALL INDIA SCHEDULED CASTES AND SCHEDULED TRIBES

(A) OPERATIONAL HOLDINGS

5.1 Distribution of Operational Holdings

5.1.1 The information on characteristics of agricultural operational holdings of Scheduled Castes and Scheduled Tribes was collected separately for the first time during Agriculture Census, 1980-81 to facilitate policy decisions for welfare of these social groups. The number of operational holdings and area operated by various social groups in 2005-06 and 2010-11 are presented in Table 5.1. The graphical presentation may be seen in Figure 5.1 and Figure 5.2 respectively.

Table 5.1: Number of Operational Holdings and Area Operated by Social Groups, 2005-06 and 2010-11

Sl. No.	Social Groups	Number of Holdings (in '000)		Area Operated (in '000 ha.)	
		2005-06*	2010-11	2005-06*	2010-11
1	2	3	4	5	6
1	Scheduled Castes	16073 (12.44)	17099 (12.36)	13300 (8.40)	13721 (8.60)
2	Scheduled Tribes	10343 (8.00)	12005 (8.68)	16929 (10.69)	18221 (11.42)
3	Others	102550 (79.36)	109006 (78.79)	126399 (79.84)	126108 (79.02)
4	Institutional	256 (0.20)	239 (0.17)	1694 (1.07)	1542 (0.97)
5	All Social Groups	129222 (100.00)	138348 (100.00)	158323 (100.00)	159592 (100.00)

Note: (1) *excluding Jharkhand. (2) Figures in brackets indicate percentages.

5.1.2 The holdings operated by Scheduled Castes accounted for 12.36 percent of the total number of holdings in the country in 2010-11 as against 12.44 percent in 2005-06. The proportion of operated area to the total operated area in the country for this social group remained almost static over 8.0 percent during 2005-06 and 2010-11. Scheduled Tribes holdings formed 8.68 percent of total holdings in 2010-11 against 8.00 percent in 2005-06. The operated area held by Scheduled Tribes has also increased from 10.69 percent in 2005-06 to 11.42 percent in 2010-11. In the case of 'Other' Social Group, the proportions of number of holdings in 2010-11 and 2005-06 stood at 78.79 percent and 79.36 percent respectively. The share of operated area of 'Other' Social Group was 79.02 percent in 2010-11 against 79.84 percent in 2005-06.

Figure 5.1: Number of Operational Holdings in India by Social Groups, 2010-11 (in percentage)

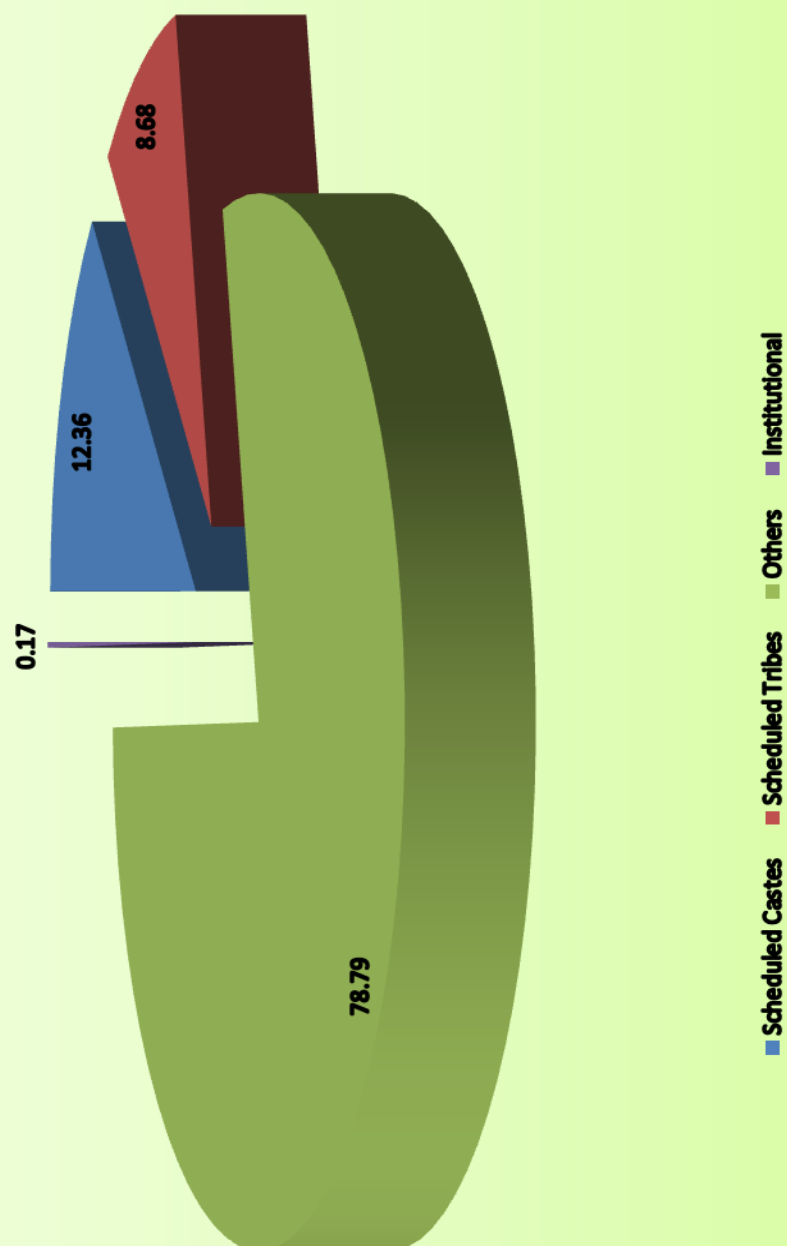

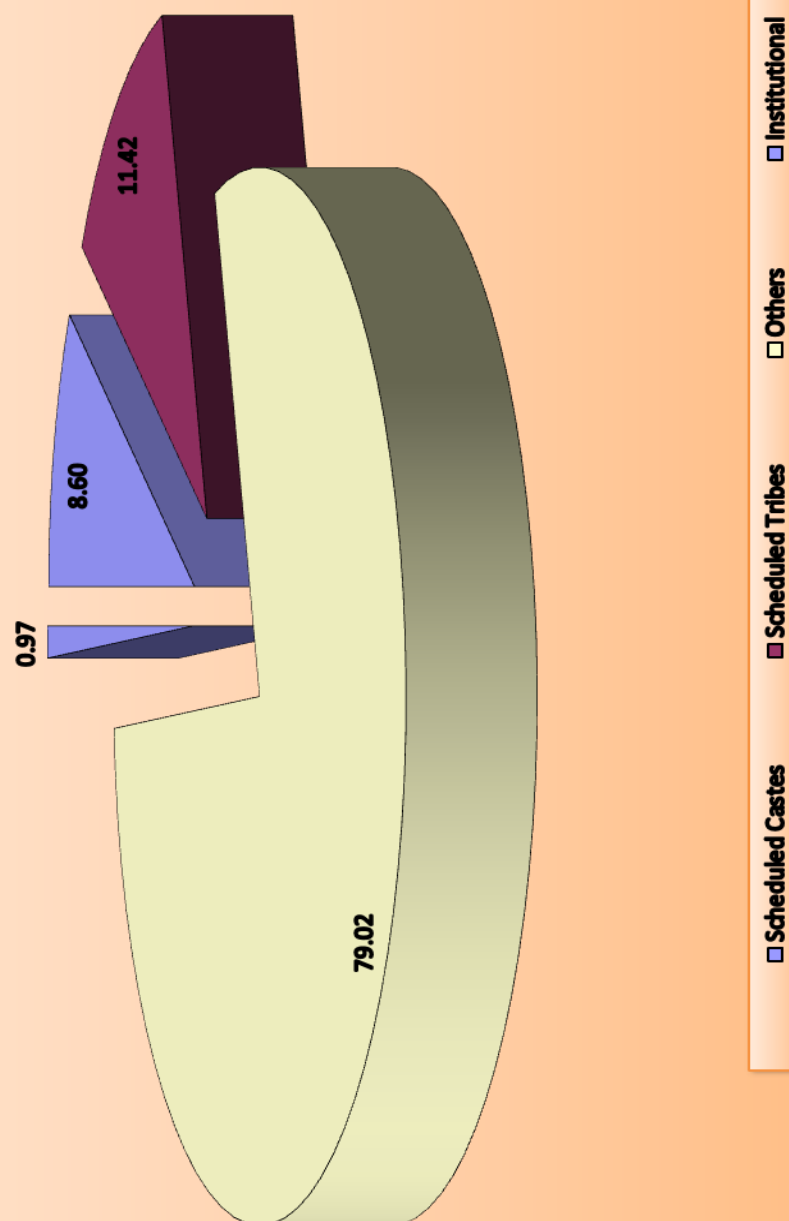

Figure 5.2: Area operated by holdings in India by Social Groups, 2010-11 (in percentage)

5.1.3 The number and area of operational holdings and average size per holding by size-classes and gender, and their percentage distribution in Agriculture Censuses 2010-11 and 2005-06 for holdings of Scheduled Castes may be seen in Table 5.2 and Table 5.3 respectively with graphical presentation in Figure 5.3, Figure 5.4 and Figure 5.5 respectively.

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2005-06.

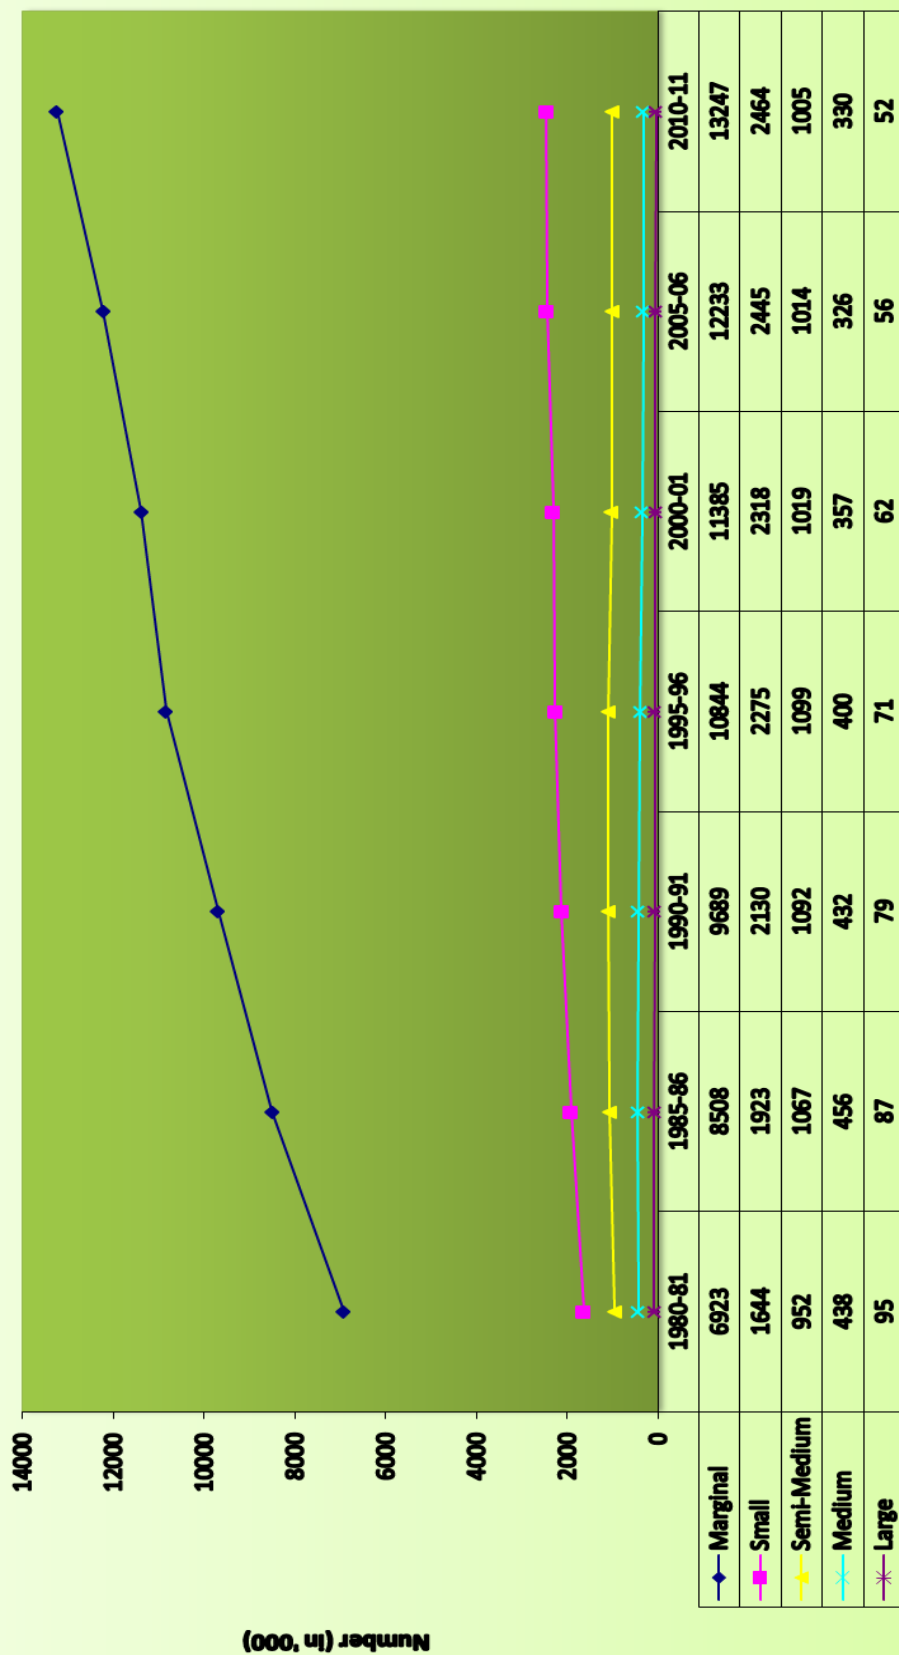

5.1.4 In a total of 17.10 million holdings belonging to Scheduled Caste in 2010-11, male operational holdings accounted for 87.73 percent while females 12.27 percent against 89.14 percent and 10.86 percent respectively in 2005-06. Thus the shares of holdings operated by females were quite low as compared to that of male operational holdings. It is noteworthy, however, that representation of holdings belonging to females has increased from 10.86 percent in 2005-06 to 12.27 percent in 2010-11.

5.1.5 Area operated by female holders accounted for 10.42 percent in 2010-11 against 9.08 percent in 2005-06.

5.1.6 The average operated area by Scheduled Caste holders in Agriculture Census 2010-11 was 0.80 hectare against 0.83 hectare in 2005-06. The average operated area for male and female operational holdings in 2010-11 was 0.82 hectare and 0.68 hectare respectively as compared to 0.84 hectare and 0.69 hectare in 2005-06.

5.1.7 Out of a total of 17.10 million of operational holdings of Scheduled Castes in 2010-11, marginal holdings constituted (77.5 percent), small (14.4 percent), semi-medium (5.9 percent), medium (1.9 percent) and large (0.3 percent). It can be seen that percentage of

Figure 5.3: Number of Operational Holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2010-11 (in '000)

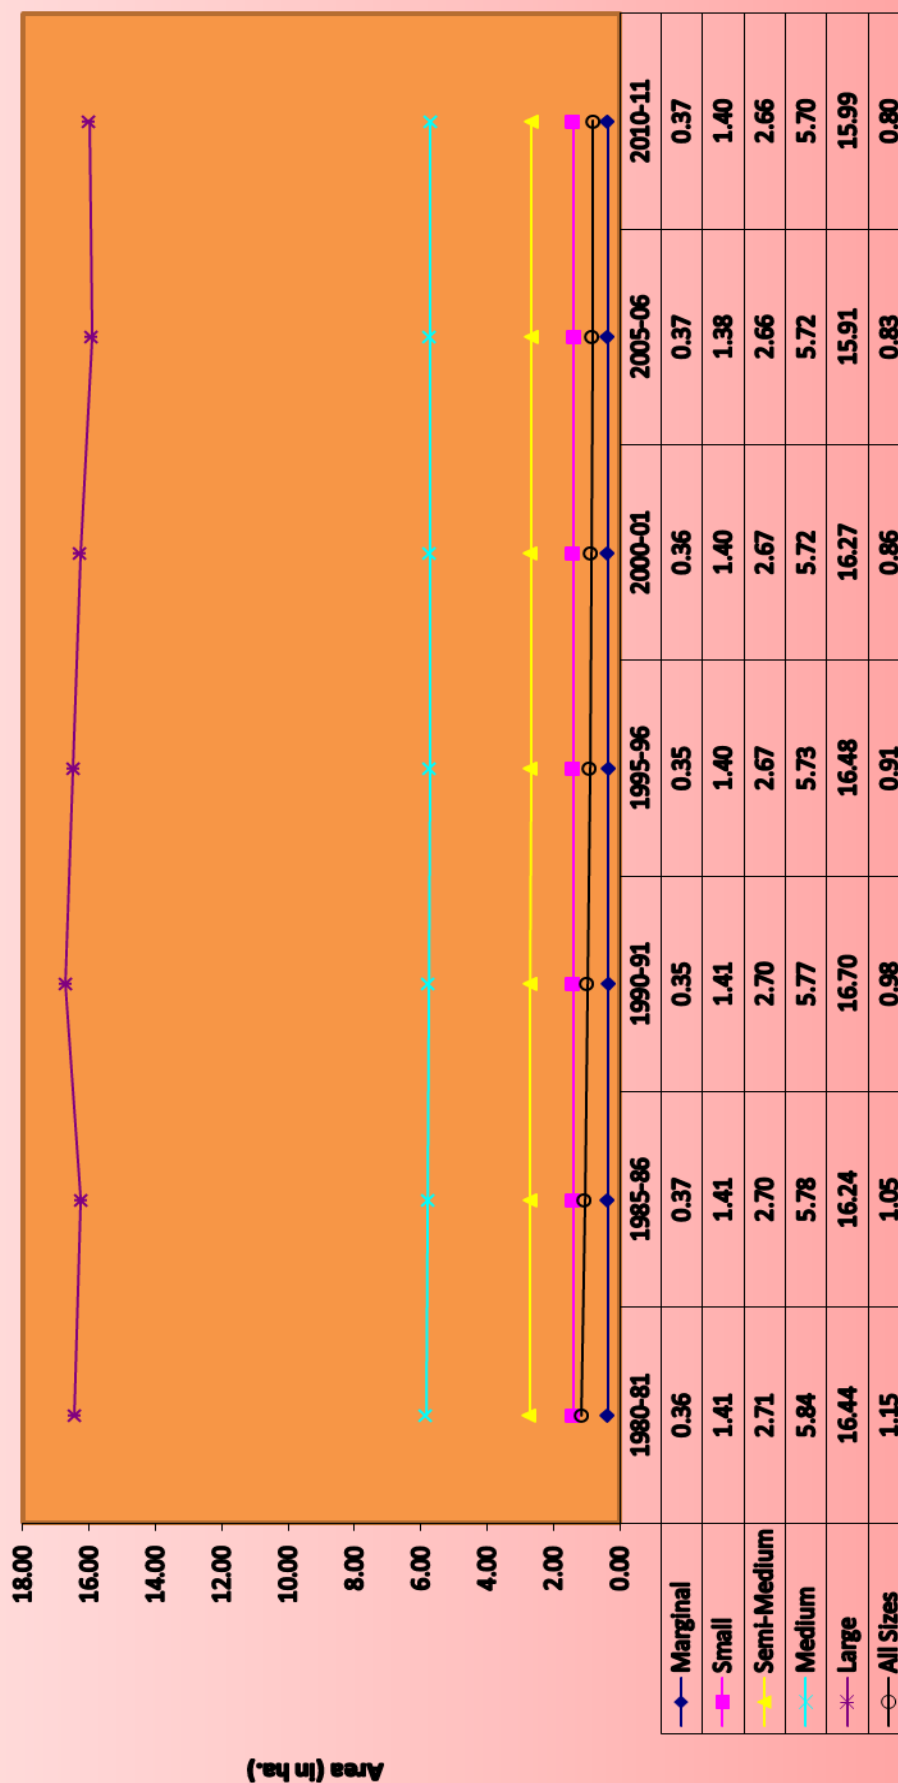

operational holdings decreased with the increase in size of holdings (Table 5.3) and bulk of operational holdings belonged to marginal and small categories i.e. 91.9 percent together.

Figure 5.4: Area operated by holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2010-11 (area in '000 ha.)

Figure 5.5: Average Size of land holdings in India by Size Groups for Scheduled Castes, 1980-81 to 2010-11 (area in ha.)

5.1.8 Out of a total of 13.72 million hectares of area operated by Scheduled Castes, over 1/3rd i.e. 35.5 percent belonged to the marginal category, as against their representation of 77.5 percent in number of holdings in that category (marginal). The percentages of operated area belonging to small, semi-medium, medium and large holdings were 25.2, 19.5, 13.7 and 6.1 respectively.

5.1.9 The number and area of operational holdings and average size per holding by size-classes and gender, and their percentage distribution in Agriculture Censuses 2010-11 and 2005-06 for holdings of Scheduled Tribes may be seen in Table 5.4 and Table 5.5 respectively. The graphical presentation of number of holdings, area operated and average size of land holdings may be seen in Figure 5.6, Figure 5.7 and Figure 5.8 respectively.

Table 5.4: Number of operational holdings, area operated and average size per holding by size-classes and gender for Scheduled Tribes during Agriculture Census 2010-11

	Large	0.96 (1.12)	0.62 (0.77)	0.92 (1.08)	9.93 (11.06)	7.38 (8.15)	9.68 (10.81)
11	All Classes	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2005-06.

5.1.10 As per Table 5.4, out of 12.01 million Scheduled Tribes operational holdings in 2010-11, males accounted for 88.7 percent and females constituted 11.3 percent. Thus, the percentage of female operational holdings was very low as compared to male operational holdings for Scheduled Tribes. However, the representation of holdings belonging to females increased from 9.6 percent in 2005-06 to 11.3 percent in 2010-11.

5.1.11 The area operated by Scheduled Tribes which was 16.93 million hectares in 2005-06 rose to 18.22 million hectares in 2010-11, showing an increase of 7.63 percent because of participation of Jharkhand State in Agriculture Census operation in 2010-11 for the first time since its creation in the year 2000. The area operated by females accounted for 10.0 percent in

2010-11 while the same was 90.0 percent for male holders against the corresponding figures of 8.5 percent and 91.5 percent in 2005-06.

5.1.12 The average operated area in 2010-11 was 1.52 hectares against 1.64 hectares in 2005-06 while for male and female operational holdings, it was 1.54 hectares and 1.34 hectares as compared to 1.66 hectares and 1.45 hectares respectively in 2005-06, indicating a decline in average operated area of both male and female operational holdings in 2010-11 as compared to 2005-06.

5.1.13 It may be seen from Table 5.5 that out of a total of 12.01 million Scheduled Tribes operational holdings in 2010-11, marginal holdings accounted for (53.9 percent) followed by small (24.0 percent), semi-medium (14.9 percent), medium (6.3 percent) and large (0.9 percent). The number of operational holdings, thus, decreased with the increase in the size of holdings.

5.1.14 Out of a total of 18.22 million hectares of operated area in 2010-11, about 40.0 percent was held by marginal and small holdings, against their representation of 78.0 percent in total number of operational holdings of Scheduled Tribes.

5.2 Tenancy of operational holdings

5.2.1 The distribution of number of operational holdings and area operated by Scheduled Castes in India by tenancy status for major size classes, 2010-11 is given in Table 5.6 and Table 5.7 respectively.

Table 5.6: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Castes, 2010-11

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self-operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7

5	Large	836 (100.00)	814 (97.42)	4 (0.43)	Neg (0.03)	18 (2.12)
All Size Classes		13721 (100.00)	13063 (95.20)	136 (0.99)	19 (0.14)	503 (3.67)

Note: (1) Figures in brackets indicate percentages to total operated area. (2) Neg - Negligible (i.e. less than 500 ha.).

5.2.2 The distribution of number of operational holdings and area operated by Scheduled Tribes by Tenancy status for major size classes, 2010-11 may be seen in Table 5.8 and Table 5.9 respectively.

Table 5.8: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Tribes, 2010-11

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self-operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	6470 (100.00)	6114 (94.49)	59 (0.92)	64 (0.99)	233 (3.60)
2	Small	2877 (100.00)	2743 (95.33)	8 (0.28)	11 (0.38)	115 (4.01)
3	Semi-medium	1787 (100.00)	1724 (96.46)	3 (0.18)	5 (0.27)	55 (3.09)
4	Medium	760 (100.00)	747 (98.35)	1 (0.07)	1 (0.09)	11 (1.49)
5	Large	111 (100.00)	110 (99.18)	Neg (0.11)	Neg (0.01)	1 (0.70)
All Size Classes		12005 (100.00)	11438 (95.28)	71 (0.59)	81 (0.67)	415 (3.46)

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Neg - Negligible (i.e. less than 500).

Table 5.9: Distribution of Area Operated by Tenancy status in each Major Size Classes for Scheduled Tribes, 2010-11

(Area in '000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self-operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	3144 (100.00)	2930 (93.20)	30 (0.95)	28 (0.89)	156 (4.95)
2	Small	4119 (100.00)	3909 (94.90)	12 (0.30)	16 (0.38)	182 (4.41)
3	Semi-medium	4831 (100.00)	4655 (96.36)	9 (0.18)	12 (0.26)	155 (3.20)
4	Medium	4363 (100.00)	4294 (98.41)	3 (0.07)	4 (0.08)	62 (1.43)
5	Large	1763 (100.00)	1749 (99.20)	2 (0.10)	Neg (0.01)	12 (0.68)
All Size Classes		18221 (100.00)	17538 (96.25)	56 (0.31)	60 (0.33)	567 (3.11)

Note: (1) Figures in brackets indicate percentages to total operated area. (2) Neg - Negligible (i.e. less than 500 ha.).

5.2.3 In case of Scheduled Castes, wholly owned and self-operated holdings accounted for about 95.6 percent in term of number with almost same percentage of area (95.2 percent). The wholly leased-in operational holdings had a proportion of 1.1 percent covering 1.0 percent of area. The wholly otherwise operational holdings were 0.18 percent having an operated area of 0.14 percent. The remaining four types of operational holdings, categorized under 'Others', were to the extent of 3.1 percent of the total Scheduled Castes holdings operating an area of about 3.7 percent.

5.2.4 Among holdings of Scheduled Tribes, 95.3 percent of number of operational holdings were wholly owned and self-operated accounting for an area of 96.3 percent. The wholly leased-in holdings accounted for 0.6 percent operating an area of 0.3 percent. The wholly otherwise operational holdings accounted for 0.67 percent with corresponding area of 0.33 percent while 'Others' accounted for 3.5 percent with an area of 3.1 percent. This indicates that over 95 percent of the holdings in 2010-11 were owned and self-operated in the case of both Scheduled Castes and Scheduled Tribes.

5.3 Terms of Leasing

5.3.1 The distribution of area leased-in by terms of leasing in major size classes of holdings of Scheduled Castes and Scheduled Tribes in 2010-11 may be seen in Table 5.10 and Table 5.11 respectively. The graphical presentation of leased-in area by different terms of leasing may also be seen for these social groups in Figure 5.9 and Figure 5.10 respectively.

Table 5.10: Distribution of leased-in area by Terms of leasing in Major Size Classes for Scheduled Castes, 2010-11

(Area in '000 ha.)

Sl. No.	Major size classes	Area leased-in for					Total
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms

2010-11 (All Size Classes)		78 (24.49)	38 (11.85)	196 (61.86)	3 (0.82)	3 (0.98)	317 (100.00)
2005-06* (All Size Classes)		32 (12.25)	24 (9.04)	199 (75.16)	4 (1.34)	6 (2.21)	264 (100.00)

Note: (1) Figures in brackets are percentages to total leased-in area within each category. (2) # excluding Bihar, Jharkhand and Maharashtra.

Table 5.11: Distribution of leased-in area by Terms of leasing in Major Size Classes for Scheduled Tribes, 2010-11

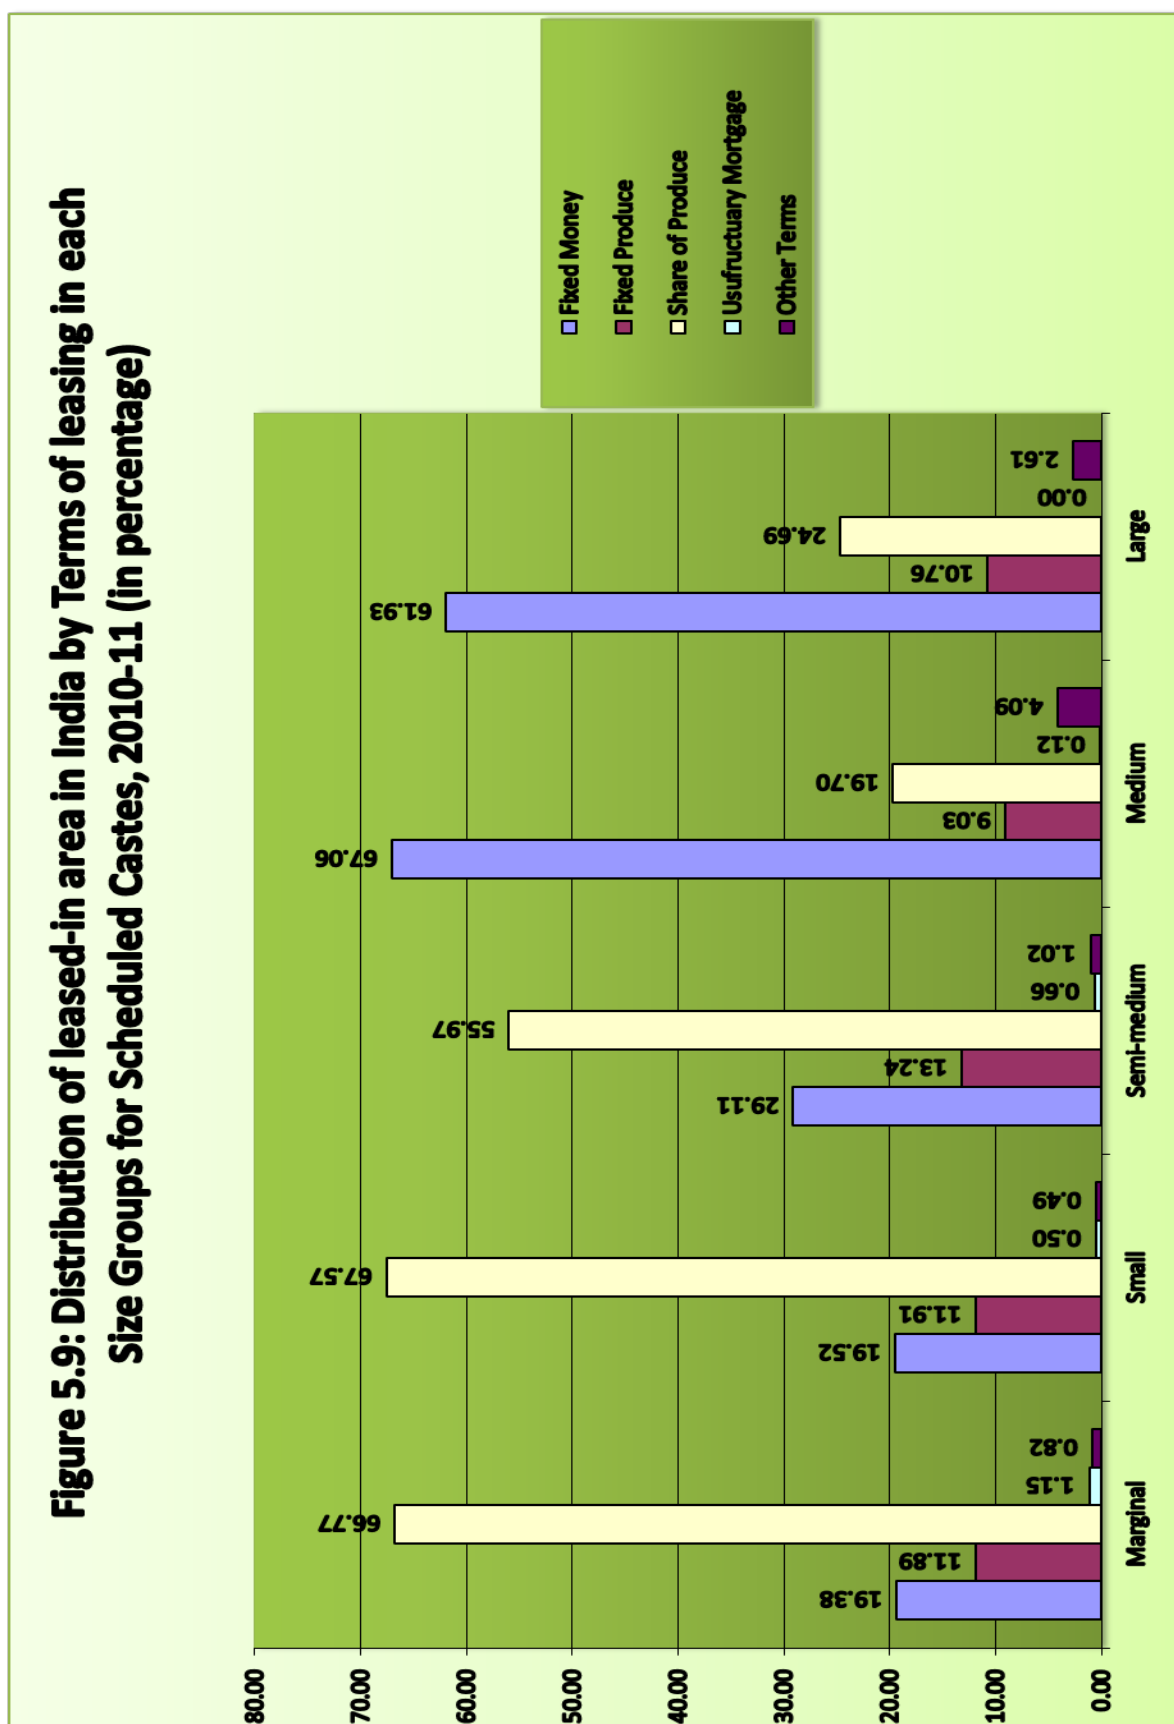

(Area in '000 ha.)

Sl. No.	Major size classes	Area leased-in for					Total
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms	
1	2	3	4	5	6	7	8
1	Marginal	15 (21.53)	10 (14.46)	41 (60.76)	1 (1.91)	1 (1.35)	67 (100.00)
2	Small	7 (17.53)	7 (17.46)	26 (61.20)	1 (2.41)	1 (1.40)	42 (100.00)
3	Semi-medium	5 (23.39)	4 (19.58)	11 (50.81)	1 (2.92)	1 (3.29)	22 (100.00)
4	Medium	3 (39.47)	1 (15.08)	2 (29.55)	Neg (4.34)	1 (11.56)	7 (100.00)
5	Large	1 (27.63)	Neg (12.36)	1 (54.31)	Neg (0.00)	Neg (5.70)	2 (100.00)
2010-11 (All Size Classes)		31 (21.66)	23 (16.15)	82 (57.60)	3 (2.31)	3 (2.28)	142 (100.00)
2005-06* (All Size Classes)		15 (13.65)	16 (14.99)	67 (61.52)	4 (3.83)	7 (6.01)	109 (100.00)

Note: (1) Figures in brackets are percentages to total leased-in area within each category. and (2) # excluding Bihar, Jharkhand and Maharashtra.

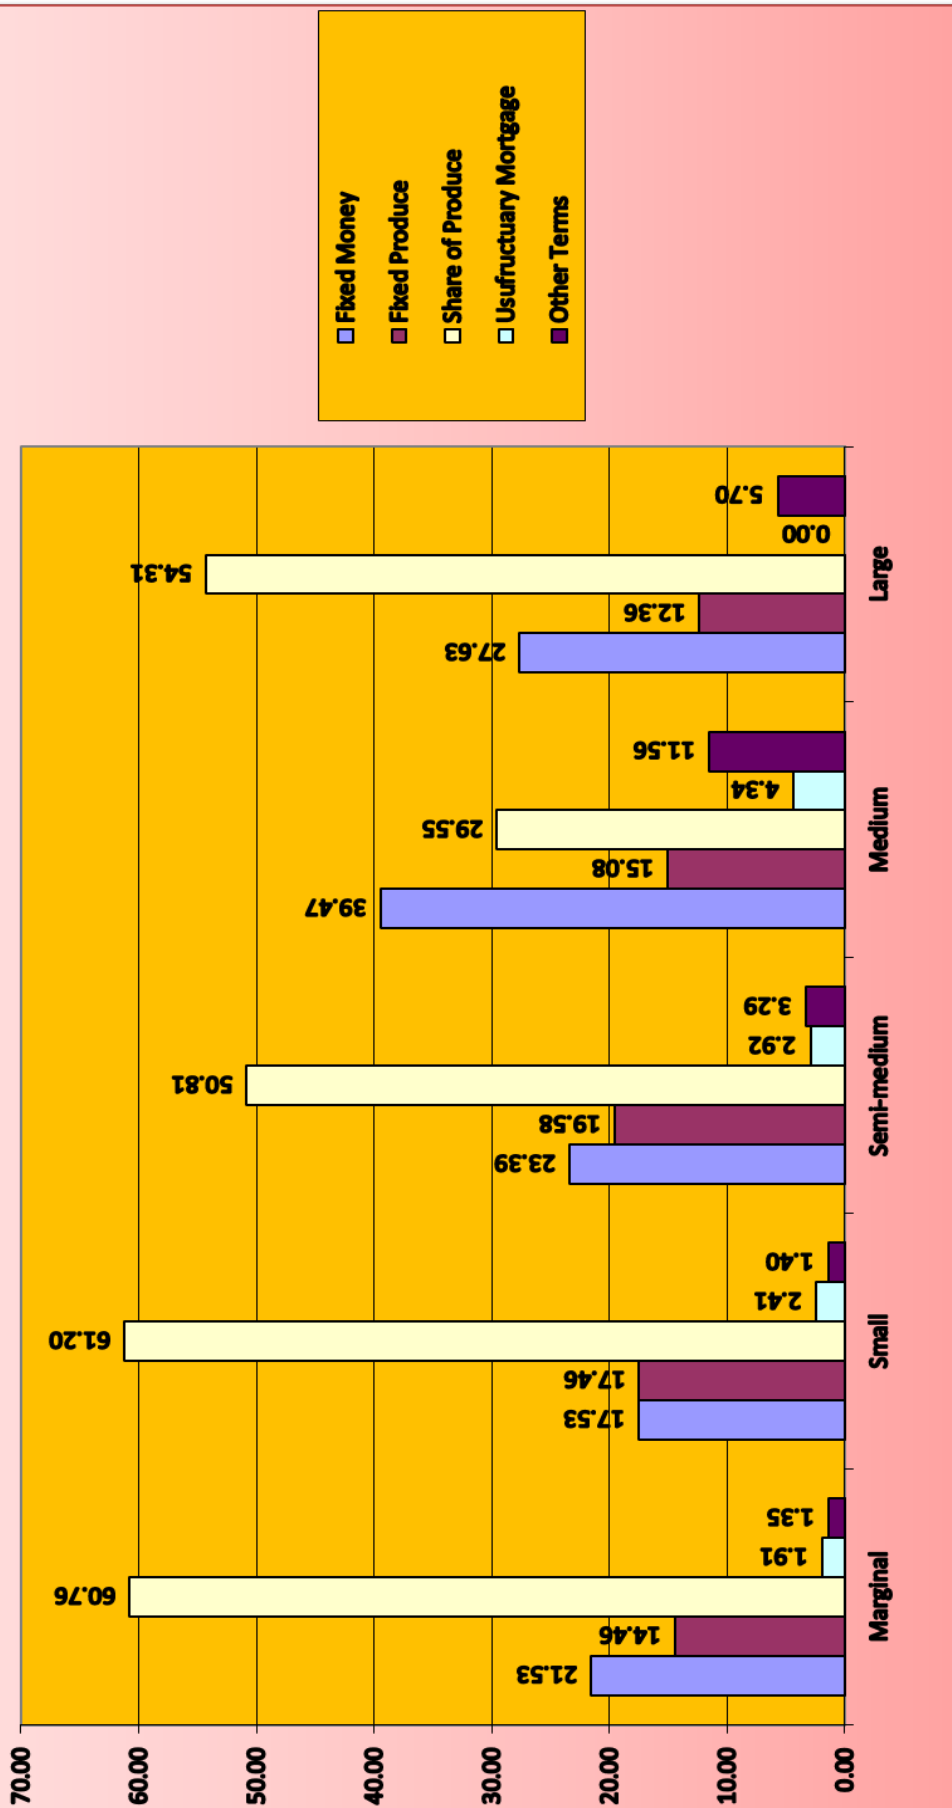

5.3.2 The distribution of leased-in area according to different terms of leasing in 2010-11 showed that the highest proportion was accounted for by 'share of produce' both in case of holdings of Scheduled Castes (61.9 percent) and Scheduled Tribes (57.6 percent). This was followed by fixed money (24.5 percent), fixed produce (11.9 percent), 'other terms' (1.0 percent) and usufructuary mortgage (0.8 percent) in the case of Scheduled Castes holdings. For holdings of Scheduled Tribes, share of produce was followed by fixed money (21.7 percent),

fixed produce (16.2 percent), usufructuary mortgage (2.31 percent) and 'other terms' (2.8

percent).

Figure 5.10: Distribution of leased-in area in India by Terms of leasing in each Size Groups for Scheduled Tribes, 2010-11 (in percentage)

(B) Land Use

5.4 Land Utilisation

5.4.1 The distributions of area under different land uses in all size classes for holdings of Scheduled Castes and Scheduled Tribes in 2005-06 and 2010-11 are given in Table 5.12.

Table 5.12: Area under Main Land Uses to the Total Operated Area for Scheduled Castes and Scheduled Tribes, 2005-06 and 2010-11

(Area in '000 ha.)

Sl. No.	Particulars	Area under							
		Land not available for cultivation		Net cultivated area*		Land unutilized**		Total Area	
		2005-06 [#]	2010-11	2005-06 [#]	2010-11	2005-06 [#]	2010-11	2005-06 [#]	2010-11
1	2	3	4	5	6	7	8	9	10
1	All Size Classes - Scheduled Castes	100 (0.86)	131 (0.95)	11046 (95.93)	13263 (96.67)	369 (3.21)	327 (2.38)	11515 (100.00)	13721 (100.00)
2	All Size Classes - Scheduled Tribes	318 (2.08)	445 (2.44)	13814 (90.28)	16503 (90.57)	1170 (7.65)	1273 (6.99)	15301 (100.00)	18221 (100.00)

Note: (1) Figures in brackets are percentages. (2) * Net cultivated area is net area sown plus area under current fallow. (3) ** Land unutilized is fallow land other than current fallow plus culturable waste lands plus other uncultivated land. (4) [#] excluding Bihar, Jharkhand and Maharashtra.

5.4.2 The proportion of net cultivated area to total operated area in case of Scheduled Castes holdings had increased from 95.9 percent during 2005-06 to 96.7 percent during 2010-11. The proportion of land not available for cultivation increased from 0.9 percent in 2005-06 to 1.0 percent in 2010-11. The component of land unutilized decreased from 3.2 percent in 2005-06 to 2.4 percent in 2010-11.

5.4.3 The net cultivated area for Scheduled Tribes holdings, as a percentage of total operated area marginally increased from 90.3 percent during 2005-06 to 90.6 percent during 2010-11. The land not available for cultivation formed 2.4 percent of the total operated area whereas the land unutilized was 7.0 percent during Agriculture Census 2010-11.

(C) IRRIGATION

5.5 Irrigation Status

5.5.1 The distribution of net irrigated area and net sown area for holdings of Scheduled Castes and Scheduled Tribes by major size classes in 2005-06 and 2010-11 may be seen in Table 5.13 and Table 5.14 respectively. The graphical presentations of percentage of net irrigated area to net sown area in 2005-06 and 2010-11 for major size-groups are given in respective Figure 5.11 and Figure 5.12 separately for these social groups.

Figure 5.11: Percentage of Net Irrigated Area to Net Sown Area for Major Size Groups of Scheduled Castes, 2005-06 and 2010-11

Figure 5.12: Percentage of Net Irrigated Area to Net Sown Area for Major Size Groups of Scheduled Tribes, 2005-06 and 2010-11

Table 5.13: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Castes during Agriculture Census 2005-06* and 2010-11

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2005-06	2010-11	2005-06	2010-11	2005-06	2010-11

4	Medium	481	597	1399	1641	34.37	36.41
5	Large	111	159	612	695	18.15	22.85
	All Size Classes	4557	5539	10076	12214	45.23	45.35

Note: (1) * excluding Bihar, Jharkhand and Maharashtra.

Table 5.14: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Tribes during Agriculture Census 2005-06* and 2010-11

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2005-06	2010-11	2005-06	2010-11	2005-06	2010-11
1	2	3	4	5	6	7	8
1	Marginal	479	696	2069	2746	23.13	25.34
2	Small	603	876	2994	3626	20.15	24.17
3	Semi-medium	703	962	3589	4071	19.59	23.64
4	Medium	634	741	3181	3262	19.93	22.70
5	Large	175	196	1020	1065	17.15	18.39
	All Size Classes	2594	3471	12853	14770	20.18	23.50

Note: (1) * excluding Bihar, Jharkhand and Maharashtra.

5.5.2 In all size classes of holdings, the percentage of net irrigated area to net sown area was much higher in the case of Scheduled Castes (45.4 percent) as compared to Scheduled Tribes (23.5 percent) in 2010-11. The similar pattern prevailed during Agriculture Census 2005-06 also. As such very large proportion of Scheduled Tribes holdings were un-irrigated. There was, thus, marginal improved irrigation for holdings of Scheduled Castes whereas there was an increase of more than 3.0 percent in case of holdings of Scheduled Tribes between 2005-6 and 2010-11.

5.6 Source-wise Irrigated Holdings and Net Irrigated Area

5.6.1 The distribution of holdings received irrigation and area irrigated by different sources of irrigation for holdings of Scheduled Castes in 2005-06 and 2010-11 may be seen in Table 5.15. The graphical presentation in respect of net area irrigated by sources during 2010-11 is given in Figure 5.13.

Figure 5.13: Net area irrigated in India by Source of Irrigation of Scheduled Castes, 2010-11 (in percentage)

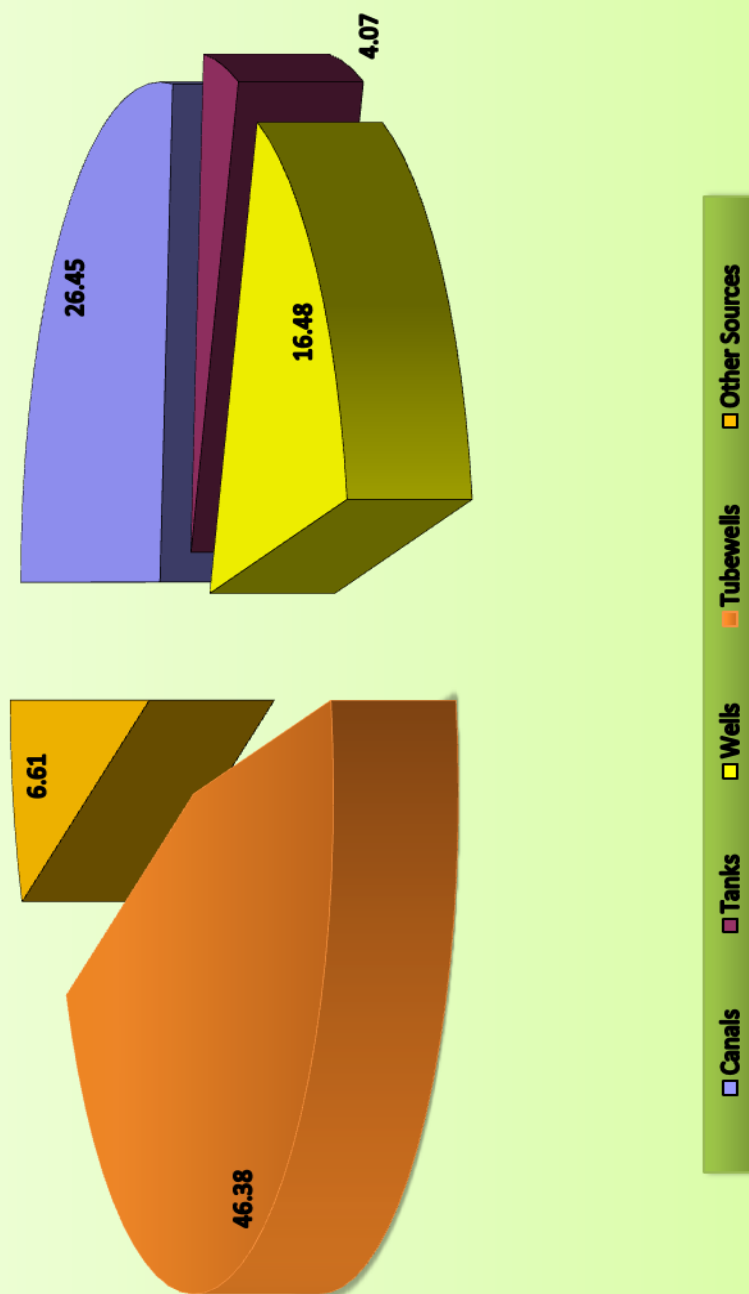

Figure 5.14: Net area irrigated in India by Source of Irrigation of Scheduled Tribes, 2010-11 (in percentage)

Table 5.15: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for Scheduled Castes during Agriculture Census, 2005-06 and 2010-11

(Number in '000)

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2005-06 [§]		2010-11	
		Number of holdings*	Net Irrigated Area	Number of holdings*	Net Irrigated Area
1	2	3	4	5	6
1	Canals	2252 (26.31)	1318 (28.92)	2502 (26.31)	1465 (26.45)
2	Tanks	597 (6.97)	226 (4.96)	563 (5.92)	225 (4.07)
3	Wells	1057 (12.35)	674 (14.79)	1307 (13.74)	913 (16.48)
4	Tubewells	3515 (41.07)	1906 (41.81)	4414 (46.43)	2569 (46.38)
5	Other Sources	1138 (13.29)	433 (9.51)	722 (7.59)	366 (6.61)
	All Sources	8559 (100.00)	4557 (100.00)	9508 (100.00)	5539 (100.00)

Note: (1) * This includes holdings irrigated by more than one source. However, the respective exclusive number of irrigated holdings was only 7552 thousand and 9221 thousand during 2005-06 and 2010-11. (2) The figures in brackets are percentages. (3) § excluding Bihar, Jharkhand and Maharashtra.

5.6.2 Out of a total of 9.51 million Scheduled Castes holdings received irrigation in 2010-11, the largest proportion, 46.4 percent, were irrigated by tubewells. The next important source of irrigation was canals accounting for 26.3 percent followed by wells (13.7 percent). In terms of net irrigated area also, tubewells accounted for the largest proportion of 46.4 percent, while canals represented the next highest proportion, viz. 26.5 percent. Tubewells were also the main source of irrigation during 2005-06 followed by canals. Wells were the next source of irrigation with 16.5 percent of the net irrigated area while tanks had a share of about 4.1 percent during 2010-11.

5.6.3 The distribution of holdings received irrigation and area irrigated by different sources of irrigation for holdings of Scheduled Tribes are given in Table 5.16. The graphical presentation of net area irrigated by sources of irrigation during 2010-11 may be seen in Figure 5.14.

Table 5.16: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for Scheduled Tribes during Agriculture Census, 2005-06 and 2010-11

(Number in '000)

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2005-06 [§]		2010-11	
		Number of holdings*	Net Irrigated Area	Number of holdings*	Net Irrigated Area
1	2	3	4	5	6
1	Canals	847 (25.42)	748 (28.84)	877 (22.25)	825 (23.77)
2	Tanks	244 (7.33)	140 (5.41)	317 (8.03)	186 (5.35)
3	Wells	776 (23.29)	674 (25.98)	908 (23.03)	809 (23.31)

		Number of holdings*	Net Irrigated Area	Number of holdings*	Net Irrigated Area
1	2	3	4	5	6
4	Tubewells	594 (17.83)	505 (19.48)	932 (23.63)	930 (26.80)
5	Other Sources	870 (26.13)	526 (20.29)	909 (23.05)	721 (20.78)
	All Sources	3332 (100.00)	2594 (100.00)	3942 (100.00)	3471 (100.00)

Note: (1) * This includes holdings irrigated by more than one source. However, the respective exclusive number of irrigated holdings was only 2685 thousand and 3659 thousand during 2005-06 and 2010-11. (2) The figures in brackets are percentages. (3) \$ excluding Bihar, Jharkhand and Maharashtra.

5.6.4 Out of a total of 3.94 million Scheduled Tribes holdings received irrigation in 2010-11, the most important source of irrigation was tube wells accounting for 23.6 percent followed by the 'Other sources' (23.1 percent). The next, the largest proportion, was wells accounting for 23.0 percent followed by Canals (22.3 percent). Tanks occupied the next place with 8.0 percent irrigated holdings. In terms of net irrigated area, tubewells had the highest share of 26.8 percent followed by Canals (23.8 percent) and wells (23.3 percent). The 'other sources' accounted for 20.8 percent followed by tanks (5.4 percent).

5.7 Dispersal of operated Area

5.7.1 The dispersal of area of operational holdings belonging to Scheduled Castes during 2005-06 and 2010-11 may be seen in Table 5.17, which shows that 95.6 percent of operated area belonging to about 97.0 percent of operational holdings was located within the village of residence as per Agriculture Census 2010-11. About 1.6 percent of number of holdings with operated area of 2.5 percent were located partly within the village and partly outside the village of residence. Further, 1.4 percent of number of holdings with operated area of 1.7 percent were lying outside the village of residence but within the Tehsil. Similarly, 0.2 percent of operated area was held by 0.1 percent deemed cultivators i.e. those operational holders who were residing outside the Tehsil but operating land in some village(s) of the Tehsil.

Table 5.17: Dispersal of number and area of operational holdings of Scheduled Castes, 2005-06[#] and 2010-11.

(Number in '000)
(Area in '000 ha.)

Sl. No.	Item	Number		Area	
		2005-06	2010-11	2005-06	2010-11
1	2	3	4	5	6
1	Entirely within the village of residence	12730 (95.83)	16575 (96.94)	10846 (94.19)	13117 (95.60)
2	Partly within the village & partly outside the village(s) of residence within the same tehsil	303 (2.28)	265 (1.55)	396 (3.44)	348 (2.54)

Sl. No.	Item	Number		Area	
		2005-06	2010-11	2005-06	2010-11
1	2	3	4	5	6
3	Entirely outside the village of residence but within the same tehsil	239 (1.80)	239 (1.40)	254 (2.20)	227 (1.65)
4	Operational holder residing outside the tehsil	11 (0.09)	20 (0.11)	20 (0.17)	29 (0.21)
5	Total	13283 (100.00)	17099 (100.00)	11515 (100.00)	13721 (100.00)

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets indicate percentages.

5.7.2 The dispersal of area of operational holdings of Scheduled Tribes during 2005-06 and 2010-11 is given in Table 5.18. Accordingly, 97.6 percent of operated area belonging to almost equal (97.5 percent) proportion of operational holdings was located within the village of residence. About 1.4 percent of numbers of holdings with operated area of 1.7 percent were located partly within the village and partly outside the village of residence during 2010-11. About 1.0 percent of number of holdings with operated area of 0.7 percent were located outside the village of residence but within the Tehsil. A very small fraction of operated area was held by deemed cultivators i.e. those operational holders who were residing outside the Tehsil but operating land in some village(s) of the Tehsil.

Table 5.18: Dispersal of number and area of operational holdings of Scheduled Tribes, 2005-06# and 2010-11.

(Number in '000)

(Area in '000 ha.)

Sl. No.	Item	Number		Area	
		2005-06	2010-11	2005-06	2010-11

19	Other non-food crops	11 (0.40)	23 (0.59)	95 (0.80)	124 (0.88)	107 (0.72)	148 (0.81)
20	All non-food crops (16+17+18+19)	626 (21.70)	555 (14.01)	2225 (18.74)	2780 (19.58)	2852 (19.32)	3334 (18.37)
21	Gross Cropped Area (15+20)	2888 (100.00)	3960 (100.00)	11876 (100.00)	14195 (100.00)	14763 (100.00)	18154 (100.00)
22	Net Area Sown	2594 (89.83)	3471 (87.66)	10259 (86.39)	11299 (79.60)	12853 (87.06)	14770 (81.36)
23	Intensity of Cropping (21/22)	1.1132	1.1408	-	-	1.1486	1.2291

Note: Note: (1) [#] excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets indicate percentages to Gross Cropped Area. (4) Neg - Negligible (i.e. less than 500 ha.).

5.8.2 The net area sown for holdings of Scheduled castes was 12.21 million hectares in 2010-11 whereas the gross cropped area stood at 17.10 million hectares indicating a cropping

intensity of 1.400. The percentage of net irrigated area to net sown area in 2010-11 was 45.3 while the irrigation intensity was 1.340. In a total of 17.10 million hectares of gross cropped area belonging to holdings of Scheduled Castes in 2010-11, the proportions of different groups/subgroups of crops were cereals (57.95 percent), pulses (13.29 percent), sugar crops (1.85 percent), oilseeds (12.61 percent), fibres (5.14 percent) and fodder (3.43 percent).

5.8.3 For holdings of Scheduled Tribes, it may be observed that against net sown area of 14.77 million hectares in 2010-11, gross cropped area was 18.15 million hectares, having a cropping intensity of 1.229 and irrigation intensity at 1.141. The distribution of gross cropped area of 18.15 million hectares among different groups/subgroups of crops in 2010-11 were cereals (65.23 percent), pulses (10.27 percent), spices & condiments (1.78 percent), vegetables (2.00 percent), fruits (1.43 percent), oilseeds (11.70 percent), fibres (4.63 percent and fodder crops (1.22 percent).

CHAPTER 6

State-wise Agriculture Census results – All social groups

6.1 Introduction

6.1.1 In the preceding chapters, data generated for Agriculture Census 2010-11 were analyzed at All India level for All Social Groups, Scheduled Castes and Scheduled Tribes holdings. In this chapter the results would be analyzed State-wise, for All Social Groups. In the subsequent Chapter 7, it would be taken up for holdings of Scheduled Castes and Scheduled Tribes.

(A) OPERATIONAL HOLDINGS

6.2 State-wise Distribution of Operational Holdings

6.2.1 As per Agriculture Census 2010-11, State-wise distribution of number and area of operational holdings may be seen in Table 6.1 and Table 6.2 and the corresponding graphical presentations in Figure 6.1 and Figure 6.2 respectively.

Table 6.1: State-wise distribution of number of operational holdings for All Social Groups during Agriculture Census 2005-06[#] and 2010-11.

Note: (1) # excluding Jharkhand. (2) Figures in brackets are percentages. (3) Neg – negligible i.e. less than 500. (4) * include institutional holdings also.

6.2.2 Out of a total of 138.35 million holdings in the country during 2010-11, Uttar Pradesh accounted for largest number of holdings, 23.33 million (16.9 percent), followed by Bihar 16.19 million (11.7 percent), Maharashtra 13.70 million (9.9 percent), Andhra Pradesh 13.18 million (9.5 percent), Madhya Pradesh 8.87 million (6.4 percent), Tamil Nadu 8.12 million (5.9 percent), Karnataka 7.83 million (5.7 percent), West Bengal 7.12 million (5.2 percent), Rajasthan 6.89 million (5.0 percent) and Kerala 6.83 million (4.9 percent). Uttar Pradesh was the highest during Agriculture Census 2005-06 (17.4 percent) also.

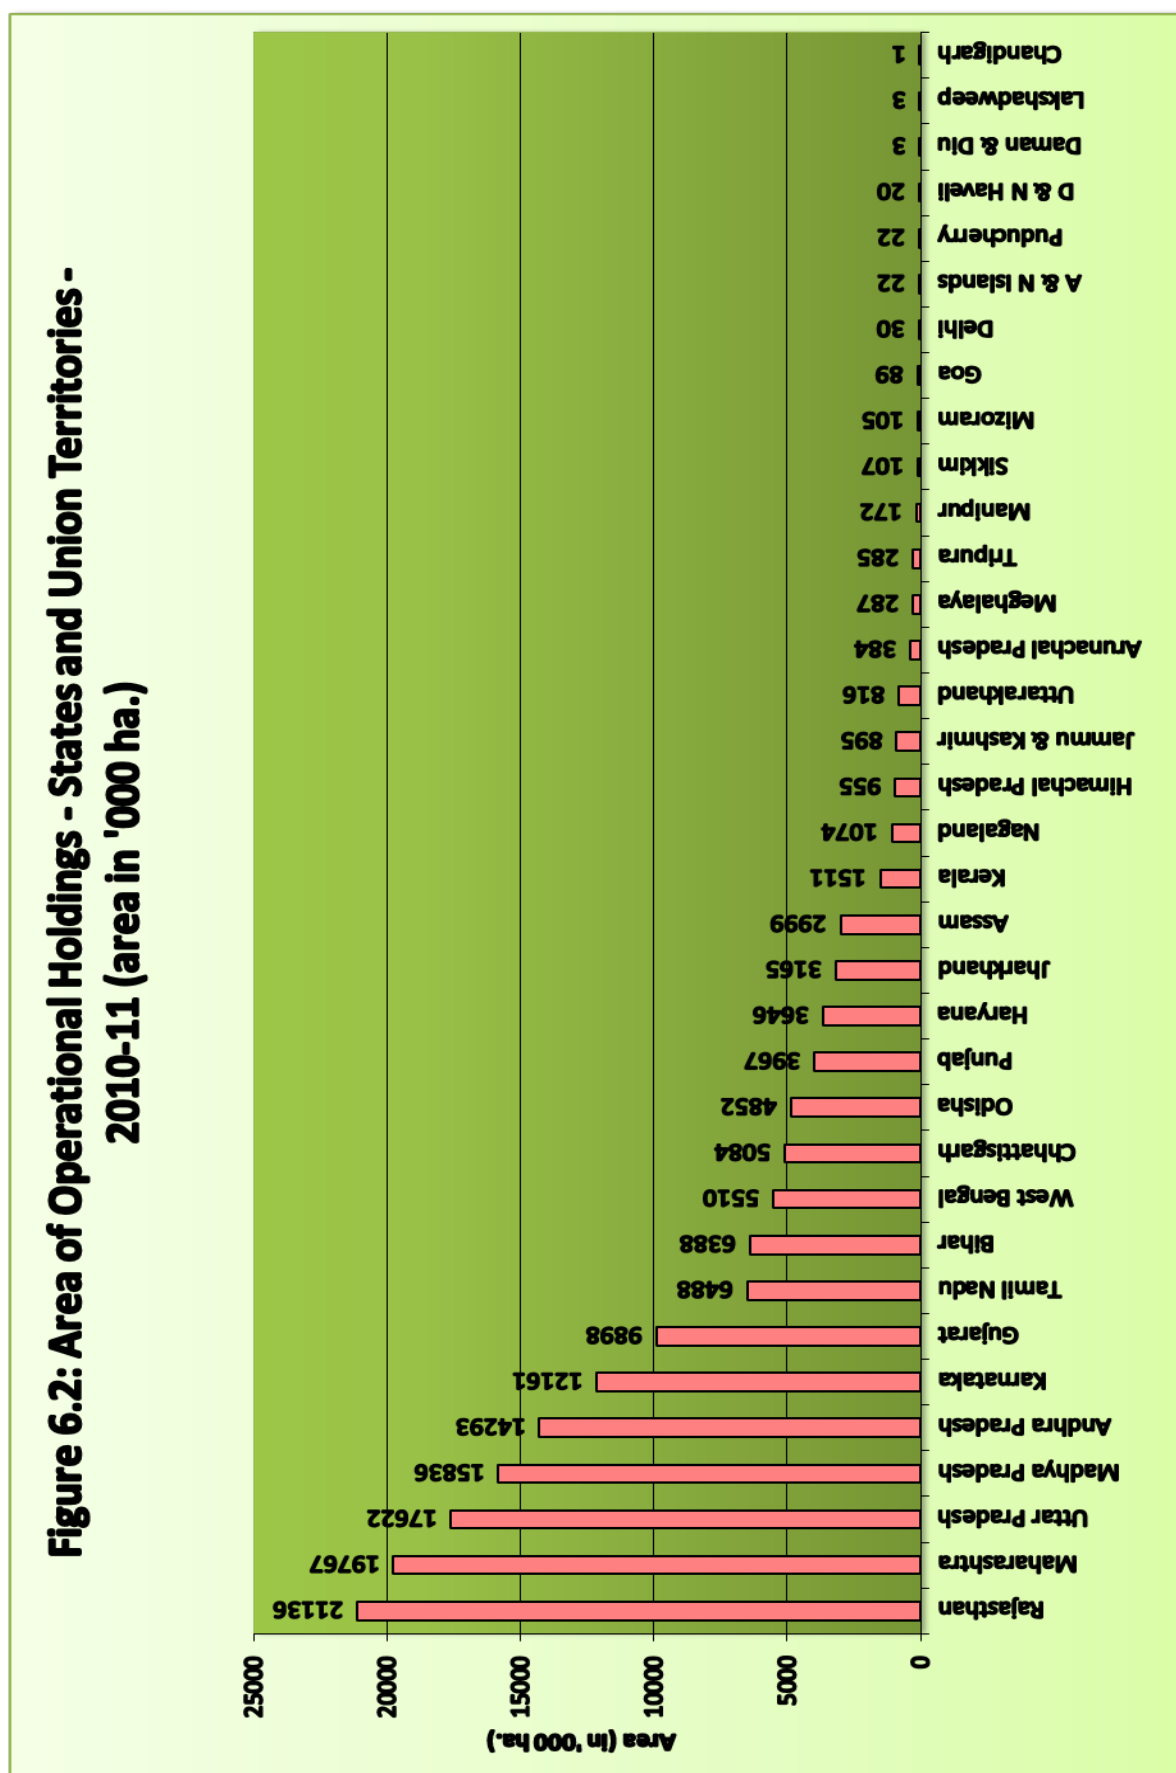

6.2.3 In a total of 17.68 million female operational holdings, Andhra Pradesh accounted for the highest proportion of 18.9 percent followed by Bihar (12.9 percent), Maharashtra (11.6 percent), Uttar Pradesh (9.2 percent), Tamil Nadu (8.8 percent), Karnataka (8.4 percent), Kerala (7.6 percent), Madhya Pradesh (4.8 percent), Gujarat (3.9 percent), Rajasthan (3.1

percent) and Chhattisgarh (2.7 percent), thus, these 11 States together (about 1/3rd of total

number of States) constituted 92.0 percent of total number of female operational holdings in the country. Further, out of a total of 120.43 million male operational holdings, Uttar Pradesh

constituted 18.0 percent followed by Bihar (11.5 percent), Maharashtra (9.7 percent), Andhra

Pradesh (8.2 percent), Madhya Pradesh (6.7 percent), West Bengal (5.7 percent), Tamil Nadu (5.4 percent), Karnataka & Rajasthan (5.3 percent each) and Kerala (4.5 percent). The variations in 2010-11 over 2005-06 (excluding Jharkhand) relating to male and female operational holdings at all India level were 5.8 percent and 17.0 percent, respectively.

6.2.4 A comparison of number of operational holdings in 2010-11 over 2005-06 within a State indicated mixed trend. In all the States except Assam, Kerala, Maharashtra, Tamil Nadu, Uttarakhand, Chandigarh and Delhi, there was an increase in number of holdings between these two Census periods. The number of operational holdings had increased from 129.22 million in 2005-06 to 138.35 million in 2010-11 showing an increase of 7.06 percent as Agriculture Census 2005-06 was not conducted in the State of Jharkhand.

Table 6.2: State-wise distribution of area operated by holders of All Social Groups during Agriculture Census 2005-06[#] and 2010-11.

Note: (1) # excluding Jharkhand. (2) Figures in brackets are percentages. (3) Neg – negligible (less than 500 ha.). (4) * include institutional holdings also.

6.2.5 In terms of operated area, (Table 6.2), Rajasthan had the highest proportion of operated area in the country (13.2 percent) (though it stood 9th among States/UTs in terms of number of operational holdings in 2010-11) followed by Maharashtra (12.4 percent), Uttar Pradesh (11.0 percent), Madhya Pradesh (9.9 percent), Andhra Pradesh (9.0 percent), Karnataka (7.6 percent), Gujarat (6.2 percent), Tamil Nadu (4.1 percent), Bihar (4.0 percent) and West Bengal (3.5 percent). Out of a total of 16.51 million ha. area being operated by female holders in the country, the State of Andhra Pradesh had the highest proportion of (19.1 percent) followed by Maharashtra (15.7 percent), Karnataka (11.5 percent), Rajasthan (8.1 percent), Gujarat (7.9 percent), Madhya Pradesh (7.3 percent), Tamil Nadu (6.4 percent), Uttar Pradesh (5.7 percent) and Bihar (5.2 percent). As far as operated area belonging to male operational holders, Rajasthan had the highest proportion of 13.9 percent followed by Maharashtra (12.1 percent), Uttar Pradesh (11.7 percent), Madhya Pradesh (10.3 percent), Andhra Pradesh (7.8 percent), Karnataka (7.2 percent), Gujarat (6.0 percent), Bihar (3.9 percent), Tamil Nadu (3.7 percent) and West Bengal (3.7 percent).

6.3 Tenancy

6.3.1 The State-wise distribution of number of operational holdings of all social groups by tenancy in 2010-11 may be seen in Table 6.3.

Table 6.3: State-wise distribution of number of holdings of All Social Groups by Tenancy Status, 2010-11

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

6.3.2 In a total of 138.35 million estimated operational holdings during Agriculture Census 2010-11, wholly owned and self-operated holdings had the highest share of 97.6 percent at all India level. In Arunachal Pradesh, Gujarat, Karnataka, Mizoram, Chandigarh, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep all the holdings were owned and self-operated. In other States, where almost all the holdings (above 99.0 percent) belonged to owned and self-operated category were Andhra Pradesh, Bihar, Chhattisgarh, Haryana, Jharkhand, Kerala, Madhya Pradesh, Maharashtra, Nagaland, Tamil Nadu, Andaman & Nicobar Islands, Delhi and Puducherry.

6.3.3 The proportions of wholly leased-in holdings with respect to total number of operational holdings in some of the non-land record States like, Goa, Manipur, Odisha and West Bengal were substantially higher as compared to other States including of land record States.

6.3.4 The wholly otherwise operated holdings which include encroachment, land forcibly occupied, unauthorized land or disputed land, etc., accounted for only 0.15 percent of the total number of operational holdings in the country. Among States, Tripura had the highest proportion of such holdings being at 5.0 percent followed by Goa (3.3 percent), Odisha (1.2 percent), Meghalaya (1.1 percent), Jammu & Kashmir (1.0 percent) and Rajasthan and Andaman & Nicobar Islands (0.4 percent each).

6.3.5 As regards 'Others' States, like Assam (2.4 percent), Goa (4.5 percent), Manipur (4.0 percent), Meghalaya (2.2 percent), Odisha (12.5 percent), Tripura (2.2 percent) and West Bengal (21.0 percent) were having higher representation than all India average of 1.7 percent.

6.3.6 The State-wise distribution of operated area of all social groups by tenancy status in 2010-11 is given in Table 6.4.

Table 6.4: State-wise distribution of operated area of All Social Groups by Tenancy Status, 2010-11

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

6.3.7 The distribution of operated area in States according to tenancy status followed similar pattern as the number of operational holdings. In Arunachal Pradesh, Gujarat, Karnataka, Mizoram, Chandigarh UT, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep, all the area of holdings were owned and self-operated. In States like, Andhra Pradesh, Bihar, Chhattisgarh, Haryana, Jharkhand, Madhya Pradesh, Maharashtra, Nagaland, Tamil Nadu, Andaman & Nicobar Islands and Delhi almost entire operated area (99.0 percent and above) was reported under owned and self-operated category.

6.3.8 The proportion of wholly leased-in area in relation to total operated area was higher in the States of Goa, Manipur, Odisha, Uttar Pradesh, West Bengal and Puducherry than all India average of 0.39 percent.

6.3.9 The proportion of wholly otherwise operated area was the highest in Tripura (5.0 percent) followed by Goa (2.3 percent), Meghalaya (1.3 percent), Jammu & Kashmir (1.2 percent), Odisha (0.9 percent) and Kerala & West Bengal (0.2 percent each) which were also above the national average of 0.1 percent.

6.3.10 The proportion of operated area under 'Others' category was the highest in West Bengal (24.5 percent) followed by Odisha (15.2 percent), Goa (9.1 percent), Manipur (5.4 percent), Tripura (4.9 percent), Punjab (4.0 percent), Meghalaya (3.7 percent) etc.

6.4 Terms of leasing

6.4.1 The State-wise distribution of leased-in area by terms of leasing of all social groups in 2010-11 may be seen in Table 6.5.

Table 6.5: State-wise distribution of leased-in by terms of leasing area of All Social Groups, 2010-11

Note: (1) Figures in brackets are percentages. (2) Total may not tally due to rounding off.

6.4.2 Data was collected for four specific terms of leasing, namely, (i) fixed money (ii) fixed produce, (iii) share of produce and (iv) usufructuary mortgage. Leasing for share of produce was the major term of leasing in the country. In the State of Nagaland proportion of leasing of area to total leased-in area was done only for share of produce. Further, it was the highest among different types of leasing in the States of Chhattisgarh (94.0 percent), West Bengal (87.7 percent), Tripura (76.3 percent), Odisha (65.3 percent), Madhya Pradesh (61.4 percent), Assam (51.2 percent) and Goa (37.7 percent). In States where proportion of leasing of area to total leased-in area was done mainly for fixed-money were Haryana (100 percent), Punjab (97.1 percent), Maharashtra (93.3 percent), Uttar Pradesh (92.4 percent), Rajasthan (70.2 percent), Kerala (64.5 percent), Andhra Pradesh (62.0 percent), Bihar (52.4 percent), Tamil Nadu (49.4 percent), Jharkhand (49.0 percent), Uttarakhand (43.1 percent) and Andaman & Nicobar Islands (38.9 percent). However, the presentation of Jammu & Kashmir under 'fixed money' was second (36.7 percent) to fixed produce (56.6 percent) in the State. The term fixed produce was dominant in the States of Meghalaya (76.5 percent), Sikkim (72.3 percent), Manipur (70.6 percent), Jammu & Kashmir (56.6 percent), Puducherry (51.1 percent), Andhra Pradesh (34.7 percent), Assam (27.4 percent), Goa (26.9 percent), Tamil Nadu (25.5 percent),

Jharkhand (24.5 percent), Odisha (19.9 percent), Uttarakhand (19.3 percent) and Tripura (17.3 percent). The proportion of leased-in area under 'other terms' was the highest among different terms of leasing in Himachal Pradesh (57.8 percent). The similar proportions in other States were Andaman & Nicobar Islands (28.9 percent), Uttarakhand (26.8 percent), Kerala (20.3 percent) and Tamil Nadu (10.9 percent).

(B) LAND USE

6.5 Land Utilization

6.5.1 The State-wise area, in percentage, under main land use categories for all social groups in 2005-06 and 2010-11 may be seen in Table 6.6.

Table 6.6: State-wise percentage distribution of operated area by main land use of All Social Groups, 2005-06# and 2010-11

Sl. No.	States/UTs	Land not available for cultivation		Net cultivated area		Land unutilized		Total

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) NA - not applicable.

6.5.2 The percentage of net cultivated area to total operated area in 2010-11 in the States of Andhra Pradesh (97.4 percent), Assam (97.1 percent), Bihar (96.0 percent), Chhattisgarh (96.5 percent), Goa (98.3 percent), Gujarat (99.9 percent), Haryana (99.8 percent), Karnataka (97.9 percent), Madhya Pradesh (97.8 percent), Manipur (99.9 percent), Mizoram (100.0 percent), Odisha (98.7 percent), Punjab (99.9 percent), Uttar Pradesh (99.4 percent), West Bengal (96.9 percent), Chandigarh (96.9 percent), Dadra & Nagar Haveli (98.4 percent) and Delhi (99.4 percent) was higher than the national average of 95.7 percent while Nagaland had lowest proportion (43.0 percent) among all the States. Land not available for cultivation as a percentage of total operated area was as high as 9.7 percent in Arunachal Pradesh, 10.5 percent in Himachal Pradesh, 11.0 percent in Kerala, 17.2 percent in Nagaland, 9.6 percent in Sikkim, 8.6 percent in Tripura, 7.1 percent in Andaman & Nicobar Islands, 5.8 percent in Daman & Diu, 12.4 percent in Lakshadweep and 3.7 percent in Puducherry with all India average of 1.3 percent only.

6.5.3 Land Unutilized stood at 3.0 percent of the total operated area at national level in 2010-11. In the States of Arunachal Pradesh (31.1 percent), Himachal Pradesh (25.7 percent), Jammu & Kashmir (7.2 percent), Jharkhand (10.8 percent), Nagaland (39.9 percent), Rajasthan (7.1 percent), Sikkim (11.6 percent), Uttarakhand (4.1 percent), Andaman & Nicobar Islands (20.0 percent), Daman & Diu (3.8 percent) and Puducherry (4.0 percent) the proportion was found more than national average.

(C) IRRIGATION

6.6 Irrigation Status

6.6.1 The percentage of net irrigated area to net area sown in each State, as per Agriculture Census 2005-06 and 2010-11, for all social groups is shown in Table 6.7.

Table 6.7: Percentage of net irrigated area to net sown area of All Social Groups, 2005-06# and 2010-11
(Area in '000 ha.)

Sl. No.	States/UTs	Net area sown		Net irrigated area		Percentage of NIA to NSA	
		2005-06	2010-11	2005-06	2010-11	2005-06	2010-11
1	2	3	4	5	6	7	8

35	Puducherry	20	18	18	15	89.90	84.12
	All India	115855	141279	54270	64567	46.84	45.70

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) NA - not applicable. (4) Neg - negligible.

6.6.2 The net irrigated area as proportion of net sown area was 45.7 percent in the country in 2010-11 as compared to 46.8 percent in 2005-06. The net irrigated area in 2010-11 increased by 19.0 percent over 2005-06 as figures of Bihar, Jharkhand and Maharashtra are not included in 2005-06. Chandigarh U.T. had the highest proportion of net irrigated area to net sown area (100.0 percent) in 2010-11 followed by Punjab (99.6 percent), Delhi (95.7), Haryana (91.4 percent), Puducherry (84.1 percent), Uttar Pradesh (81.2 percent), West Bengal (67.1 percent), Tamil Nadu (63.8 percent), Bihar (58.0 percent), Uttarakhand (47.5 percent), while Jammu & Kashmir, Madhya Pradesh and Andhra Pradesh were at about 46.0 percent each.

6.7 Source-wise Classification of Irrigated Area

6.7.1 The area irrigated, in percentage, for all social groups, in each State, by source of irrigation in 2010-11 may be seen in Table 6.8.

Table 6.8: Area irrigated, in percentage, of All Social Groups in each State by source of irrigation, 2005-06# and 2010-11

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets are for 2005-06. (3) Total may not tally due to rounding off. (4) NA - not applicable. (5) Neg - negligible.

6.7.2 As per Agriculture Census 2010-11, tube-wells emerged as main source of irrigation (45.2 percent), followed by canals (26.2 percent), wells (18.5 percent) and tanks (3.5 percent). Other sources accounted for 6.7 percent at all India level. The State-wise data shows that canals were the main source of irrigation in the States of Andhra Pradesh (36.9 percent), Chhattisgarh (67.0 percent), Haryana (48.4 percent), Jammu & Kashmir (68.6 percent), Manipur (47.2 percent), Mizoram (73.1 percent) and Odisha (70.4 percent); while tube-wells were the dominant source of irrigation in Bihar, Karnataka, Punjab, Rajasthan, Uttarakhand, Uttar Pradesh, West Bengal, Chandigarh, Delhi and Pondicherry. The proportion of area irrigated by wells in Gujarat, Jharkhand, Kerala, Madhya Pradesh, Maharashtra, Tamil Nadu, D & Haveli and Daman & Diu was higher than canals, tanks and tubewells each in these States while wells were the sole source of irrigation in Andaman & Nicobar Islands. In Andhra Pradesh, Jharkhand, Karnataka, Kerala, Mizoram, Odisha, Tamil Nadu and West Bengal, proportion of area irrigated by tanks varied between 4.5 percent in Karnataka to 18.2 percent in Jharkhand.

6.8 Dispersal of operational Holdings

6.8.1 Dispersal by number and area of operational holdings for all social groups in each State in 2010-11 is given in Table 6.9.

Table 6.9: State-wise dispersal of number and area of operational holdings of All Social Groups, 2010-11

(Number in '000)

(Area in '000 ha.)

Sl. No.	States/UTs	Total Holdings		Operational Holdings Whose Operated Area was Located						Operational Holdings Whose Operators Resided Outside the Tehsil

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

6.8.2 In States/UTs of Arunachal Pradesh, Meghalaya, Chandigarh, Dadra & Nagar Haveli and Lakshadweep, operated areas were confined within village of residence of operational holders only. In Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra, Mizoram, Nagaland, Punjab, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh, Daman & Diu, Delhi and Puducherry, more than 96.95 percent of number of holdings and 96.08 percent of operated area (all India average) were located in the village of residence. The remaining proportion of number of holdings (3.05 percent) and area operated (3.92 percent) were located either partly in the village of residence and partly in other villages or completely outside village of residence but within the same Tehsil or held by deemed resident cultivators.

(D) CROPPING PATTERN

6.9 Gross Cropped Area

6.9.1 The State-wise gross cropped area and its distribution for all social groups in 2010-11 is given in Table 6.10 and Table 6.11 respectively.

Table 6.10: State-wise Gross Cropped Area of All Social Groups, 2010-11

	All India	100.00	100.00	100.00	100.00	100.00	100.00

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) NA - not applicable. (4) Neg - negligible.

6.9.2 As per Table 6.10 and Table 6.11, Rajasthan had the highest gross cropped area among States/UTs in 2010-11 accounting for 26.1 million ha. (13.5 percent), followed by Uttar Pradesh with 25.7 million ha. (13.3 percent), Maharashtra 24.1 million ha. (12.4 percent), Madhya Pradesh with 21.9 million ha (11.3 percent), Andhra Pradesh 14.2 million ha. (7.3 percent), Karnataka 12.5 million ha. (6.5 percent) and Gujarat 10.5 million ha. (5.4 percent). These seven States together accounted for about 70.0 percent of the total gross cropped area in the country.

6.9.3 Uttar Pradesh had the highest proportion of gross irrigated area (22.3 percent) in the country followed by Rajasthan (9.6 percent), Punjab (8.8 percent), Madhya Pradesh (8.6 percent), Andhra Pradesh (8.0 percent), Haryana (7.3 percent), West Bengal (5.8 percent), Maharashtra (5.4 percent), Bihar (5.1 percent), Gujarat (4.8 percent).

6.9.4 The percentage distribution of gross cropped area between gross irrigated area and gross unirrigated area in each State may be seen in Table.6.12.

Table 6.12: Percentage distribution of Gross Cropped Area by irrigated and unirrigated area in each State for All Social Groups, 2010-11

Sl. No.	States/UTs	Gross Irrigated Area	Gross Unirrigated Area	Gross Cropped Area
1	2	3	4	5
1	Andhra Pradesh	49.19	50.81	100.00
2	Arunachal Pradesh	20.99	79.01	100.00

26	Uttarakhand	48.84	51.16	100.00
27	Uttar Pradesh	76.29	23.71	100.00
28	West Bengal	57.69	42.31	100.00
29	Andaman & Nicobar Islands	0.24	99.76	100.00
30	Chandigarh	87.27	12.73	100.00
31	Dadra & Nagar Haveli	8.33	91.67	100.00
32	Daman & Diu	0.75	99.25	100.00
33	Delhi	91.98	8.02	100.00
34	Lakshadweep	0.00	100.00	100.00
35	Puducherry	81.00	19.00	100.00
	All India	45.30	54.70	100.00

Note: (1) Total may not tally due to rounding off.

6.9.5 The percentage of gross irrigated area to gross cropped area was the highest in Punjab (99.6 percent) in 2010-11 followed by other States, like, Haryana (94.0 percent), Delhi (92.0

percent), Chandigarh U.T. (87.3 percent), Puducherry (81.0 percent), Uttar Pradesh (76.3 percent), Bihar (62.2 percent), Tamil Nadu (58.9 percent), West Bengal (57.7 percent), Andhra Pradesh (49.2 percent), Uttarakhand (48.8 percent), Jammu & Kashmir (41.2 percent), Goa (40.4 percent), Gujarat (40.2 percent), Madhya Pradesh (34.3 percent), Rajasthan (32.2 percent), Karnataka (31.2 percent) etc against national average of 45.3 percent.

6.10 Intensity of Cropping

6.10.1 The State-wise intensity of cropping for all Social Groups in 2010-11, may be seen in Table 6.13. Its graphic presentation is given in Figure 6.3.

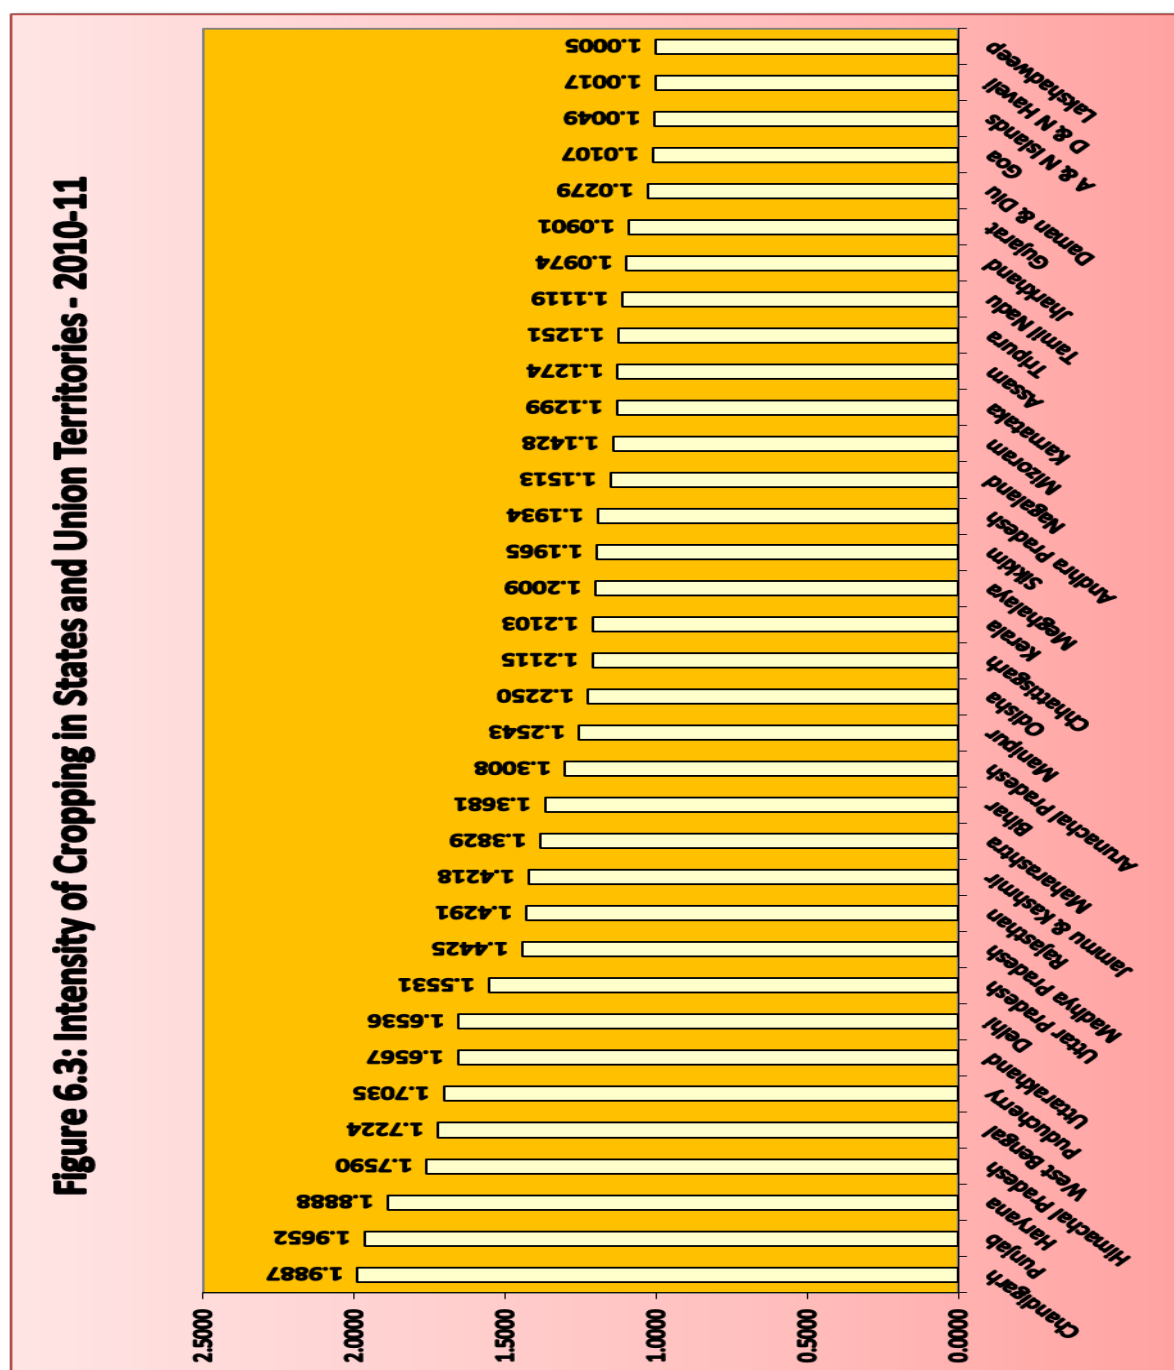

Table 6.13: State-wise Intensity of Cropping of All Social Groups, 2010-11

(Area in '000 ha.)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping

Note: (1) Total may not tally due to rounding off. (2) * excluding Bihar, Jharkhand and Maharashtra. (3) NA - not applicable.

6.10.2 The cropping intensity at All India level in 2010-11 was estimated at 137.15 percent. Among States/UTs, Chandigarh recorded the highest intensity of cropping of 1.9887 followed by Punjab (1.9652), Haryana (1.8888), Himachal Pradesh (1.7590), West Bengal (1.7224), Puducherry (1.7035), Uttarakhand (1.6567), Delhi (1.6536), Uttar Pradesh (1.5531), Madhya

Pradesh (1.4425), Rajasthan (1.4291), Jammu & Kashmir (1.4218) and Maharashtra (1.3829) having value above the national average of 1.3715.

State-wise Area under Principal Crops

6.10.3 The State-wise distribution of area (in percent) under principal crops of All Social Groups in 2010-11 is given in Table 6.14(a) and Table 6.14(b).

Table 6.14(a): State-wise percentage distribution of area under Principal Crops (Food Crops) of All Social Groups, 2010-11

6.10.4 Considering all crops together, among States, Rajasthan had the highest share of 13.5 percent of cropped area in the country, followed by Uttar Pradesh (13.3 percent), Maharashtra (12.4 percent), Madhya Pradesh (11.3 percent), Andhra Pradesh (7.3 percent), Karnataka (6.5 percent), Gujarat (5.4 percent), West Bengal (4.5 percent) and Punjab (4.0 percent). These nine States together accounted for more than 3/4th of the total cropped area (78.2 percent) in the

country. In the category of food crops, Uttar Pradesh topped the list with 16.5 percent of the total area under food crops in the country followed by Rajasthan (11.8 percent) Maharashtra (10.6 percent) and Madhya Pradesh (10.1 percent). The other important States were Andhra Pradesh & Karnataka (6.5 percent each), West Bengal (4.9 percent), Bihar (4.8 percent) and Punjab (4.6 percent). Here again the above mentioned nine States accounted for more than 3/4th (76.2 percent) of the total area under food crops in the country. With regard to area under non-food crops, viz., oilseeds, Madhya Pradesh had the largest share of 25.2 percent of area under oilseeds in the country followed by Rajasthan (19.6 percent), Maharashtra (13.3 percent), Gujarat (10.5 percent), Andhra Pradesh (9.1 percent), Karnataka (7.3 percent), Uttar Pradesh about 4.0 percent, Tamil Nadu (3.1 percent), West Bengal (2.6 percent) and Kerala (1.6 percent each). These ten States, thus, covered 96.3 percent of the total area under Oilseeds in the country. Maharashtra had the highest proportion of 33.7 percent of the total area under fibre in the country followed by Gujarat (19.9 percent), Andhra Pradesh (16.3 percent), Haryana (6.5 percent), West Bengal (5.7 percent), Karnataka (4.7 percent) and Madhya Pradesh (4.4 percent), Punjab (3.8 percent) and Rajasthan (2.8 percent). As regards fodder crops, Rajasthan had more than 1/2 of the total area under fodder crops in the country (51.5 percent) followed by Maharashtra (16.6 percent), Punjab (8.6 percent), Haryana (7.3 percent) and Gujarat (6.8 percent). In the case of floriculture, Gujarat had the highest share of 25.2 percent of area under the crop in the country followed by Tamil Nadu (21.1 percent), Karnataka (15.1 percent), Andhra Pradesh (10.7 percent), West Bengal (7.1 percent), Maharashtra and Tripura (7.0 percent each). In the category of medicinal plants, Rajasthan had about 1/2nd (47.4 percent) of area in the country followed by Karnataka (18.9 percent), Andhra Pradesh (12.7 percent), Uttar Pradesh (7.6 percent), Tamil Nadu (4.7 percent), Madhya Pradesh (2.7 percent) and Punjab (2.2 percent).

CHAPTER 7

State-wise results – Scheduled Castes and Scheduled Tribes

(A) OPERATIONAL HOLDINGS

7.1 State-wise Distribution of Operational Holdings of Scheduled Castes and Scheduled Tribes.

7.1.1 The State-wise distribution of number and area of operational holdings of Scheduled Castes in 2010-11 may be seen in Table 7.1 and Table 7.2 respectively. The State-wise distribution of number and area of operational holdings of Scheduled Tribes in 2010-11 is given in Table 7.3 and Table 7.4 respectively.

Table 7.1: State-wise distribution of number of operational holdings for Scheduled Castes during Agriculture Census 2005-06[#] and 2010-11

Sl. No.	States/UTs	Number (in '00)						% variation in 2010-11 over 2005-06

Note: (1) # excluding Jharkhand. (2) Figures in brackets are percentages. (3) Neg - negligible. (4) NA - not applicable.

7.1.2 The number of operational holdings of Scheduled Castes in the country was 17.10 million during 2010-11 as against 16.07 million in 2005-06, showing an increase of 6.4 percent. The largest share of holdings of Scheduled Castes was in Uttar Pradesh (23.5 percent) followed by Bihar (11.5 percent), West Bengal (10.4 percent), Andhra Pradesh (8.5 percent), Madhya Pradesh (6.4 percent), Maharashtra (6.0 percent), Rajasthan (5.6 percent), Karnataka (5.4 percent), Tamil Nadu (5.1 percent) and Odisha (4.1 percent). Out of a total of 15.00 million male operational holdings belonging to Scheduled Castes, Uttar Pradesh accounted for about 24.9 percent followed by West Bengal (11.4 percent), Bihar (10.9 percent), Andhra Pradesh (7.2 percent), Madhya Pradesh (6.6 percent), Rajasthan (5.9 percent), Maharashtra (5.7 percent), Karnataka (5.0 percent), Tamil Nadu (4.7 percent) and Odisha (4.5 percent). These ten States together constituted about

86.8 percent of the total male operational holdings belonging to Scheduled Castes in the country. Similarly, Andhra Pradesh had highest proportion of female operational holdings (18.3 percent) in the country followed by Bihar (15.6 percent), Uttar Pradesh (13.5 percent), Maharashtra (8.2 percent), Karnataka (8.1 percent), Tamil Nadu (8.0 percent), Kerala (6.5 percent) and Madhya Pradesh (5.0 percent). These eight States together constituted about 83.0 percent of total female operational holdings belonging to Scheduled Castes in 2010-11 in the country.

7.1.3 As per Table 7.2, Rajasthan accounted for 18.0 percent of total operated area of Scheduled Castes holdings in 2010-11 in the country followed by Uttar Pradesh (14.4 percent), Madhya Pradesh (9.8 percent), Maharashtra (9.5 percent), West Bengal (8.2 percent), Andhra Pradesh (8.0 percent) and Karnataka (7.8 percent). In a total of 1.43 million hectares of operated area of female Scheduled Castes operational holdings in 2010-11 in the country, Andhra Pradesh had the highest share of 18.3 percent followed by Maharashtra (14.1 percent), Karnataka (12.6 percent), Rajasthan (11.7 percent), Uttar Pradesh (8.5 percent), Madhya Pradesh (7.8 percent), Bihar (7.1 percent) and Tamil Nadu (6.3 percent). Thus, these eight States together accounted for about 86.4 percent of operated area of female holdings in the country. However, Rajasthan had the maximum share of area operated by males (18.7 percent) followed by Uttar Pradesh (15.0 percent), Madhya Pradesh (10.0 percent), Maharashtra (9.0 percent), West Bengal (8.9 percent), Karnataka (7.3 percent) and Andhra Pradesh (6.8 percent). These seven States taken together accounted for more than 3/4th of the area operated by males belonging to Scheduled Castes in the country in 2010-11.

7.1.4 The total operated area held by Scheduled Castes increased at all India level by 3.2 percent in 2010-11 over 2005-06 as of 1.6 percent for males and 18.4 percent for holdings held by females for the same period.

7.1.5 The total number of Scheduled Tribe holdings in the country (Table 7.3) in 2010-11 was 12.00 million as against 10.34 million in 2005-06, indicating an increase of about 16.1 percent. The Scheduled Tribes holdings were largely concentrated in States of Madhya Pradesh (14.9 percent) and Odisha (11.9 percent) accounting for more than one-fourth of total number of Scheduled Tribes holdings (26.8 percent) in the country. The other States having sizeable proportion of Scheduled Tribes holdings were Chhattisgarh (9.8 percent), Rajasthan (9.3 percent), Andhra Pradesh (8.8 percent), Jharkhand (8.1 percent), Maharashtra (7.2 percent) and West Bengal (4.9 percent). These eight States together accounted for about 75 percent of total Scheduled Tribes holdings in the country in 2010-11. Out of a total of 1.4 million female operational holdings

belonging to Scheduled Tribes, Andhra Pradesh had the highest proportion of 18.0 percent followed by Madhya Pradesh (13.0 percent), Chhattisgarh (10.8 percent), Maharashtra (10.3 percent), Karnataka (6.3 percent), Jharkhand (6.2 percent), Gujarat (5.7 percent), Meghalaya (5.3 percent) and Odisha & Rajasthan (5.0 percent each), accounting for about 86.0 percent of female Scheduled Tribes operational holdings in the country. The male operational holdings in Madhya Pradesh and Chhattisgarh taken together accounted for about one-fourth of the total male operational holdings (24.8 percent). The other States, having substantial proportions of holdings, were Odisha (12.8 percent), Rajasthan (9.9 percent), Jharkhand (8.3 percent), Andhra Pradesh (7.7 percent), Maharashtra (6.8 percent) and West Bengal (5.2 percent). The above mentioned eight States, thus, accounted for more than 75.0 percent of total male operational holdings of Scheduled Tribes in the country in 2010-11.

7.1.6 While male holdings increased by 13.9 percent, female holdings rose by 36.1 percent resulting in an overall increase of 16.1 percent in Scheduled Tribes holdings in 2010-11 over 2005-06 in the country.

7.1.7 In terms of area operated (Table 7.4), Madhya Pradesh and Chhattisgarh taken together accounted for about 30.0 percent of total area operated by Scheduled Tribes in the country in 2010-11. The other States in descending order were Rajasthan (9.8 percent), Odisha (8.9 percent), Maharashtra (8.6 percent), Jharkhand (7.9 percent), Andhra Pradesh (6.9 percent), Nagaland (5.9 percent) and Gujarat (5.3 percent). The above mentioned nine States, thus, accounted for about 83.0 percent of total area operated by Scheduled Tribes in the country. Further, out of 16.39 million hectares of operated area of male operational holdings, Madhya Pradesh and Chhattisgarh had together about 30.0 percent of operated area followed by Rajasthan (10.4 percent), Odisha (9.4 percent), Jharkhand (8.2 percent), Maharashtra (8.1 percent), Andhra Pradesh (6.1 percent), Nagaland (6.0 percent) and Gujarat (5.0 percent). The substantial part of area operated by male Scheduled Tribes, i.e. 83.0 percent, concentrated only in these nine States. The area operated by Scheduled Tribes females in Madhya Pradesh and Chhattisgarh constituted together 27.8 percent of operated area of this category of holdings in the country. The other dominating States were Andhra Pradesh (13.9 percent), Maharashtra (12.4 percent), Gujarat (8.1 percent), Karnataka (6.4 percent), Meghalaya (5.3 percent), Nagaland (5.1 percent), Jharkhand (5.0 percent) and Rajasthan (4.5 percent). The above mentioned ten States, thus, taken together accounted for about 89.0 percent of operated area of female operational holdings belonging to Scheduled Tribes in the country in 2010-11.

7.1.8 The area operated by Scheduled Tribes females and males increased by 26.5 percent and 5.9 percent respectively with an overall increase of 7.6 percent in 2010-11 as compared to the previous Agriculture Census 2005-06 at all India level.

7.2 Tenancy

7.2.1 The State-wise distributions of number and area of operational holdings, according to tenancy, for Scheduled Castes in 2010-11 may be seen separately in Table 7.5 and Table 7.6 respectively.

Table 7.5: State-wise distribution of number of holdings of Scheduled Castes by Tenancy Status, 2010-11

7.2.2 Among Scheduled Caste holdings, wholly-owned and self-operated holdings constituted 95.6 percent in terms of number and 95.2 percent in respect of operated area at all India level. In Gujarat, Haryana, Karnataka, D & Nagar Haveli, Daman & Diu and Delhi, all the holdings were wholly-owned and self-operated. In the States of Andhra Pradesh, Bihar, Chhattisgarh, Jharkhand, Madhya Pradesh, Maharashtra and Tamil Nadu almost all holdings (above 99.0 percent) were recorded under wholly-owned and self-operated category with regard to both number and area of operational holdings. The wholly leased-in holdings were only 1.1 percent accounting for 1.0

percent of operated area at all India level. The States which had proportions of wholly leased-in holdings in terms of number and area of operational holdings above all India average of (1.1, 1.0) percent were Goa (5.0, 3.5) percent, Manipur (11.4, 10.9) percent, Odisha (11.6, 10.7) percent, Uttar Pradesh (1.4, 1.8), West Bengal (2.5, 2.2) and Puducherry (2.8, 5.0) percent. The proportion of number of wholly otherwise operated holdings was higher than the national average of 0.18 percent in the States of Goa (0.8 percent), Jammu & Kashmir (3.2 percent), Kerala (0.4 percent), Odisha (1.1 percent), Rajasthan (0.5 percent), Tripura (2.3 percent) and West Bengal (0.4 percent). In these States, the corresponding proportion of 'wholly otherwise' operated area was also higher than the all India average of 0.14 percent. In the category of 'Others' which has been defined under Chapter-IV, the proportion of number of holdings to the total number of holdings in respective States was above all India average of 3.12 percent in Manipur (3.4 percent), Odisha (13.5 percent) and West Bengal (23.1 percent) only whereas the proportion of operated area to the total operated area was higher than the all India average of 3.67 percent in Kerala (5.1 percent), Odisha (18.1 percent), West Bengal (30.2 percent) and Puducherry (4.3 percent).

7.2.3 The distribution of number of operational holdings as well as operated area of Scheduled Tribes in each State according to Tenancy in 2010-11 may be seen in Table 7.7 and Table 7.8 respectively.

Table 7.7: State-wise distribution of number of holdings of Scheduled Tribes by Tenancy Status, 2010-11

7.2.4 Among Scheduled Tribes, wholly-owned and self-operated holdings constituted 95.3 percent in number and 96.3 percent in term of area at all India level. In States of Arunachal Pradesh, Gujarat, Karnataka, Mizoram, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep all Scheduled Tribes holdings were wholly-owned and self-operated whereas in States like Andhra Pradesh, Bihar, Chhattisgarh, Jharkhand, Maharashtra, Manipur, Nagaland, Uttarakhand and Uttar Pradesh over 99.0 percent of the holdings fell under this category. In States like Andhra Pradesh, Bihar, Chhattisgarh, Jharkhand, Maharashtra, Manipur, Nagaland, Sikkim and Uttarakhand, over 99.0 percent of area of operational holdings also belonged to the category of owned & self-operated. The wholly leased-in holdings accounted for 0.59 percent of total number of holdings and 0.31 percent of operated area at all-India level. The States which had higher proportion of leased-in number of holdings than all India average of 0.59 percent were Goa (10.3 percent), Odisha (3.0 percent), Sikkim (1.1 percent), Uttar Pradesh (0.9 percent) and West Bengal (3.2 percent). In term of area under leased-in holdings, the States having higher proportion than national average of 0.31 percent were Goa (6.9 percent), Kerala (4.2 percent), Odisha (1.8 percent), Sikkim (0.4 percent), Tripura (0.5 percent), Uttar Pradesh (1.5 percent) and West Bengal (3.0 percent). The States of Goa, Jammu and Kashmir, Kerala, Meghalaya, Odisha, Tamil Nadu, Tripura and West Bengal, had higher proportions of number of holdings and operated area under 'wholly otherwise operated' and 'Others' categories of Scheduled Tribe holdings than respective national averages.

7.3 Terms of leasing

7.3.1 State-wise distributions of area leased-in for different terms of leasing relating to holdings of Scheduled Castes and Scheduled Tribes in 2010-11 are given in Table 7.9 and Table 7.10 respectively.

Table 7.9: State-wise distribution of leased-in area of Scheduled Castes by terms of leasing, 2010-11

Note: (1) Neg - negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

7.3.2 Distribution of area leased-in according to different terms of leasing for holdings of Scheduled Castes showed that share of produce was the most dominant term of leasing as about 62.0 percent of leased-in area fell under this category at all India level. The States having higher proportion than all India average of 61.86 percent were only Chhattisgarh (100.0 percent) where entire leased-in area fell under this category followed by Tripura (86.5 percent), West Bengal (86.1 percent), Madhya Pradesh (76.8 percent) and Odisha (68.4 percent). The State of Assam had also as high as 58.3 percent of leased-in area under share of produce. The other States which had substantial part of leased-in area under this category were Bihar (28.9 percent), Goa (21.0 percent), Himachal Pradesh (17.9 percent), Jammu & Kashmir (17.4 percent), Jharkhand (28.6 percent), Kerala (15.0 percent), Rajasthan (21.6 percent) and Puducherry (28.2 percent). The fixed money was the second important term of leasing having a share of 24.5 percent at all India level with Uttar Pradesh (91.3 percent) having the highest proportion of leased-in area under this category followed by Punjab (90.3 percent), Uttarakhand (76.1 percent), Andhra Pradesh (74.1 percent), Rajasthan (67.1 percent), Kerala (63.5 percent), Bihar (38.6 percent), Tamil Nadu (36.4 percent),

Jharkhand (32.1 percent) and Goa (31.2 percent). In terms of fixed produce, the proportion of leased-in area above national average of 11.85 percent was found in the States of Andhra Pradesh (24.1 percent), Assam (20.7 percent), Bihar (29.2 percent), Goa (47.8 percent), Jammu & Kashmir (63.8 percent), Jharkhand (39.3 percent), Madhya Pradesh (17.4 percent), Manipur (94.1 percent), Odisha (19.8 percent), Sikkim (97.2 percent), Tamil Nadu (46.9 percent), Uttarakhand (13.2 percent) and Puducherry (51.1 percent). The operated area under usufructuary mortgage and 'other terms' was less than 1.0 percent each but was as high as 21.1 percent in Assam followed by Tamil Nadu (7.8 percent), Manipur (5.9 percent) etc. in the case of former category at all India level.

7.3.3 Like holdings of all Social Groups and Scheduled Castes, 'share of produce' was the most dominant term of leasing of area operated for Scheduled Tribes as well which is evident from the fact that 57.60 percent of the leased-in area belonged to this category at all India level. In Chhattisgarh and Nagaland, entire leased-in area (100.0 percent) fell under this category followed by West Bengal (82.3 percent), Madhya Pradesh (74.6 percent), Assam and Tripura (70.8 percent each), Odisha (49.2 percent), Goa (44.9 percent) etc. The next important term of leasing of area was under 'fixed money' having a share of 21.7 percent at all India level. The highest proportion of leased-in area under the category was reported in Andhra Pradesh (86.6 percent) followed by Jharkhand (83.2 percent), Uttar Pradesh (68.3 percent), Rajasthan (55.4 percent), Jammu & Kashmir (53.4 percent), Goa (41.6 percent), Bihar (37.4 percent), Odisha (23.5 percent), Sikkim (23.0 percent), Kerala (15.3 percent) and West Bengal (10.1 percent). The proportion of leased-in area under 'fixed produce' was 16.2 percent at all India level and was the highest in Manipur (100.0 percent) followed by Meghalaya (76.5 percent), Bihar (62.6 percent), Sikkim (57.8 percent), Jammu & Kashmir (46.3 percent), Uttar Pradesh (31.7 percent), Tripura (25.4 percent), Odisha (24.3 percent), Madhya Pradesh (18.8 percent), Assam (16.0 percent), Goa (13.4 percent) etc. The proportions of leased-in area under 'usufructuary mortgaged' and 'others' were 2.3 percent each at all India level.

(B) LAND USE

7.4 Land Utilization

7.4.1 The State-wise area, in percentage, under main land use/categories for holdings of Scheduled Castes and Scheduled Tribes in 2010-11 may be seen in Table 7.11 and Table 7.12 respectively.

Table 7.11: State-wise percentage distribution of area under main land use of Scheduled Castes, 2005-06# and 2010-11

	All India	2.08	2.44	90.28	90.57	7.65	6.99	100.00	100.00

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) NA - not applicable. (4) Neg - negligible.

7.4.2 The net cultivated area formed 96.7 percent of total operated area of Scheduled Castes and 90.6 percent of Scheduled Tribes at all-India level in 2010-11. Similarly, land uncultivated area constituted 2.4 percent and 7.0 percent of operated area for Scheduled Castes and Scheduled Tribes respectively. Land not available for cultivation, formed small fraction of 1.0 percent and 2.4 percent respectively for these two social groups.

7.4.3 For Scheduled Castes holdings, Delhi and Haryana were the only States where the entire operated area was under cultivation during 2010-11. The percentage of net cultivated area to the total operated area was also higher than the national average of 96.7 percent in the States of Andhra Pradesh, Assam, Chhattisgarh, Goa, Gujarat, Haryana, Karnataka, Madhya Pradesh, Manipur, Odisha, Punjab, Tamil Nadu, Uttar Pradesh, West Bengal, Dadra & Nagar Haveli and Puducherry, while Himachal Pradesh had the lowest proportion of 68.3 percent under cultivation among all the States/UTs. Himachal Pradesh had also the highest figure of 22.5 percent of operated area under

land unutilized. The land not available for cultivation was the highest in Kerala (19.4 percent) among all the States followed by Tripura and Himachal Pradesh (9.2 percent each), Sikkim (7.8 percent), Daman & Diu (4.4 percent), Jammu & Kashmir (3.3 percent), West Bengal (2.5 percent), Jharkhand (2.3 percent) and Uttarakhand (2.1 percent).

7.4.4 In case of Scheduled Tribes, entire operated area was under cultivation in Mizoram during 2010-11, while in Nagaland, it was at the lowest (42.9 percent). Proportion of land unutilized was at the highest in Nagaland (39.9 percent) followed by Arunachal Pradesh (31.2 percent), Jammu & Kashmir (17.1 percent), Himachal Pradesh (16.7 percent), Sikkim (12.5 percent) and Jharkhand (12.1 percent) which are hilly States. Land not available for cultivation accounted for 2.4 percent in 2010-11 at all India level which was almost equal to the figure of 2005-06 (2.1 percent). However, in States like Nagaland it was as much as 17.2 percent followed by Lakshadweep (11.5 percent), Sikkim (9.9 percent), Arunachal Pradesh (9.7 percent), Tripura (8.4 percent), Himachal Pradesh (6.4 percent), Kerala (5.7 percent) and Jammu & Kashmir (5.3 percent).

(C) IRRIGATION

7.5 Irrigation Status

7.5.1 The percentage distributions of net irrigated area to net area sown in each State for holdings of Scheduled Castes and Scheduled Tribes in 2010-11 are given in Table 7.13 and Table 7.14 respectively.

Table 7.13: Percentage of net irrigated area to net sown area of Scheduled Castes, 2005-06[#] and 2010-11

35	Puducherry	0	0	0	0	NA	NA
	All India	128532	147702	25939	34709	20.18	23.50

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) NA - not applicable. (4) Neg - negligible.

7.5.2 The irrigated proportion of net area sown including wholly/partly irrigated holdings, of Scheduled Castes holdings in the country was 45.35 percent in 2010-11 against 45.23 percent in 2005-06. The percentage of net irrigated area to net sown area in 2010-11 was higher than the all India average of 45.35 percent in States of Bihar (52.1 percent), Haryana (97.5 percent), Madhya Pradesh (47.2 percent), Punjab (98.8 percent), Tamil Nadu (65.9 percent), Uttar Pradesh (82.7 percent), West Bengal (61.3 percent), Delhi (97.6 percent) and Puducherry (94.0 percent) and in the remaining States, it was below the national average of 45.35 percent.

7.5.3 The Scheduled Tribes holdings had much lower proportion of net area irrigated to net sown area (23.50 percent) as compared to respective percentages of Scheduled Castes (45.35 percent) and All Social Groups (45.70 percent) in 2010-11. The percentage of net irrigated area to net sown area was above the all India average of 23.50 percent in the States of Andhra Pradesh (32.7 percent), Arunachal Pradesh (26.7 percent), Bihar (50.2 percent), Goa (34.1 percent), Gujarat (27.8 percent), Himachal Pradesh (43.5 percent), Jammu & Kashmir (33.0 percent), Karnataka (25.5 percent), Madhya Pradesh (24.3 percent), Rajasthan (50.5 percent), Tamil Nadu (29.6 percent), Uttarakhand (72.0 percent), Uttar Pradesh (54.4 percent) and West Bengal (43.2 percent) and was below in the remaining States as compared to national average of 23.5 percent.

7.6 Source-wise irrigated area

7.6.1 The distribution of irrigated area, in percentage, by source in each State for Scheduled Castes holdings in 2010-11 may be seen in Table 7.15.

Table 7.15: Area irrigated, in percentage, of Scheduled Castes in each State by source of irrigation, 2005-06# and 2010-11

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets are for 2005-06. (3) Total may not tally due to rounding off. (4) NA - not applicable. (5) Neg - negligible.

7.6.2 Irrigation by tubewells was the most important source for Scheduled Castes holdings like All Social Groups, accounting for as much as 46.4 percent at all India level in 2010-11. Canals formed the next important source of irrigation having a proportion of 26.5 percent followed by wells (16.5 percent) and tanks (4.1 percent). Remaining 6.6 percent area was accounted for by 'other' sources.

7.6.3 The States which in proportion of area irrigated by tubewell were higher than all India average of 46.4 percent were Bihar (60.8 percent), Punjab (88.4 percent), Uttarakhand (62.7 percent), Uttar Pradesh (68.9 percent), West Bengal (64.5 percent), Dadra & Nagar Haveli (97.4 percent) and Delhi (100.0 percent). In respect of irrigation by canal, Chhattisgarh had the highest proportion of (79.0 percent), followed by Odisha (75.3 percent), Puducherry (73.5 percent), Haryana (52.4 percent), Jammu & Kashmir (46.3 percent), Maharashtra (35.0 percent), Tamil Nadu (34.5 percent), Andhra Pradesh and Karnataka (30.4 percent each), Bihar (29.4 percent), Rajasthan (27.6 percent). Tamil Nadu had the highest proportion of about 24.1 percent of area irrigated by tank followed by Andhra Pradesh (13.4 percent), Kerala (11.9 percent), Jharkhand (10.7 percent), West Bengal (7.9 percent), Karnataka (5.0 percent) and Tripura (4.6 percent). In irrigation by Wells, as against all India average of 16.5 percent, the States having higher proportions were Maharashtra (45.3 percent), Madhya Pradesh (40.8 percent), Jharkhand (37.9 percent), Kerala (34.1 percent), Gujarat (33.3 percent), Tamil Nadu (30.7 percent), Rajasthan

(28.2 percent), Andhra Pradesh (18.5 percent) and Goa (17.2 percent). However, Karnataka had also sizable proportion of area irrigated by wells (10.9 percent).

7.6.4 The distribution, in percentage, of irrigated area by source in each State for Scheduled Tribes holdings in 2010-11 is given in Table 7.16.

Table 7.16: Area irrigated, in percentage, for Scheduled Tribes in each State by source of irrigation, 2005-06# and 2010-11

	All India	23.77 (28.84)	5.35 (5.41)	23.31 (25.98)	26.80 (19.48)	20.78 (20.29)	100.00 (100.00)

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Figures in brackets are for 2005-06. (3) Total may not tally due to rounding off. (4) NA - not applicable. (5) Neg - negligible.

7.6.5 Like All Social Groups and Scheduled Castes, Tubewells were the most important source of irrigation, accounting for as much as 26.8 percent of irrigated area in the country in 2010-11 in case of holdings of Scheduled Tribes followed by Canal (23.8 percent) and wells (23.3 percent). 'Other' sources accounted for 20.8 percent of irrigated area. Irrigation by tanks was at the lowest of 5.4 percent in the country in 2010-11.

7.6.6 The maximum proportion of area irrigated by canals in 2010-11 was in the State of Jammu & Kashmir (75.7 percent) followed by Mizoram (72.6 percent), Odisha (61.1 percent), Chhattisgarh (56.3 percent), Assam (36.3 percent), Karnataka (35.3 percent), Maharashtra (33.3 percent), Dadra & Nagar Haveli (32.0 percent) and Gujarat (31.4 percent) which were above all India average of 23.8 percent.

7.6.7 Irrigation by tanks was the highest in Andhra Pradesh (22.7 percent) followed by Jharkhand (20.7 percent), West Bengal (13.4 percent), Maharashtra (8.5 percent), Kerala (7.3 percent) and Mizoram (7.0 percent). Irrigation by wells was much popular among Scheduled Tribes holdings after tubewells and canals as about 75.3 percent of net area was irrigated by wells in Tamil Nadu followed by Jharkhand (47.8 percent), Maharashtra (45.7 percent), Dadra & Nagar Haveli (42.3 percent), Rajasthan (37.0 percent), Madhya Pradesh (32.5 percent), Gujarat (24.4 percent), Andhra Pradesh (19.2 percent), Karnataka (17.7 percent), Goa (14.5 percent) and Kerala

(12.2 percent). Proportion of area irrigated by tubewells was the highest in Uttarakhand (73.4 percent) followed by Bihar (72.1 percent), Uttar Pradesh (70.2 percent), West Bengal (60.0 percent), Rajasthan (39.1 percent), Karnataka (38.9 percent), Gujarat (32.7 percent) and Andhra Pradesh (27.1 percent). In hilly regions, like Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim, Tripura and Himachal Pradesh and some other States like Goa, Kerala, 'other sources' were used for irrigation by Scheduled Tribes during 2010-11.

7.7 Dispersal of operational Holdings

7.7.1 State-wise dispersal of number and area of operational holdings, of Scheduled Castes, during 2010-11 may be seen in Table 7.17.

Table 7.17: State-wise dispersal of number and area of operational holdings for Scheduled Castes, 2010-11

(Number in '00)
(Area in '00 ha.)

Sl. No.	States/UTs	Total Holdings		Operational Holdings Whose Operated Area is Located						Operational Holdings Whose Operators Reside Outside the Tehsil

Note: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

7.7.2 At All India level, 96.94 percent of holders had their entire operated area within the village of residence. All the holdings in the States of Assam, Sikkim, Dadra & Nagar Haveli, Daman & Diu and Delhi were located entirely within the village of residence of the holders. Also, in States like Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Punjab, Tamil Nadu, Tripura and Uttar Pradesh, the concentration of operational holdings within village of residence was above the all India average of 96.94 percent and in remaining States. The States of Bihar, Chhattisgarh, Gujarat, Jammu & Kashmir, Jharkhand, Karnataka, Madhya Pradesh, Maharashtra, Manipur, Punjab, Tamil Nadu, Tripura and Uttar Pradesh had higher proportions of area lying within resident village only ranging between 95.60 percent to 99.99 percent. Only a small proportion of 3.1 percent of number of holdings and 4.4 percent of operated area were scattered either partly in the village of residence and partly in other villages within the same Tehsil or entirely outside the village of residence but within the same Tehsil or holdings of deemed cultivators. As against all India

average of 1.6 percent in number of holdings and 2.5 percent in operated area i.e. (1.6 percent, 2.5 percent), under category of holdings lying partly in the village of residence and partly in other villages within the same Tehsil/Block, West Bengal had highest proportion (8.1 percent, 12.6 percent) followed by Odisha (7.6 percent, 11.0 percent), Himachal Pradesh (4.8 percent, 6.2 percent), Manipur (3.8 percent, 3.2 percent), Uttarakhand (2.5 percent, 4.9 percent) and Rajasthan (1.8 percent, 3.5 percent). Against all India average of 1.4 percent in number of holdings and 1.7 percent in operated area, in the category of operated area lying entirely outside the village of residence but within the same Tehsil, States like Andhra Pradesh, Goa, Karnataka, Odisha, Rajasthan and Puducherry had higher proportions than all India average.

7.7.3 State-wise dispersal of number and area of operational holdings for Scheduled Tribes during 2010-11 is given in Table 7.18.

Table 7.18: State-wise dispersal of number and area of operational holdings of Scheduled Tribes, 2010-11

Not: (1) Neg - Negligible. (2) Figures in brackets are percentages. (3) Total may not tally due to rounding off.

7.7.4 In the case of Scheduled Tribes operational holdings, only small proportion of about 1.4 percent of number and 1.7 per cent of operated area was scattered partly in the village of residence and partly in other villages located within the same Tehsil. About 1.0 percent of number of holdings and 0.8 percent of corresponding operated area was lying either entirely outside the village of residence but within the same Tehsil or of holdings belonging to deemed cultivators. The entire operated area of Scheduled Tribes operational holders in the States of Arunachal Pradesh, Gujarat, Meghalaya, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep was located within the village of residence. In other States, viz. Assam, Bihar, Chhattisgarh, Jammu and Kashmir, Jharkhand, Madhya Pradesh, Maharashtra, Manipur, Mizoram, Nagaland, Tamil Nadu, Tripura and Uttar Pradesh, almost entire operated area (99.0 percent and above) was located within the village of residence. Among States, Himachal Pradesh had the highest proportion of

15.7 percent holdings and 27.8 percent area (15.7 percent, 27.8 percent) under the category of holdings lying partly in the village of residence and partly in other villages located within the same Tehsil followed by West Bengal (9.9 percent, 14.4 percent), Uttarakhand (8.8 percent, 16.9 percent), Odisha (4.3 percent, 6.1 percent), Kerala (2.6 percent, 6.7 percent), Goa (3.0 percent, 4.4 percent) and Rajasthan (1.5 percent, 3.6 percent) each. For all India average of 1.0 percent in number of holdings and 0.7 percent of operated area i.e. (1.0 percent, 0.7 percent) in the category of holdings lying entirely outside the village of residence but within the same Tehsil, Andhra Pradesh (4.3 percent, 3.5 percent), Rajasthan (2.1 percent, 2.0 percent), Karnataka (2.0 percent, 1.8 percent), West Bengal (1.8 percent, 1.6 percent), Odisha (1.5 percent, 1.2 percent) and Goa (1.4 percent, 1.2 percent) had higher proportions in number of holdings and corresponding operated area.

(D) CROPPING PATTERN

7.8 Gross Cropped Area

7.8.1 The State-wise distribution of gross cropped area of holdings of Scheduled Castes in 2010-11 may be seen in Table 7.19 and Table 7.20.

Table 7.19: State-wise Gross Cropped Area of Scheduled Castes, 2010-11

7.8.2 From the Table 7.20 it may be seen that the largest share of 17.8 percent in gross cropped area in 2010-11 was accounted for by Rajasthan followed by Uttar Pradesh (17.4 percent), Madhya Pradesh (11.1 percent), West Bengal (10.8 percent), Maharashtra (9.6 percent), Karnataka (6.4 percent), Andhra Pradesh (6.0 percent), Odisha (4.1 percent), Bihar (3.6 percent), Chhattisgarh (2.8 percent) and Tamil Nadu (2.6 percent). In respect of gross irrigated area, Uttar Pradesh accounted for the highest proportion of 31.1 percent followed by Rajasthan (12.8 percent), West Bengal (12.5 percent), Madhya Pradesh (8.9 percent), Andhra Pradesh (6.1 percent), Bihar (4.8 percent), Maharashtra (3.8 percent), Karnataka (3.5 percent), Tamil Nadu (3.4 percent), Punjab (3.1 percent) and Odisha & Chhattisgarh (2.6 percent each).

7.8.3 The State-wise distribution of gross cropped area of holdings of Scheduled Tribes in 2010-11 is given in Table 7.21 and Table 7.22.

Table 7.21: State-wise Gross Cropped Area of Scheduled Tribes, 2010-11

Note: (1) # excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) Neg - negligible (4) NA - not applicable.

7.8.4 From Table 7.22, it may be seen that gross cropped area of 18.2 million hectares, Madhya Pradesh alone accounted for 21.3 percent followed by Rajasthan (12.6 percent), Chhattisgarh (12.4 percent), Maharashtra (9.7 percent), Odisha (9.2 percent), Andhra Pradesh (6.0 percent), Gujarat (5.3 percent), Karnataka (4.1 percent) and Assam and Jharkhand (3.1 percent each). These ten States together accounted for 86.8 percent of total gross cropped area of Scheduled Tribe holdings. In case of irrigated area, Rajasthan had the highest proportion of 21.5 percent of total irrigated area followed by Madhya Pradesh (18.9 percent), Andhra Pradesh (9.9 percent), Odisha (6.9 percent), Gujarat (6.7 percent), Chhattisgarh (6.1 percent), Karnataka and Maharashtra (5.6 percent each) and West Bengal (4.9 percent).

7.9 Intensity of Cropping

7.9.1 The State-wise intensity of cropping of holdings of Scheduled Castes, in 2010-11, may be seen in Table 7.23.

Table 7.23: State-wise Intensity of Cropping of holdings of Scheduled Castes, 2010-11

7.10.2 In case of Scheduled Castes holdings, for all crops taken together, among all the States, Rajasthan had the highest proportion of 17.8 percent of total gross cropped area in the country followed by Uttar Pradesh (17.4 percent), Madhya Pradesh (11.1 percent), West Bengal (10.8 percent), Maharashtra (9.6 percent), Karnataka (6.4 percent), Andhra Pradesh (6.0 percent), Odisha (4.1 percent) and Bihar (3.6 percent). These nine States together accounted for about 87.0 percent of total cropped area in the country. Under food crops category, Uttar Pradesh had highest proportion of 21.2 percent of total area under food crops in the country followed by Rajasthan (14.8 percent), West Bengal (11.4 percent), Madhya Pradesh (9.3 percent), Maharashtra (7.8 percent), Karnataka (6.5 percent), Odisha (5.0 percent), Andhra Pradesh (4.9 percent) and Bihar (4.5 percent). These States, thus, accounted for more than 85.0 percent of total area under food crops in the country. The sequence of States observed in case of cereals indicated that Uttar Pradesh accounted for 23.8 percent followed by Rajasthan (13.0 percent), West Bengal (12.1 percent), Madhya Pradesh (8.1 percent), Maharashtra (6.0 percent), Bihar (5.8 percent), Odisha (5.6 percent), Karnataka (5.5 percent), Andhra Pradesh (4.5 percent), Chhattisgarh (3.8 percent), Tamil Nadu (2.5 percent) and Punjab (2.1 percent). In pulses, Rajasthan had largest proportion of area of 25.5 percent of total area under pulses in the country followed by Madhya Pradesh (18.2 percent), Maharashtra (15.0 percent), Karnataka (10.3 percent), Uttar Pradesh (8.9 percent), Andhra Pradesh (6.2 percent), Odisha (4.7 percent), Tamil Nadu (3.5 percent) and Chhattisgarh (3.3 percent), thus, accounted for about 96.0 percent of total area under pulses in the country. As regards area under oilseeds, Madhya Pradesh had the largest share of 27.6 percent of total area under the crop in the country followed by Rajasthan (25.5 percent), Maharashtra (12.8 percent), Andhra Pradesh (7.9 percent), Karnataka (7.1 percent), West Bengal (5.9 percent), Uttar Pradesh (5.4 percent) and Gujarat (3.1 percent) covering together about 96.0 percent of total area under Oilseeds in the country. Maharashtra had about 1/3rd of total area under fibre in the country (31.6 percent) followed by Andhra Pradesh (20.6 percent), West Bengal (19.1 percent), Gujarat (8.7 percent), Madhya Pradesh (5.9 percent), Karnataka (4.7 percent), Rajasthan (4.6 percent). In case of area under fodder crops, Rajasthan had covered more than 3/4th of total area under this crop in

the country (76.7 percent) followed by Maharashtra (9.9 percent), Gujarat and Punjab (2.9 percent each), Uttar Pradesh (2.8 percent), Madhya Pradesh (1.5 percent) and Tamil Nadu (1.0 percent). West Bengal had the highest share of 29.2 percent of total area under floriculture crops in the country followed by Tamil Nadu (22.2 percent), Karnataka (16.2 percent), Tripura (13.6 percent), Andhra Pradesh (6.9 percent), Maharashtra (3.9 percent), Gujarat (3.8 percent), Uttar Pradesh (1.5 percent), Kerala (1.3 percent) and Rajasthan (1.1 percent). Further, proportion of area under non-food crops was the highest in Rajasthan (28.6 percent) followed by other States like Madhya Pradesh (17.4 percent), Maharashtra (16.2 percent), Andhra Pradesh (9.8 percent), West Bengal (8.5 percent), Karnataka (6.0 percent), Gujarat (4.3 percent) and Uttar Pradesh (3.9 percent).

7.11 Intensity of Cropping

7.11.1 The State-wise intensity of cropping of holdings of Scheduled Tribes during 2010-11 is given in Table 7.25.

Table 7.25: State-wise Intensity of Cropping of holdings of Scheduled Tribes, 2010-11

(Area in '00 ha.)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping (3/4)
1	2	3	4	5
1	Andhra Pradesh	10871	9956	1.0920 (1.0496)

31	Dadra & Nagar Haveli	167	167	1.0020	(1.0060)
32	Daman & Diu	3	2	1.0543	(1.0000)
33	Delhi	0	0	0.0000	(0.0000)
34	Lakshadweep	21	21	1.0005	(1.0005)
35	Puducherry	0	0	0.0000	(0.0000)
	All India	181545	147702	1.2291	(1.1486)

Note: (1) Total may not tally due to rounding off. (2) NA - not applicable. (3) Figures within brackets are for 2005-06.

7.11.2 Against all India average of 1.2291 in 2010-11, Uttarakhand recorded the highest intensity of cropping of 1.8589 among all States/UTs followed by Himachal Pradesh (1.5304), Uttar Pradesh (1.5285), Rajasthan (1.4757), West Bengal (1.4708), Bihar (1.4250), Jammu & Kashmir (1.3528), Maharashtra (1.3330), Madhya Pradesh (1.3102) and Arunachal Pradesh (1.3016) which were higher than national level of 1.2291. It appears from the statement that there was almost single cropping system prevailed among holdings of Scheduled Tribes during 2010-11 in Goa, Gujarat, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep.

7.12 State-wise Area under Principal Crops

7.12.1 The State-wise distribution, in percent, of area under principal crops of Scheduled Tribes holdings in 2010-11 may be seen in Table 7.26(a) and 7.26(b).

Table 7.26(a): State-wise percentage distribution of Area under Principal Crops (Food Crops) of Scheduled Tribes, 2010-11

7.12.2 Considering all crops together, among all the States, Madhya Pradesh had the highest share, accounting for 21.3 percent of total cropped area in the country followed by Rajasthan (12.6 percent), Chhattisgarh (12.4 percent), Maharashtra (9.7 percent), Odisha (9.2 percent), Andhra Pradesh (6.0 percent), Gujarat (5.3 percent), Karnataka (4.1 percent), Assam and Jharkhand (3.1 percent each) and West Bengal (2.7 percent), thus, accounted together for about 90.0 percent of total cropped area in the country. Also, Madhya Pradesh had the maximum proportion of 20.1 percent of total area under food crops in the country followed by Chhattisgarh (14.6 percent), Rajasthan (10.9 percent), Odisha (10.7 percent), Maharashtra (7.9 percent), Gujarat (5.5 percent), Andhra Pradesh (4.8 percent), Jharkhand (3.7 percent), Karnataka (3.6 percent), Assam (3.5 percent) and West Bengal (3.0 percent) covering an area of 88.0 percent of total food crops in the country. The sequence of area under cereal crops showed that Madhya Pradesh had the highest share of 20.2 percent followed by Chhattisgarh (16.1 percent), Odisha (11.9 percent), Rajasthan (10.8 percent), Maharashtra (6.4 percent), Gujarat (4.7 percent), Andhra Pradesh (4.4 percent), Jharkhand (4.1 percent), Assam (3.9 percent), Karnataka (3.3 percent) and West Bengal (3.2 percent). Further, Madhya Pradesh had also the largest proportion of area, accounting for, nearly 30.0 percent of total area under pulses followed by Maharashtra (15.2 percent), Rajasthan (14.2 percent), Chhattisgarh (11.1 percent), Gujarat (7.2 percent), Odisha (6.7 percent), Andhra Pradesh (5.5 percent) and Karnataka (4.6 percent) indicating together about 95.0 percent of total area under pulses in the country. Madhya Pradesh had further the largest proportion of 34.6 percent of total

area under oilseeds in the country followed by Rajasthan (27.2 percent), Maharashtra (10.9 percent), Karnataka (7.0 percent), Andhra Pradesh (4.8 percent), Chhattisgarh (4.1 percent) and Odisha (3.0 percent). These seven States together covered about 92.0 percent of total area under Oilseeds in the country. Maharashtra had the highest proportion of 30.9 percent of total area under fibre in the country followed by Andhra Pradesh (29.7 percent), Madhya Pradesh (15.3 percent), Gujarat (10.4 percent), Karnataka (5.7 percent), West Bengal (2.7 percent), Odisha (2.5 percent) and Rajasthan (1.3 percent). Maharashtra had the highest proportion of 46.6 percent of total area under fodder crops in the country followed by Rajasthan (33.5 percent), Madhya Pradesh (9.1 percent) and Gujarat (8.3 percent). In case of floriculture crops, Tripura had the highest share of about 53.0 percent of total area under floriculture crops in the country followed by Karnataka (16.1 percent), Gujarat (9.7 percent), Tamil Nadu (8.0 percent) and Rajasthan (4.2 percent). The proportion of area under non-food crops was at the maximum of 26.5 percent in Madhya Pradesh while Rajasthan was at the next (20.1 percent) followed by Maharashtra (17.8 percent), Andhra Pradesh (11.3 percent), Karnataka (6.3 percent), Gujarat (4.8 percent) and Chhattisgarh and Odisha (2.6 percent each).
